The Rollamo

1958

The annual publication
of the
Missouri School of Mines

Volume 52

The Min

The Miner is a very versatile person. His habits and habits are constantly changing, forming a basis for tomorrow's personality. This has been a formative year for the Miner. It will reflect the future success of the Miner.

Learning what is put forth in the classroom is the foremost asset of an education. Here opportunities are presented that will not be paralleled at any time in life. Here the ambitions of the Miner are guided through proper channels. The heavy concentration of knowledge acquired this year will tend to pour out as the high salaries of the following years.

er's Year

Leadership ability prospers among the assets of the Miner and is nourished in the many campus organizations. These organizations vary in purpose from religious to professional, but all prepare the Miner, now, for the years to come.

Through participation in social and athletic events the Miner forges further links on a chain that is destined someday to lock around success.

The many opportunities of this year make it a great determinant of the future. No period of time can be underestimated, but it is now that is most important.

Preface

One characteristic that is possessed by every student is his affinity for the slide rule. At some time during every day of the school year, the slide rule is used. With this in mind the slide rule will be seen on some of the following pages so that it will be identified with the 1958 Rollamo as it is with the typical Miner. In some cases the slide rule will be subdued, on other pages it will be forward, just as it is used and forgotten depending upon the activity at hand.

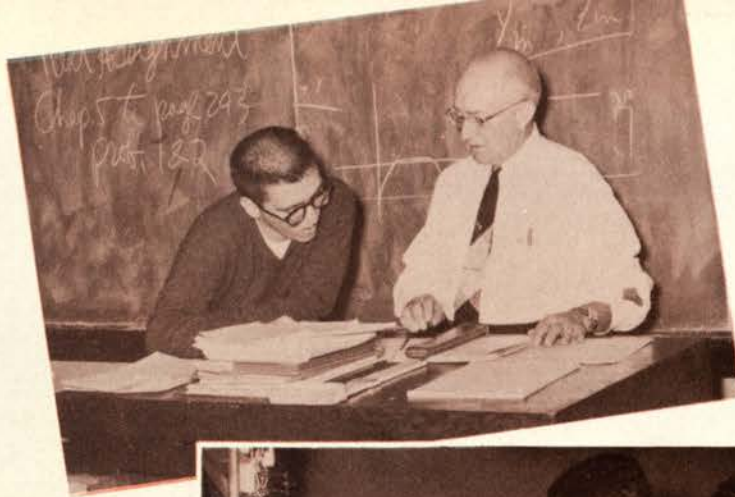

The Miner is waiting for something better. He always wants to see improvement. In this book an attempt was made to give him more to remember. Many things have been added to this year's Rollamo and it is hoped that this is to the liking of the Student. There are many events to a schoolyear and it is the hope of the staff of the Rollamo that in the following pages, these events are covered to the Miners' satisfaction.

The Rollamo is a recollection of memories of the past year. One cannot help feeling a resurgence of pride in past successes. On the following pages is an accurate record of just what you have done. The written word, compensated by the pictures shown, give one an indication of himself.

A school is no better than its students. The Faculty of MSM and the students who have preceded you have given you the entire heritage of campus life. From administration through social events you have received a start. Here is how you have capitalized in the investment of schooling on your way to the acquisition of knowledge and graduation.

Building and the Power Plant

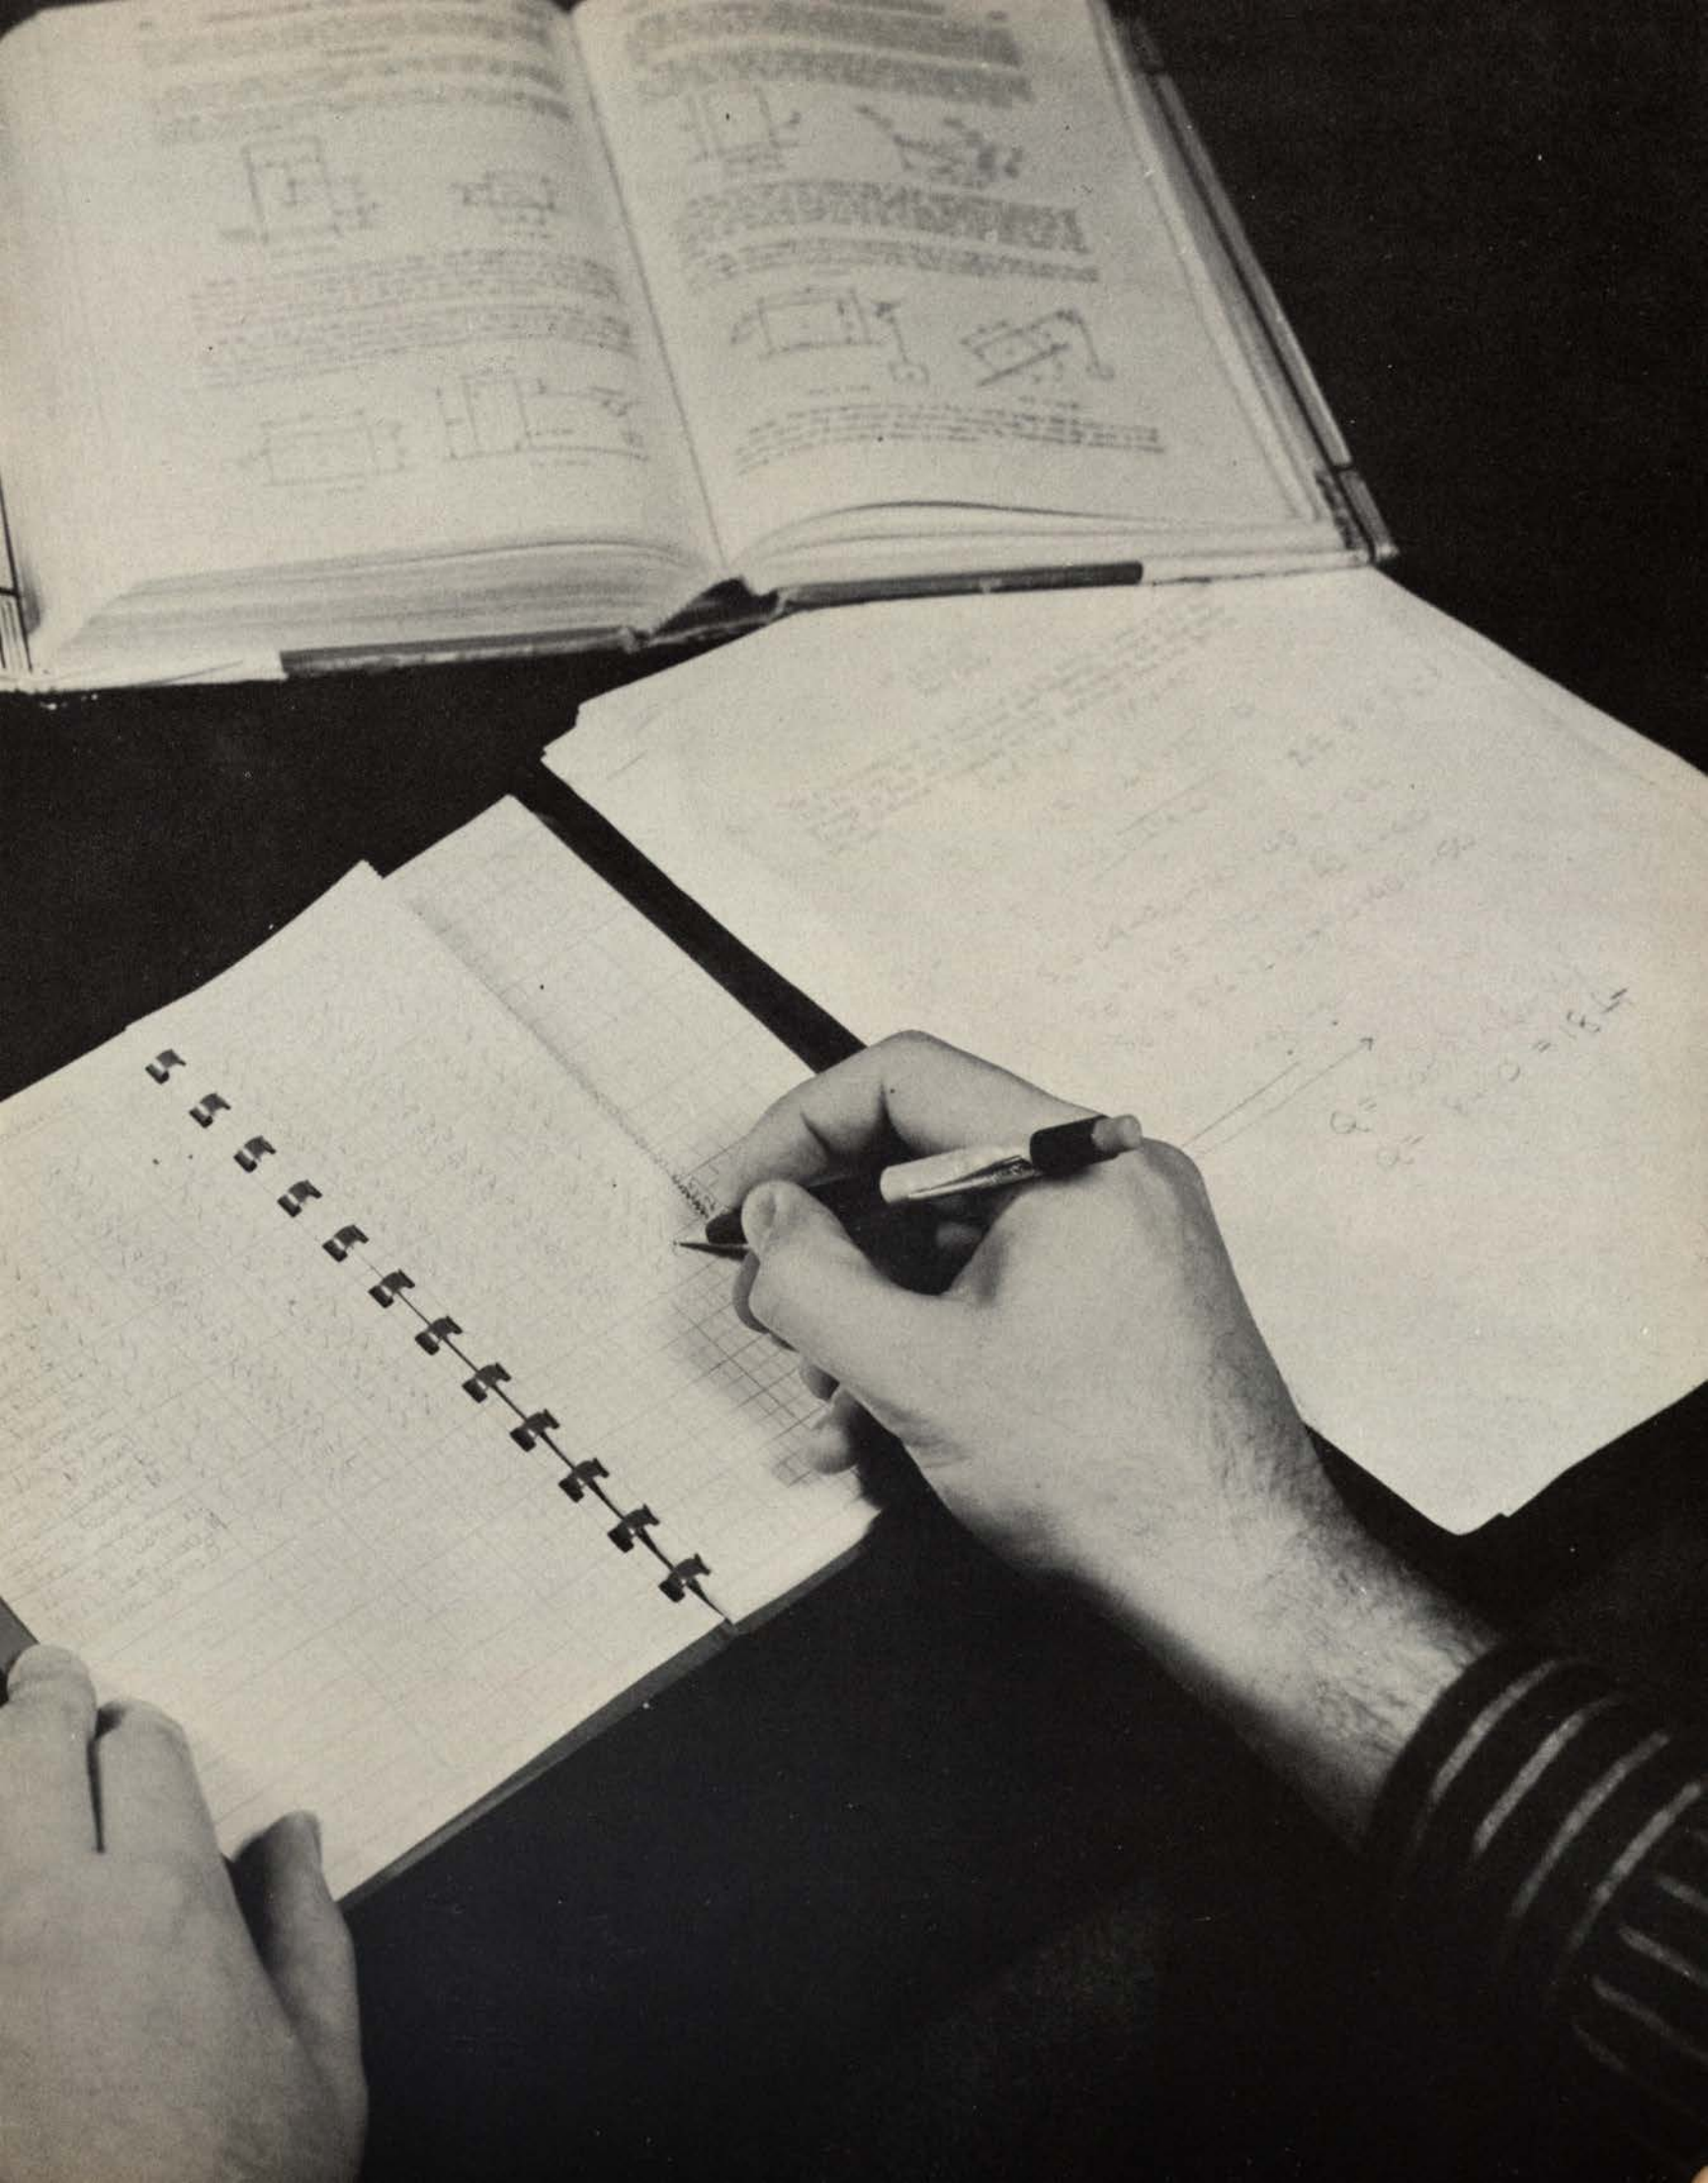

The smokestack of the Power Plant symbolizes the heights to which one can soar with the firm foundation of education.

The Miner's Year in

Administration

President

School of Mines and Metallurgy
University of Missouri

President Elmer Ellis

B.A., 1924, M.A., 1925, University of North Dakota; Ph.D., 1931, State University of Iowa

Parker Hall - Administration Center of MSM

Dr. Elmer Ellis, having completed his third year as president of the University of Missouri, rose to this post through the ranks of professorship, committeeman, and deanship. Arriving at the University of Missouri in 1930, he joined the faculty as an assistant professor of history, advanced to the position of professor, and served on many important committees during the summers of 1936, 1939, and 1941.

Through this work, Dr. Ellis gained a thor-

ough knowledge of University policies and procedures and an opportunity to demonstrate his administrative ability. Acting in the capacity of Dean of the College of Arts and Science from the World War II period to 1954, he increased his standing as a person of educational and administrative talent. Then that year, Dr. Ellis was appointed acting president of the University; and before the end of this term he received the appointment of president by the Board of Curators.

Board of Curators

BOARD OF CURATORS

Mrs. Byron T. Shutz
Mr. James A. Finch, Jr.
Mr. Lester E. Cox
Mr. Fred V. Heinkel
President Elmer Ellis (U. of Mo.)
Mr. J. A. Daggs
Mr. Randall R. Kitt
Mr. Oliver B. Ferguson
Mr. Delos C. Johns
Mr. Robert Neill

Composed of nine residents of the state of Missouri, the Board of Curators of the University of Missouri and the Missouri School of Mines and Metallurgy is appointed by the Governor and confirmed by the State Senate. Not more than one man may be appointed from the same congressional district in order to insure a true representation, and not more than five curators may belong to any one political party.

The term of service of the curators is six years with the terms of their members expiring every two years. When his term expires, each member of the Board is eligible for reappointment, and thus some of the present members have many years of experience.

Serving as the Executive Committee for the Missouri School of Mines and Metallurgy each year are three members appointed by the Board. This committee meets monthly for the purpose of auditing claims and attending to other such business given them by the Board of Curators. Randall R. Kitt is chairman of the present Executive Committee. The other two members are Oliver B. Ferguson and Mrs. Byron T. Shutz.

Seated: Mrs. Byron T. Shutz, James A. Finch, Jr., Lester E. Cox, Fred V. Heinkel. Standing: President Elmer Ellis (U. of Mo.); J. A. Daggs, Randall R. Kitt, Oliver B. Ferguson, Delos C. Johns, Robert Neill.

Curtis L. Wilson

Dean

Dr. Curtis L. Wilson, Dean of Missouri School of Mines and Metallurgy, is one of the outstanding figures in the field of engineering today. A native of Baltimore, Maryland, he received his education both in this country and abroad. Before assuming the position of Dean at the School of Mines in 1941, Dr. Wilson had worked in industry and taught at the Montana School of Mines. Along with his honors as an administrator, he has also distinguished himself as the author of a number of technical articles.

DEAN CURTIS L. WILSON

Dean M.S.M., 1941

B.S., 1916, Baltimore City College; E.M., 1920, Montana School of Mines; Ph.D., 1928, University of Goettingen; D.Eng., 1954, Washington University; D.Eng., 1955, Montana School of Mines.

The Dean and Mrs. Wilson at home

At the Missouri School of Mines, Dean Wilson is especially known and respected for his ability as a speaker. His talent in this field is unlimited and he is equally versatile in delivering a formal address or an informal discussion. Although, he has the immense task of co-ordinating the activities of the entire school, Dr. Wilson still tries to accept as many speaking requests as he can fit into his already tight schedule. These many invitations are an indication of the great demand and respect for his speaking powers.

In his seventeen years of service as Dean, Dr. Wilson has brought great prestige to the Missouri School of Mines; and his sound practical decisions have always served for the best advantage of all concerned.

The Dean's Residence

Vernon Gevecker

Assistant Dean

To Assistant Dean Gevecker belongs the task of guiding the student through his college years in accordance with the policies and rules that characterize the high level of operating conditions existing at MSM. With this aim in mind, Dean Gevecker does highly commendable work in maintaining his many duties and provides the student with excellent counsel and advice.

Noel Hubbard

Registrar

Sound judgement and decision exemplify the actions of Mr. Noel Hubbard in his position as Registrar of the School of Mines. Through long experience in the post of Registrar, Mr. Hubbard efficiently and admirably carries out the difficult problems of class scheduling as well as keeping an accurate and up to date file of every student's activities.

Paul R. Ponder

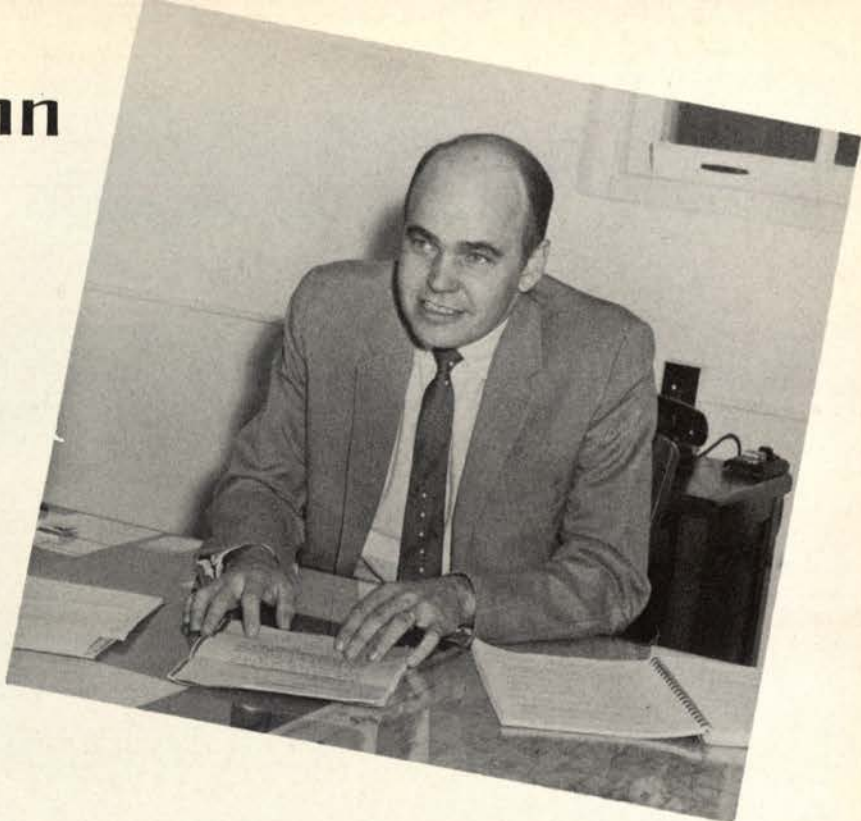

Assistant Registrar

As Assistant Registrar, Mr. Paul Ponder undertakes to relieve the office of the Registrar in a major portion of the huge tasks that confront them. Through his assistance, the duties of the Registrar can be more thoroughly carried out to their completion, resulting in more efficient operation. At the end of his third year in this position, Mr. Ponder is doing an admirable job.

Emmett Klinkermann

Business Manager

The sound financial condition of the School of Mines is preserved through the supervision of Mr. Emmett Klinkermann, Business Manager of MSM. Although, the student's main contact with the Business Manager occurs only at the beginning of each semester when fees are due, Mr. Klinkermann does fine work in handling the many financial problems that beset him.

Earl Randolph

Librarian

Completing his eleventh year in the office of Head Librarian, is Mr. Earl Randolph, holder of AB and AM degrees in Library Science along with a BS degree in chemistry. His is the responsibility of maintaining a wide and varied selection of the most recent scientific publications for the benefit of the student in his studies and relaxation.

Ernest P. Hendrix

Superintendent of Grounds

Keeping our campus beautiful and in excellent condition is the major aim of Mr. Ernest Hendrix, Superintendent of Building and Grounds. With this thought in mind, Mr. Hendrix supervises and controls the entire activities of the maintenance crew on our campus. In this way, he is able to make certain that repairs and other projects are carried out in the most satisfactory way.

Ceramic Engineering Department

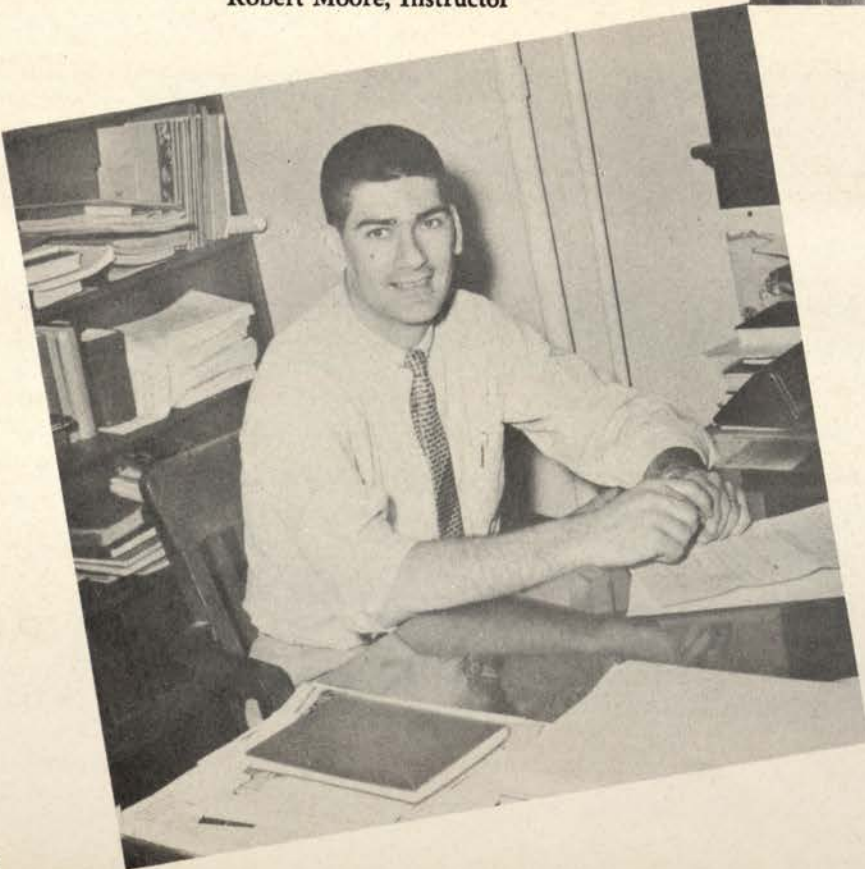

Theodore J. Planje
Department Chairman
Professor of Ceramic Engineering 1946, 1955.
B.S. in Cer. E. 1940, Missouri School of Mines;
Ph. D., 1950, Missouri.

Robert Moore, Instructor

Grinding Operation

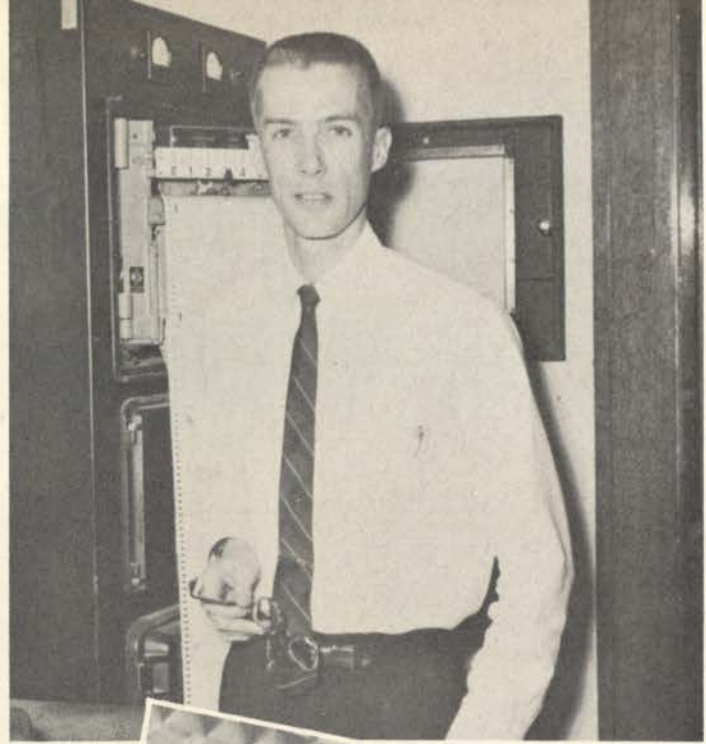

It is interesting to note that people today are intimately associated with thousands of Ceramic products daily, yet very seldom is the word Ceramics mentioned. The diversity of occupations pursued by Ceramic Engineers is very apparent. Most Ceramic Engineers are employed in one of four types of work -- production, sales, research, and administrative work. Yes, the opportunities for a college trained Ceramist as he enters the industry are excellent.

Ceramic Engineering Department

The Ceramic Engineering Department, established in 1926 and fourth largest in the nation, possesses especially well equipped laboratories and a very close contact is maintained with industry through testing and research done at the college for manufacturers.

As research activities are expanded, the demand continues to increase and these factors make it possible for the young Ceramic Engineer to go into his choice of branches of the industry and advance rapidly.

Mud Lab

Chemical Engineering Department

Dudley Thompson
Department Chairman
Professor of Chemical Engineering 1956
B.S. in Ch. E., 1935, M.S.,
1941, Ph. D., 1950
Virginia
Polytechnic Institute.

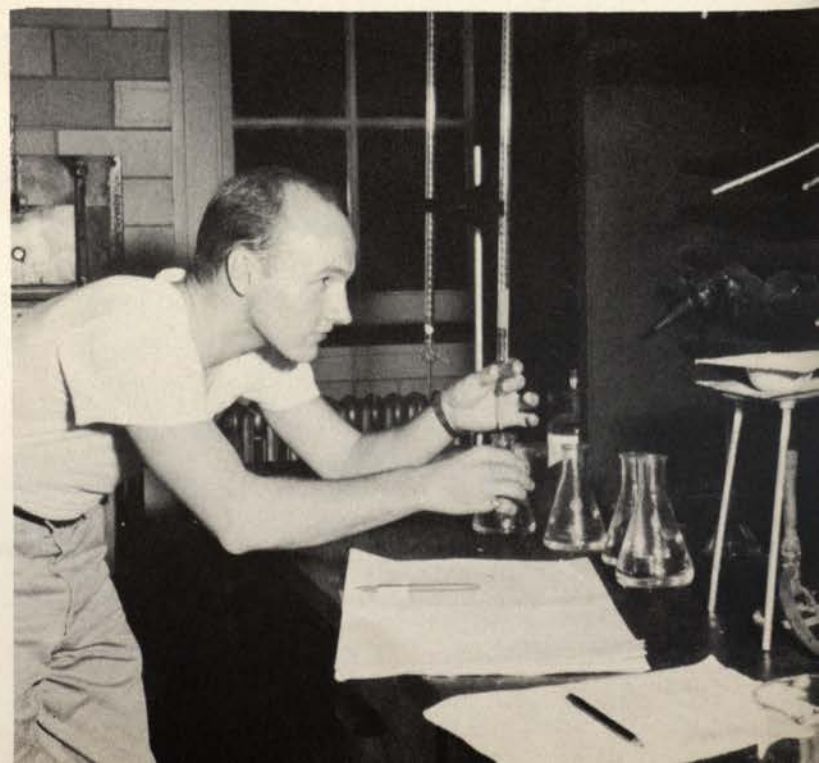

The Chemical Engineer is found in every large industrial organization participating in the development and improvement of new products. His duties may place him in the executive department, research, development, plant and equipment design, plant construction and operation, process control or technical sales. In any event, he will be in the midst of things, making every effort to produce better living through the application of Chemical Engineering and Chemistry.

There are unlimited opportunities for the person who is willing to secure his fundamental training in Chemical Engineering. The field is so diversified that the man so trained may select the type of work he particularly desires.

Unit Operations Lab

Quant. Lab

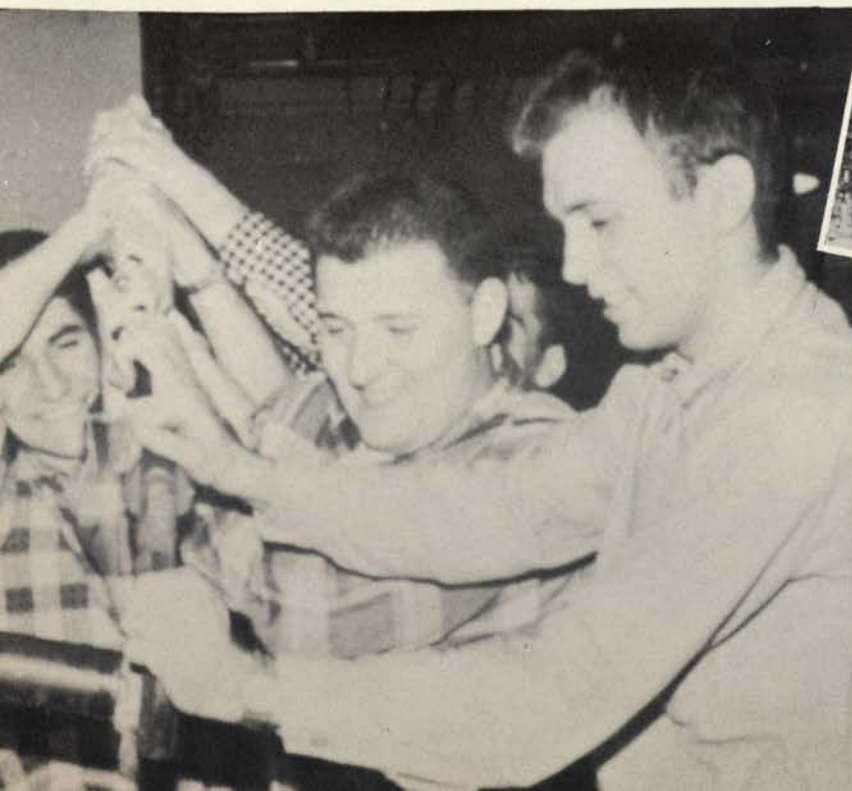

Chemical Engineering Department

The Chemical Engineering student receives training that supplies the foundation and tools he needs to start a professional career. Organic, inorganic, analytical, and physical chemistry, mathematics, physics, mechanics, and economics furnish the basic training. The professional aspects are emphasized by industrial stoichiometry, chemical engineering unit operation, design, and thermodynamics. Other supporting engineering subjects in civil, mechanical, and electrical engineering complete the four year curriculum.

The Missouri School of Mines offers a science-chemistry option in addition to training in Chemical Engineering. Students interested in theoretical, analytical, inorganic, organic, and physical chemistry or the research and teaching of chemistry are offered complete accredited curricula for preparation in these fields.

Pipefitting

Above - Fisher, Custead and James

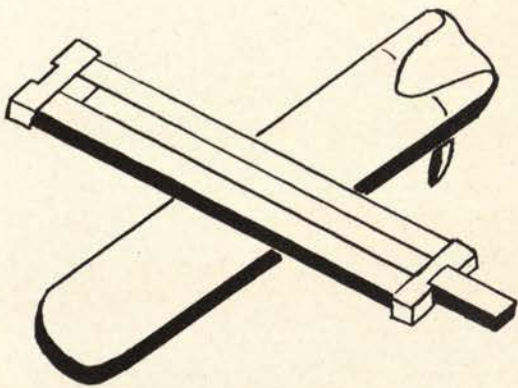

Below - Qual Lab

"Doc" Muir and Fluid Display

Civil Engineering Department

The term Civil Engineering was originally applied to all types of engineering work not directly connected with military operations. At the present time, Civil Engineering still covers an extremely broad field of engineering endeavor. The Railway, Highway, Hydraulic, Sanitary, and Structural phases of engineering may exemplify the wide and varied applications of the Civil Engineering field. Yet, these general divi-

Mr. Stites' Fluid Lab

Carlton and Eshbaugh checking equipment

sions comprise only a portion of the many versatile developments accredited to the title, Civil Engineering.

This field is obviously too extensive to be covered thoroughly in all its divisions in four years. Therefore, the student may, in addition to the fundamentals of Civil Engineering, select special training at the School of Mines and Metallurgy in any of its numerous branches.

The curriculum in Civil Engineering, one of the oldest and largest departments on campus,

Civil Engineering Department

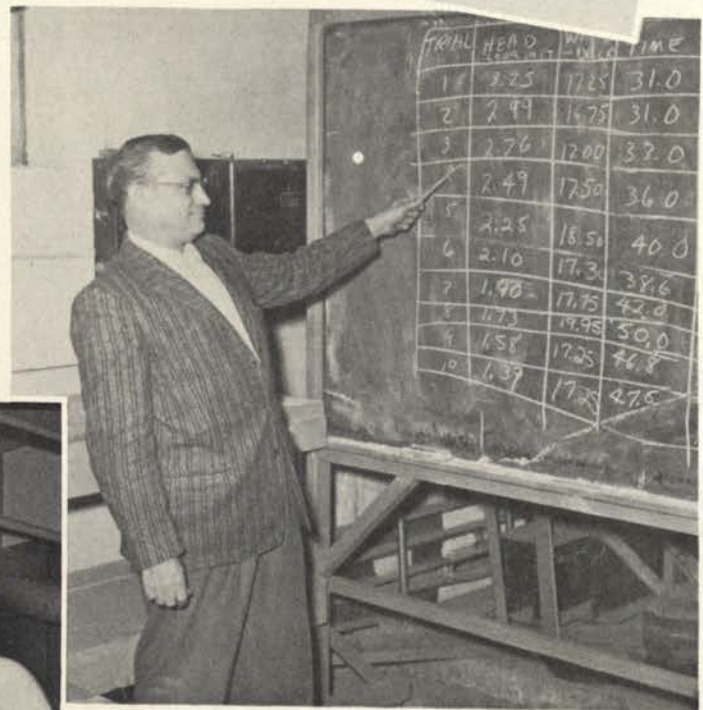

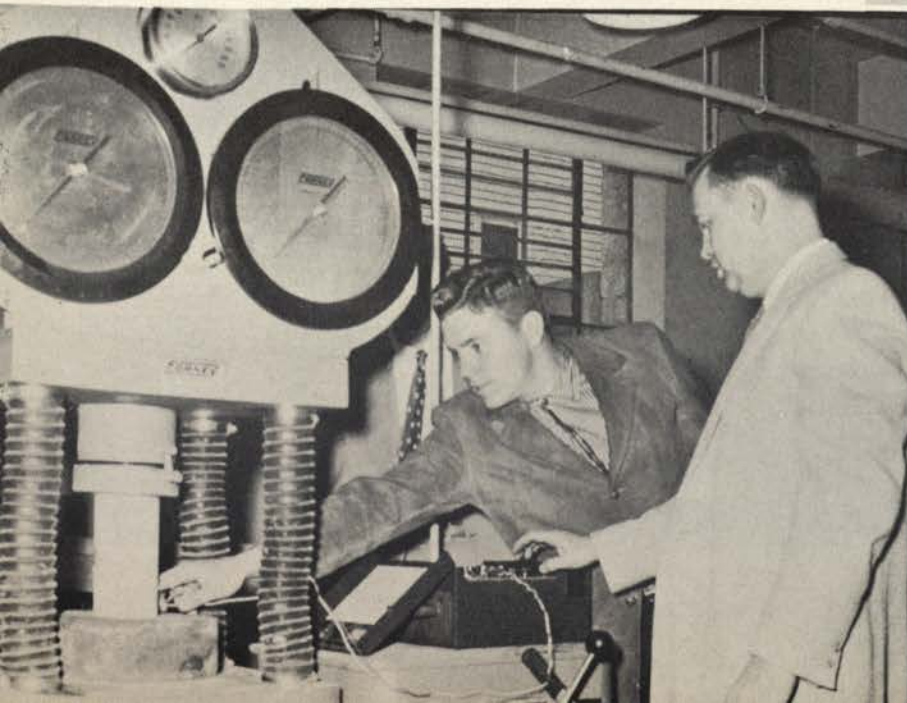

Ernest W. Carlton
Department Chairman
Professor of Civil Engineering, 1923, 1936.
B.S. in M.E., 1920, M.S. Ind. Ed. 1926,
Colorado State U.; B.S. in C.E., 1950
Missouri School of Mines

is designed to afford a thorough training in the fundamental principles upon which the practice of Civil Engineering is founded. It is the aim of the department to prepare its graduates for technical and administrative positions in the promotion, design, construction, operation, and management of engineering projects.

of Mines; M.S.E., 1928, Michigan.

Instructor P. Brown explains Electronics experiment

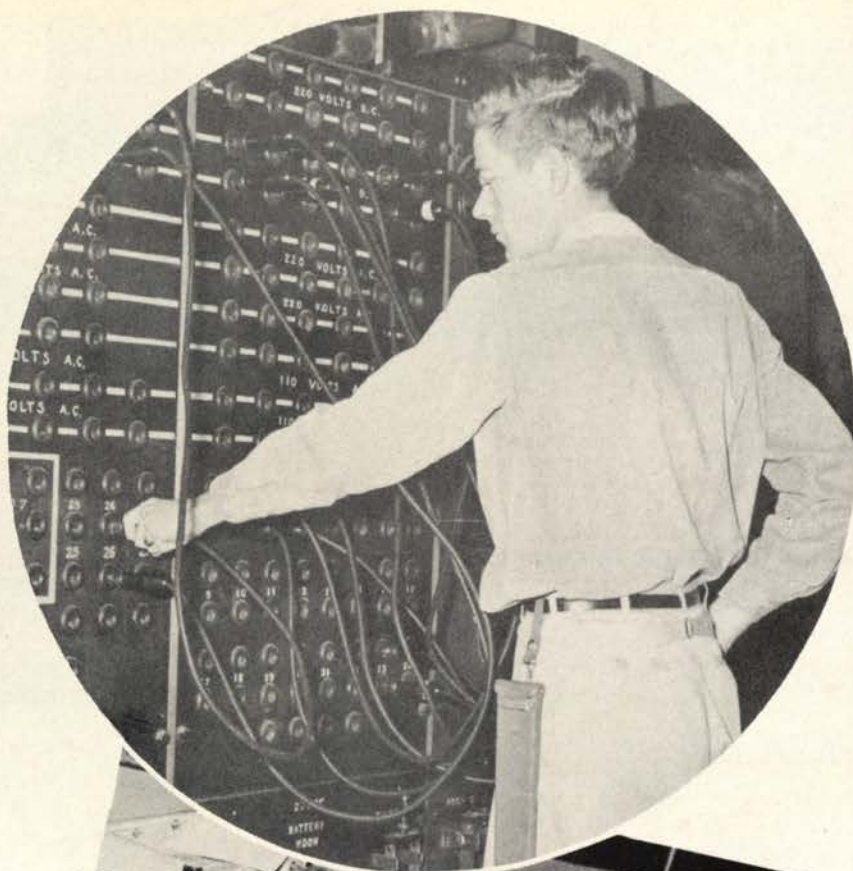

Prof. Tingley checking the wiring

Electrical Engineering Department

necessity filled with branches and sub-branches of specialized types of information. Also, training in fundamental principles related to the four main divisions of electrical engineering is provided by the curriculum. These may be classified as; manufacturing of electrical equipment, electric power service, communication systems, and electronics.

Within these main divisions of Electrical Engineering, there is a set of basic fundamentals upon which all the branches of the profession are predicted. Therefore, the Electrical Engineering Curriculum at the Missouri School of Mines comprises a course of study which combines the necessary fundamentals with a desirable set of non-technical courses and a series of technical electives to make possible adequate training for entering any branch of the profession.

Above - Plugging into power

Below - Rheostat adjustment

Geology Department

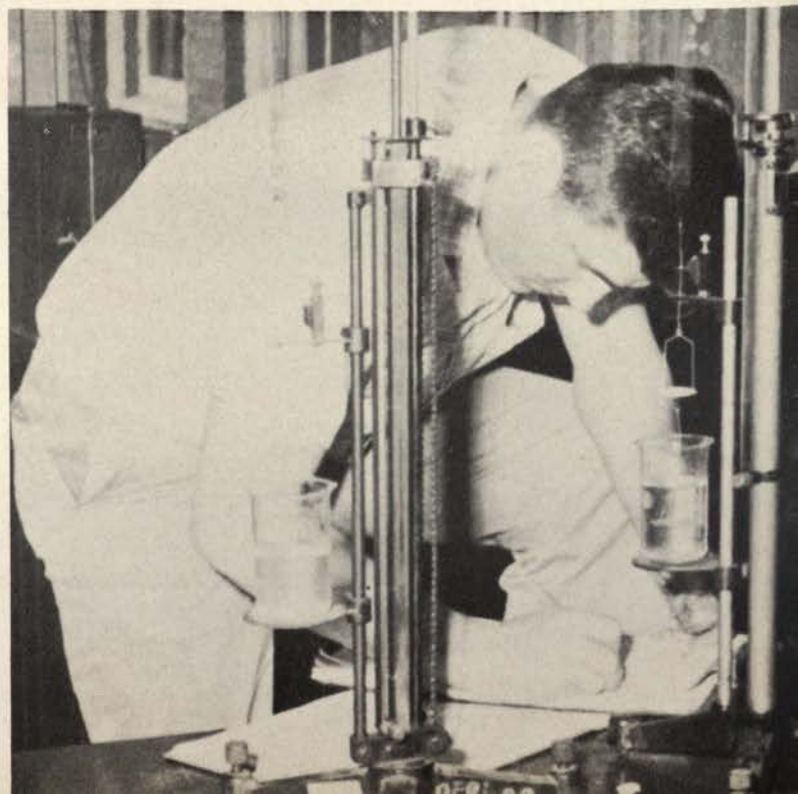

Geology is the fascinating study of the materials of the earth; fossils, minerals, rocks; their composition, properties, arrangement, manner of occurrence and uses. Geology is a broad diversified field. It includes such subjects as paleontology, stratigraphy, physiography, mineralogy, petrology and economic geology. It is an applied as well as a pure science. The scientific investigator as well as the practical man is needed. Yes, one will find men of diversified interests and specialties in the field of geology. Yet, they have one common characteristic; a deep interest in the materials of the earth.

A broad basic training in the fundamentals of biology, chemistry physics, and mathematics is required by geology. The growing import-

Gold?

Finding Specific Gravity

Geology Department

ance of these basic sciences is apparent as geology is turning from a qualitative science to a quantitative one. A command of the English language as well as a knowledge of basic economics is necessary and desirable since a geologist must translate and communicate his findings to others in more easily understandable terms.

The curriculum in Science-Geology Major at the School of Mines is designed to give training in basic subjects as well as geology. Geology students will find it advantageous to continue their studies through the Master's degree and those who wish to specialize should plan a Doctor's degree. Both of these advanced degrees in geology may be gained at the Missouri School of Mines. Those who obtain these degrees will find wide employment opportunities and starting salaries will be proportionally better.

Mechanical Engineering Department

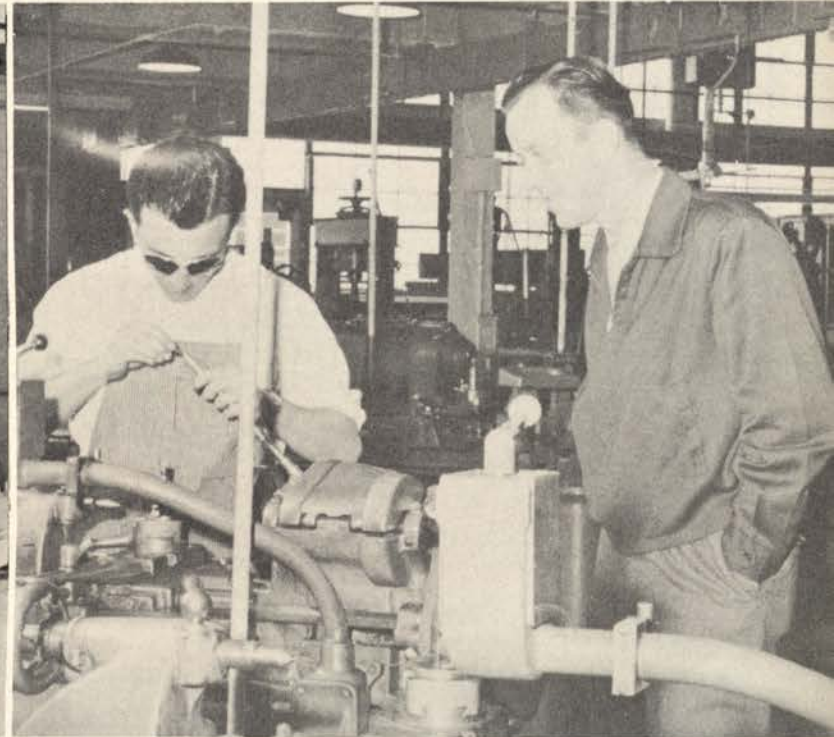

Mechanical Engineering embraces the sciences of generating, transmitting, and utilizing mechanical power, and the production of tools, machine tools, machinery, and their products. In addition to the design, research, development and investigation required to create these services and products, Mechanical Engineering includes the coordination of material, natural resources, manpower, and money for effective and economic production.

mendous strides have been made in the nuclear energy field, but the best efforts of the Mechanical Engineer will be needed in order to bring the many blessings of this new power source into reality.

Being obviously too extensive to cover thoroughly in all its divisions in four years, the university curriculum for Mechanical Engineering students is therefore perhaps more fundamental

Prof. Remington illustrates

Prof. Schowalter watches machining operation

Vast contributions in the fields of power and machine design have been made by the Mechanical Engineer. There are excellent opportunities for Mechanical Engineers in all parts of the country with every kind of manufacturing organization and power company. New horizons are continually opening for young men with this background. The minds of design and development engineers are being challenged by new prime movers, such as, the gas turbine. Tre-

and less specialized than other engineering curricula. In many respects, this is greatly to the advantage of the student as it enables him to choose his option later in his college course or to change his professional objective to suit the trend of industrial progress. The Department, equipped with one of the finest Laboratories of its kind, strives to train and instruct students to meet the high professional standards required of technically trained men.

Metallurgical Engineering Department

ALBERT W. SCHLECHTEN
Department Chairman
Professor of Metallurgical Engineering, 1946. B.S. in Met. E., 1937,
Montana School of Mines;
D.Sc., 1940, M.I.T.

That branch of engineering concerned with the extraction of metals from their ores by milling, smelting, the forming of these metals into alloys, and their adaptation to man's uses, is called Metallurgical Engineering.

The demand for metallurgical engineers is increasing as the ores to be treated become more complex, and as a greater variety of alloys are used commercially. The variety of openings for a metallurgical engineer means that there are no particular requirements so far as physical vigor temperament are concerned. It is necessary first that the prospective engineer have some competence at mathematics. In addition to this, the student in Metallurgical Engineering must acquire considerable training in both physics and chemistry. His preference between these two subjects will probably determine what branch of metallurgy he favors.

To meet these needs, the Department of Metallurgical Engineering at the School of Mines employs competent faculty members, and laboratory facilities are provided for mineral dressing, extractive metallurgy, physical metallurgy, and foundry. All stu-

Prof. Legsden explains lab procedure

Dr. H. R. Hanley

Dr. T. M. Morris

Dr. W. A. Frad

Metallurgical Engineering Department

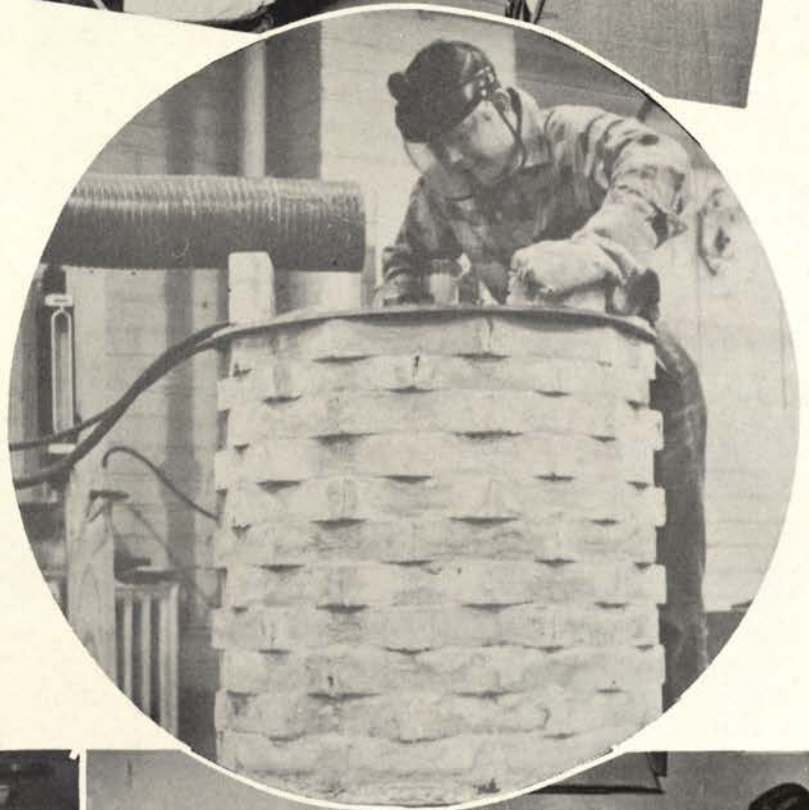

dents take some work in each of these areas, and the studies are so arranged that there is opportunity for specialization in the senior year.

The Met Department is not only one of the first departments established on campus but also one of the largest in the United States. In addition to its regular curriculum, a Nuclear Engineering option is offered to combine with metallurgy training in the most recent developments in the study of metals and atomic structures. Also, highly specialized laboratory equipment is available for research which is carried on primarily by graduate students. The opportunities in Metallurgical Engineering are excellent and there is every reason to believe that this will continue in the future.

Mining Engineering Department

Mining Engineering is best defined as the application of science to the discovery and exploration of mineral materials in the earth's crust. Such materials include metallic minerals, non-metallic minerals, coal, petroleum, and natural gas. These substances are either solids, or liquids and gases.

Corresponding to these two general classifications is the division of the fields of study in Mining Engineering. Petroleum Engineering, the division of study concerned with the discovery and exploration of petroleum and natural gas, provides a Geology Optional for students desiring emphasis in the geological aspects of petroleum production. Mining Engineering, the division of study concerned with the discovery and

Above - Viscometer test

Below - Gasoline testing

exploration of solid materials, likewise provides a Geology Option for those students desiring emphasis in this phase of mineral engineering.

As a means of supplementing effective research studies and instruction in its cur-

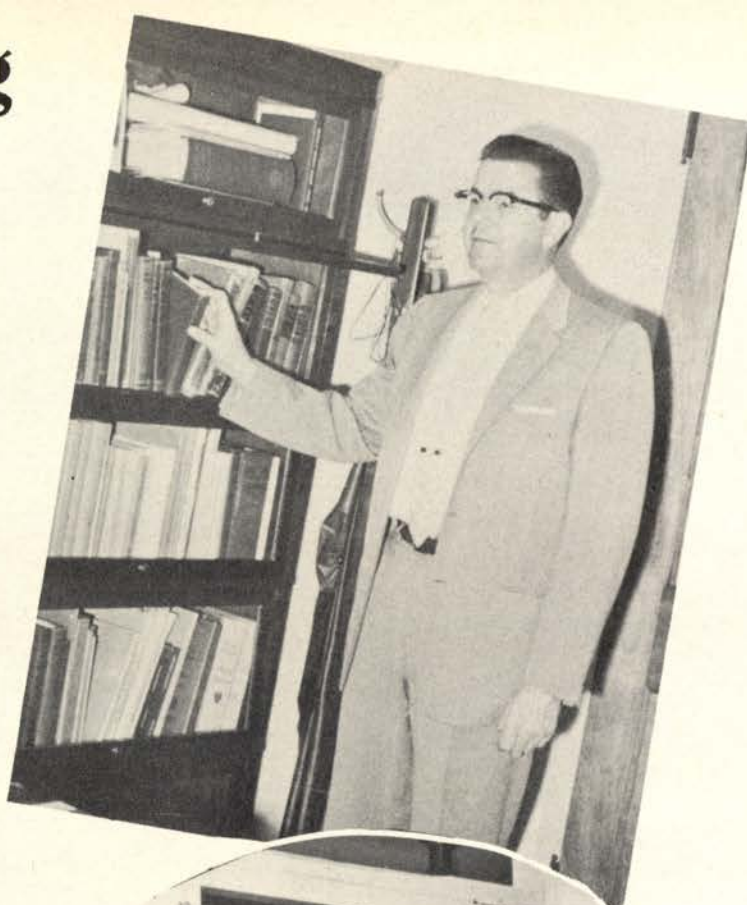

Mixing mud

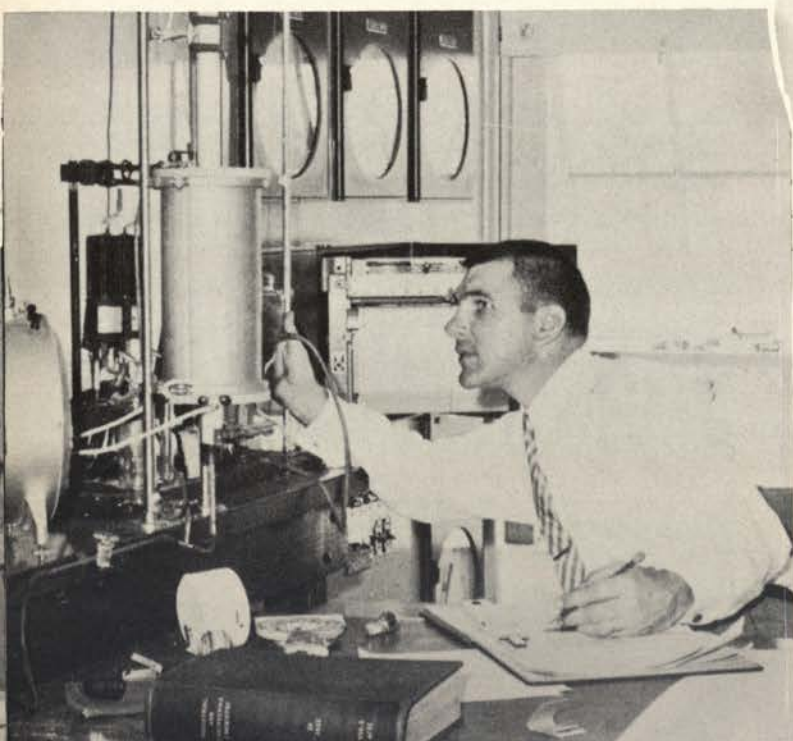

Mining Engineering Department

ricula, the Department operates an experimental mine and materials a display room which demonstrates various types of equipment and apparatus.

Graduate study and research programs of both fundamental and applied nature are offered by the Department in all the divisions for students who desire to work toward a Master's or Doctor of Philosophy Degree. Mining engineering, Petroleum Engineering, and their Geology Options offer very fertile fields for advanced study and research.

Illinois.

Dr. Lund, Dr. Rivers, and Byrnes

Experiment in optics

Physics Department

interest in, and a special aptitude for Physics, mathematics, and other sciences are likewise essential. More important than any of these are character and personality which will carry the student through the long, hard training period and permit him to find pleasure in work of a most exacting sort.

At the School of Mines and Metallurgy, training is offered leading to the Bachelor's degree in the Science curriculum with a major in Physics, and also graduate work leading to the Master's degree. Emphasis is placed upon the fundamental principles of physics and thorough laboratory training. Upon completion of his basic requirements in the Physics Department, the student may consider himself entirely capable of obtaining an engineering degree.

Checking the focal length

Engineering Drawing Department

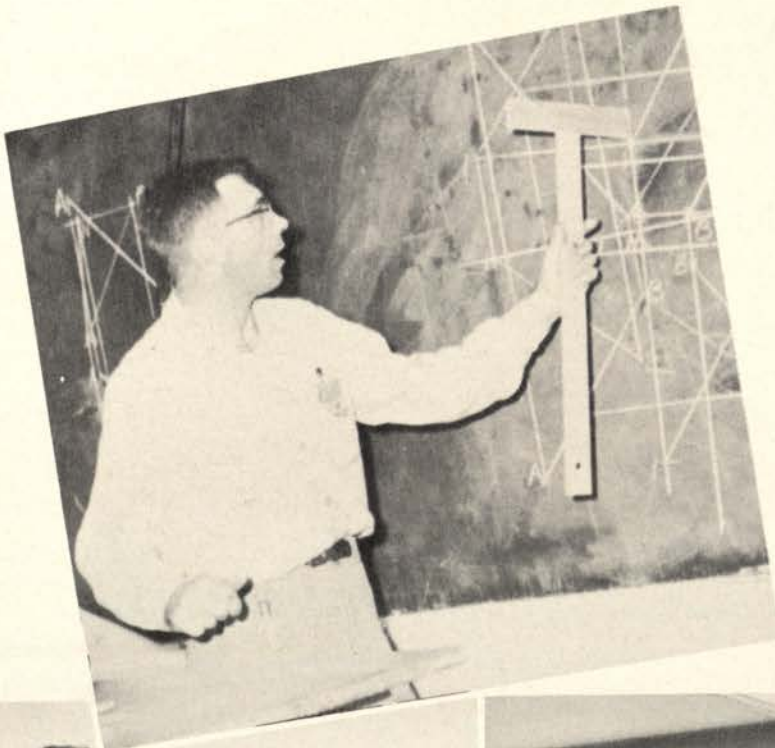

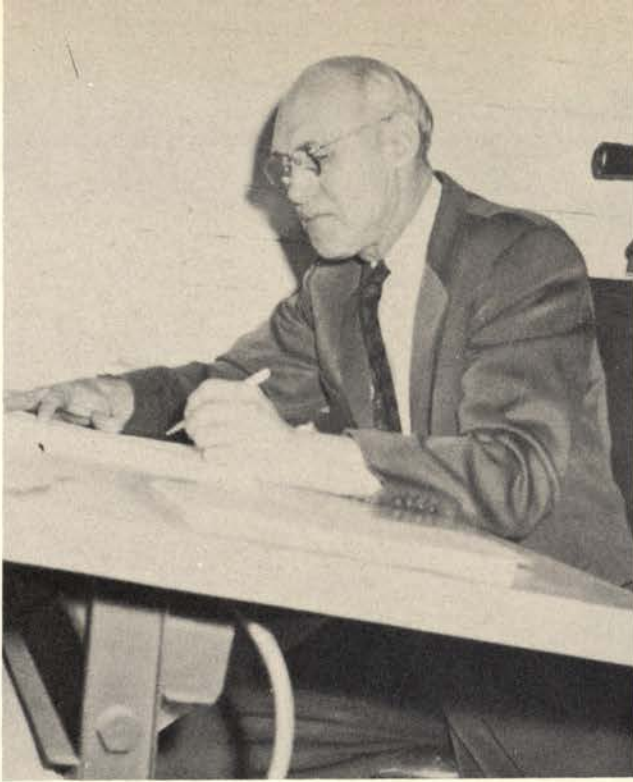

Often called the graphic language of the engineer, Engineering Drawing is an important requirement for all who might be connected with or interested in technical industry. This makes it a basic part of the engineering field, worthy of the engineering student's interest and application.

One of the best means of conveying new ideas is through a pictorial or graphical representation. Thus, the adaptability of engineering drawing is unlimited. From the of the Structural Engineer to the wiring diagrams of the Electrical Engineer, drawing acts as a means of design, assembly, and description.

It is the aim of this department to present the underlying principals concerned in drafting work and at the same time to give enough practical drafting work to affix these principles in the student's mind. With this foundation of definite recognized procedure in presenting graphical representations, the student should be capable of creditable professional drafting work.

Burns answering question

Humanities Department

Humanities is the science of man, and as such, it bridges the immense gap between the technical and cultural aspects in his way of life. It is this facet of learning that completes and brings to full maturity the education of the modern engineering student. Yes, Humanities is the mediator between the engineering field and the non-technical everyday world.

Realizing the tremendous importance of the need for a practical and cultural outlook on life, all engineering departments on campus require at least twelve credit hours of courses in English, six credit hours in Economics, and three credit hours in American history. In this manner, the engineering student receives a more liberal and humanized preparation for the later work in his chosen field.

The Humanities Department is a necessary and important link in the effort to correlate the engineer's technical education with the practical problems to be found in industry.

Running off quiz

Mathematics Department

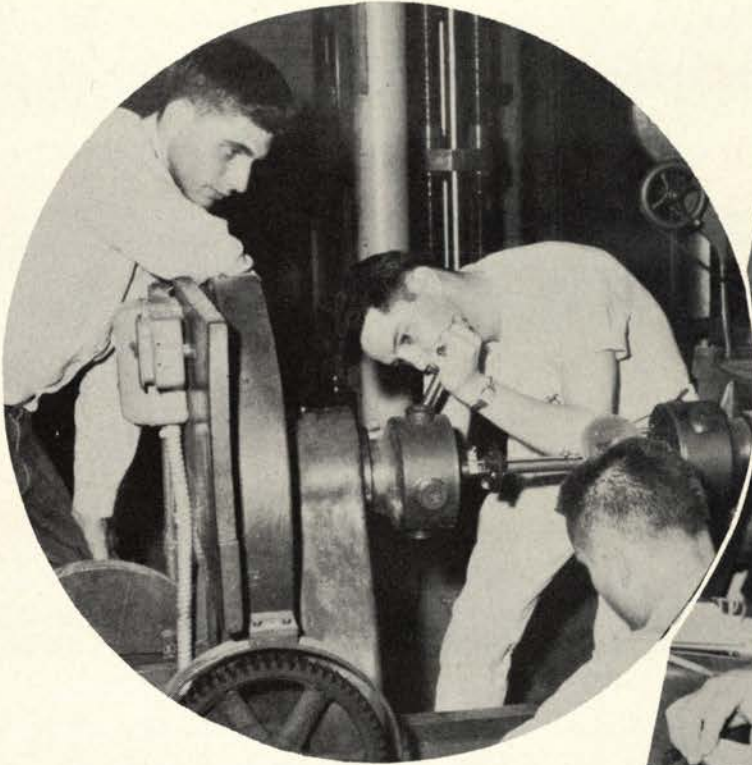

Mathematics is truly the backbone of modern engineering study. Without a thorough understanding of the fundamental principles of mathematics, it would be impossible for the student to meet and cope with the problems of engineering.

Development in Math at the School of Mines begins with the basic algebra and trigonometry course. From this beginning, the student continues into higher mathematics, matching his wits with analytical geometry as well as differential and integral calculus. At this point, the student sometimes need go no farther, depending upon the department in which he is enrolled. Yet, for those students who wish to enhance their mathematical knowledge, the Math Department has many valuable advanced courses of study to offer.

Mechanics Department

Torsion test

ROBERT F. DAVIDSON
Department Chairman
Professor of Mechanics, 1946, 1953.
B.S. in C.E., 1941, M.S. in C.E., 1949,
Missouri School of Mines.

A necessary and useful portion of every student's curriculum, Mechanics is the science that deals with the effect of forces on bodies. The aim of this department at the School of Mines is to tie together the principles of pure sciences such as physics and mathematics to practical advanced courses of construction and design taught in higher courses of the student's curriculum. Because of the value of the principles learned and the practice gained, students are required to take certain courses. "Statics" and "Mechanics of Materials" typify the array of courses. The obvious importance of the Mechanics Department insures that no student ever passes through the School of Mines without venturing into its realms.

Below - Pass in Review

The Reserve Officer Training unit can be justly proud of its work at the Missouri School of Mines for it not only is the largest of its kind in the United States but also one of the highest ranking in the country.

Graduates from M.S.M. rank in the upper third of all engineering cadets in the nation. This can only be attributed to the course of instruction pursued by the officers and enlisted men in charge of this department. Four semesters of basic military training are required for all students not having completed their service obligations. When a student completes his basic training, he may upon application receive advanced military training, consisting of four additional semesters of schooling in military science. At the end of this time and upon graduation, the student is commissioned a Second Lieutenant in the United States Army Reserve.

Summer Camp instruction

Military Department

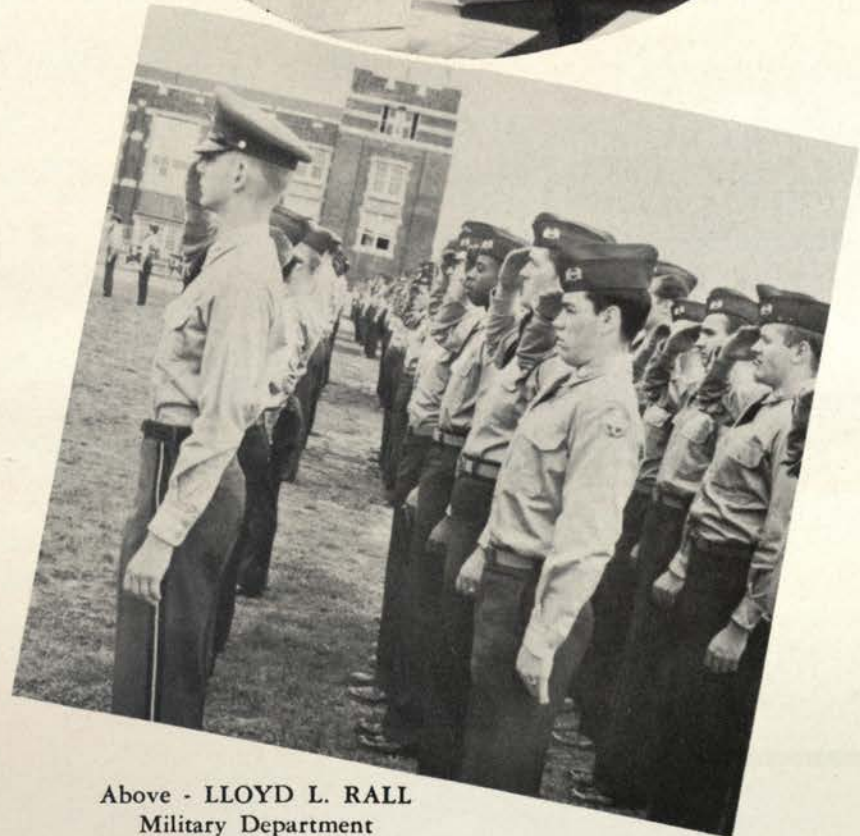

First Row - Evans, Roeth, Schafer. Second Row - Bradbury, Elser, Jones, Hess. Third Row - Clifton, Laffey, Bray, Walher, Cogley.

The Military Department holds as its major aim, the development of its cadets in the qualities, initiative, and integrity, while at the same time training them as capable officers ready to take their place in the Army Corps of Engineers. Despite the large number of cadets enrolled in this training, the Military Department is carrying out its aim remarkably well.

First Row - Norton, Fuller, Medsger. Second Row - Stewart, McGuire, Reagan. Third Row - Nowak, Knox, Ayers, Barrand.

Jackling Gym

Van Nostrand

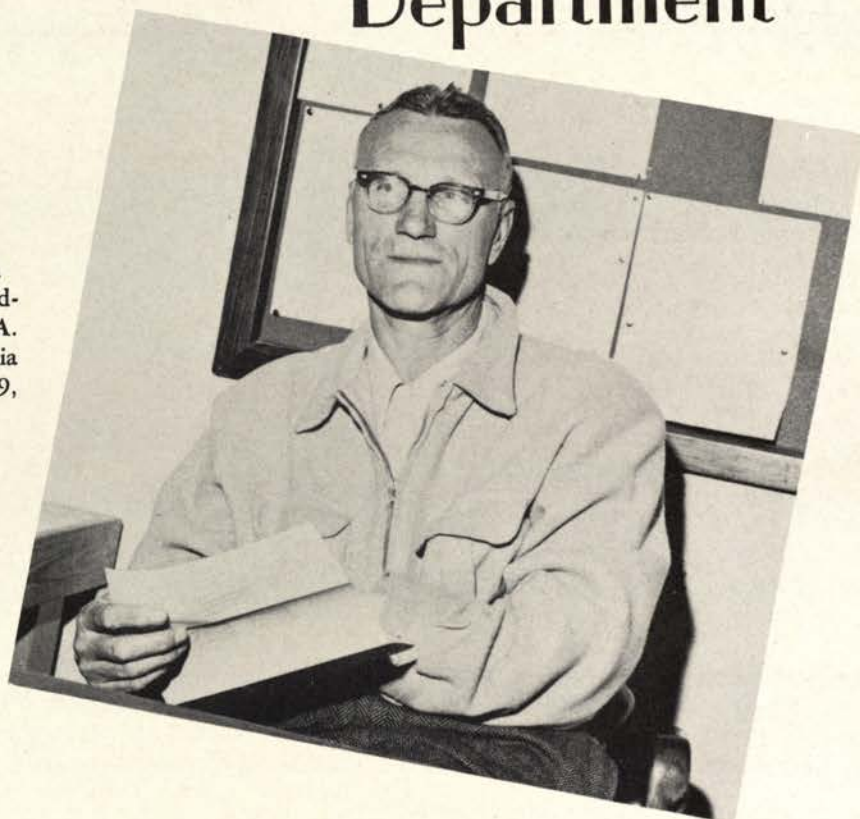

Coach Van Nostrand deserves to be highly congratulated for the outstanding job he has done in coaching M.S.M.'s excellent swimming teams. His skill and energy have brought many records to our campus.

VAN NOSTRAND, BURR ROGER, Instructor in Physical Education, 1953. B.S., 1942, Southwest Missouri State; M.Ed., 1952, Missouri.

Athletic Department

GALE BULLMAN
Department Chairman
Professor of Physical Education, 1937, 1949. A. B., 1925, West Virginia Wesleyan; LL.B., 1929, Washington.

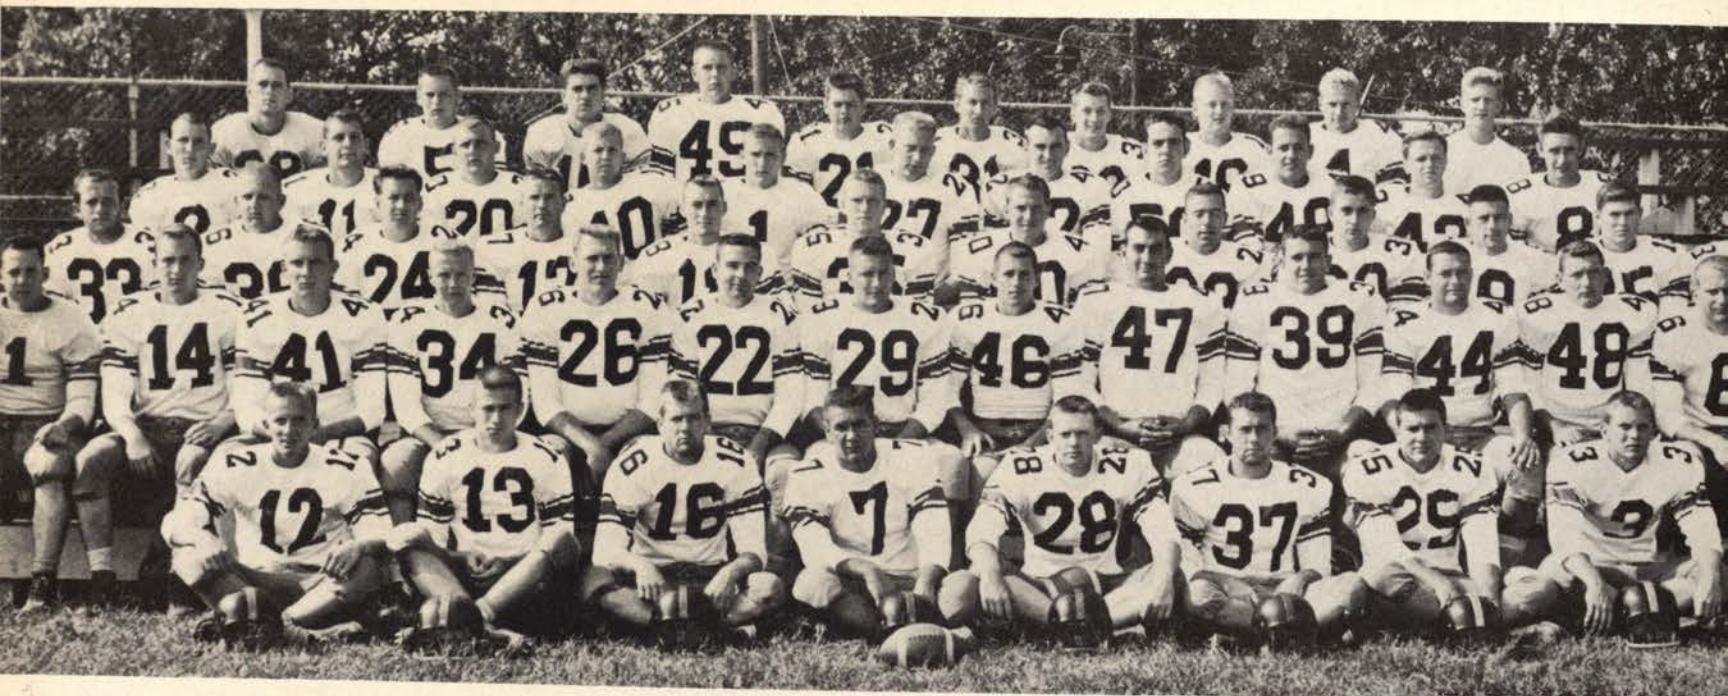

Completing his twenty-second year at M. S. M., Gale Bullman is a man who deserves to be highly commended for the outstanding job he has done for the Miners. Having been an All-American end and playing pro ball, it is easy to see why he now serves as head of the physical education department.

A terrific coach and a real pal to all who know him, Dewey Allgood has been doing an excellent job for the past seven years coaching basketball; devoted to the game and possessing formidable skill, he is a real sportsman and valuable asset to the school.

ALLGOOD, DEWEY, JR., Associate Professor in Physical Education, 1950. B.S., 1947, North Dakota State; M.A., 1949, Colorado State.

LEFT TO RIGHT, FIRST ROW: Wheeler, Whitehair, Allison, Varga, McPherson, Hill, Sullivan, Parker. SECOND ROW: Un-identified, Booth, Klohr, Wilson, Northrup, Jones, Englehardt, Boren, Boyett, Agers, Calvin, Wells, Flood. FOURTH ROW: Kennedy Hillmeyer, Marble, Schanlader, Cooper, McCaw, Cooke, Gay, Solimine, Singer, Avery. FIFTH ROW: Fuller, Meier, Schooler, Moss, Ryce, Hafeli, Farnham, O'Mealy, Peterson, Albert Bolon.

Still going

Football

Football

The opening game of the season was played in Tahlequah, Oklahoma against the Northeastern Oklahoma Redmen. The first half of this game looked very promising for the Miners as they took a 13-12 lead, but in the second half the highly favored Redmen rallied to hand us a final score of 33-13, their favor.

The following week the Rollamen took on a strong Carthage team in a home game. The Illinoisians made a desperate attempt to keep the brilliant Miner squad from running away with the game, but they had a hold of a tigers tail. The "Injuneers" shutout the Carthage team with a final score of 34-0.

The Miners then met their traditional yearly rival, Washington University, at their home field in St. Louis. The Miner squad put up a good fight but lady luck had turned her back on them. In the second half of the game the Miners came to life and Ray Parker made the touchdown and also the P.

A.T. The Rollamen tried hard but couldn't get across the score-line again. Final score 14-7, Washington's favor.

The Gorillas from Pittsburg, Kansas came to Rolla and handed the Miners their third non-conference defeat. Parker made the only Miner TD, but was unsuccessful in the P.A.T. kick. The Gorillas climbed over the Miners with a final score of 14-6 their favor.

The Miners met the Warrensburg Mules in Rolla for the first conference game. The passing of McPherson and the running of Parker and Allison were largely responsible for throwing the Warrensburg team. The Mules had a weak kick as they lost 47-6.

The MSM team journeyed to the Maryvilles home field for the second conference game. The end of the game showed the Bearcats treed by the victorious Miners, final score, 37-21.

The Homecoming game which was scheduled against Cape Girardeau was postponed by them, because Asian flu had stricken several of their team.

Co-Captains Varga and McPherson

Football

The Miners scheduled a game with the Emporia Hornets for Homecoming as a fill in for the Cape Indians. The Hornets sting was not felt by the Miners as they ran over the Emporia team to victory.

The MSM Men traveled to Kirksville to take on the Bulldogs on their ground. Lady luck again played a major part in the game by bringing bad weather and making a swamp of the ball field. The Miners, not used to wading in mud, came out second best to the Bulldogs. Final score was 12-0.

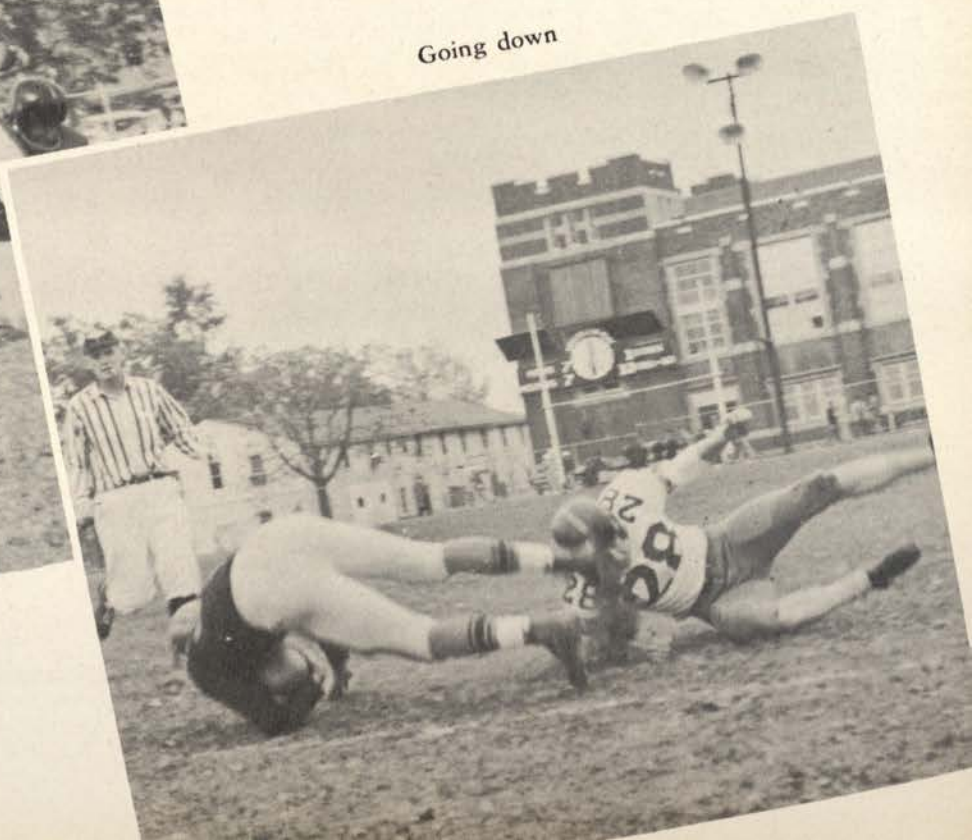

The Southwest State Bears were host to the Miners in Springfield for the second to last game of the season. Although the Miners superior playing dominated the game, the only score was made by Parker, with the first field goal of his career. Final score 3-0, Miners on top.

Tearing up the turf

No way out

Going down

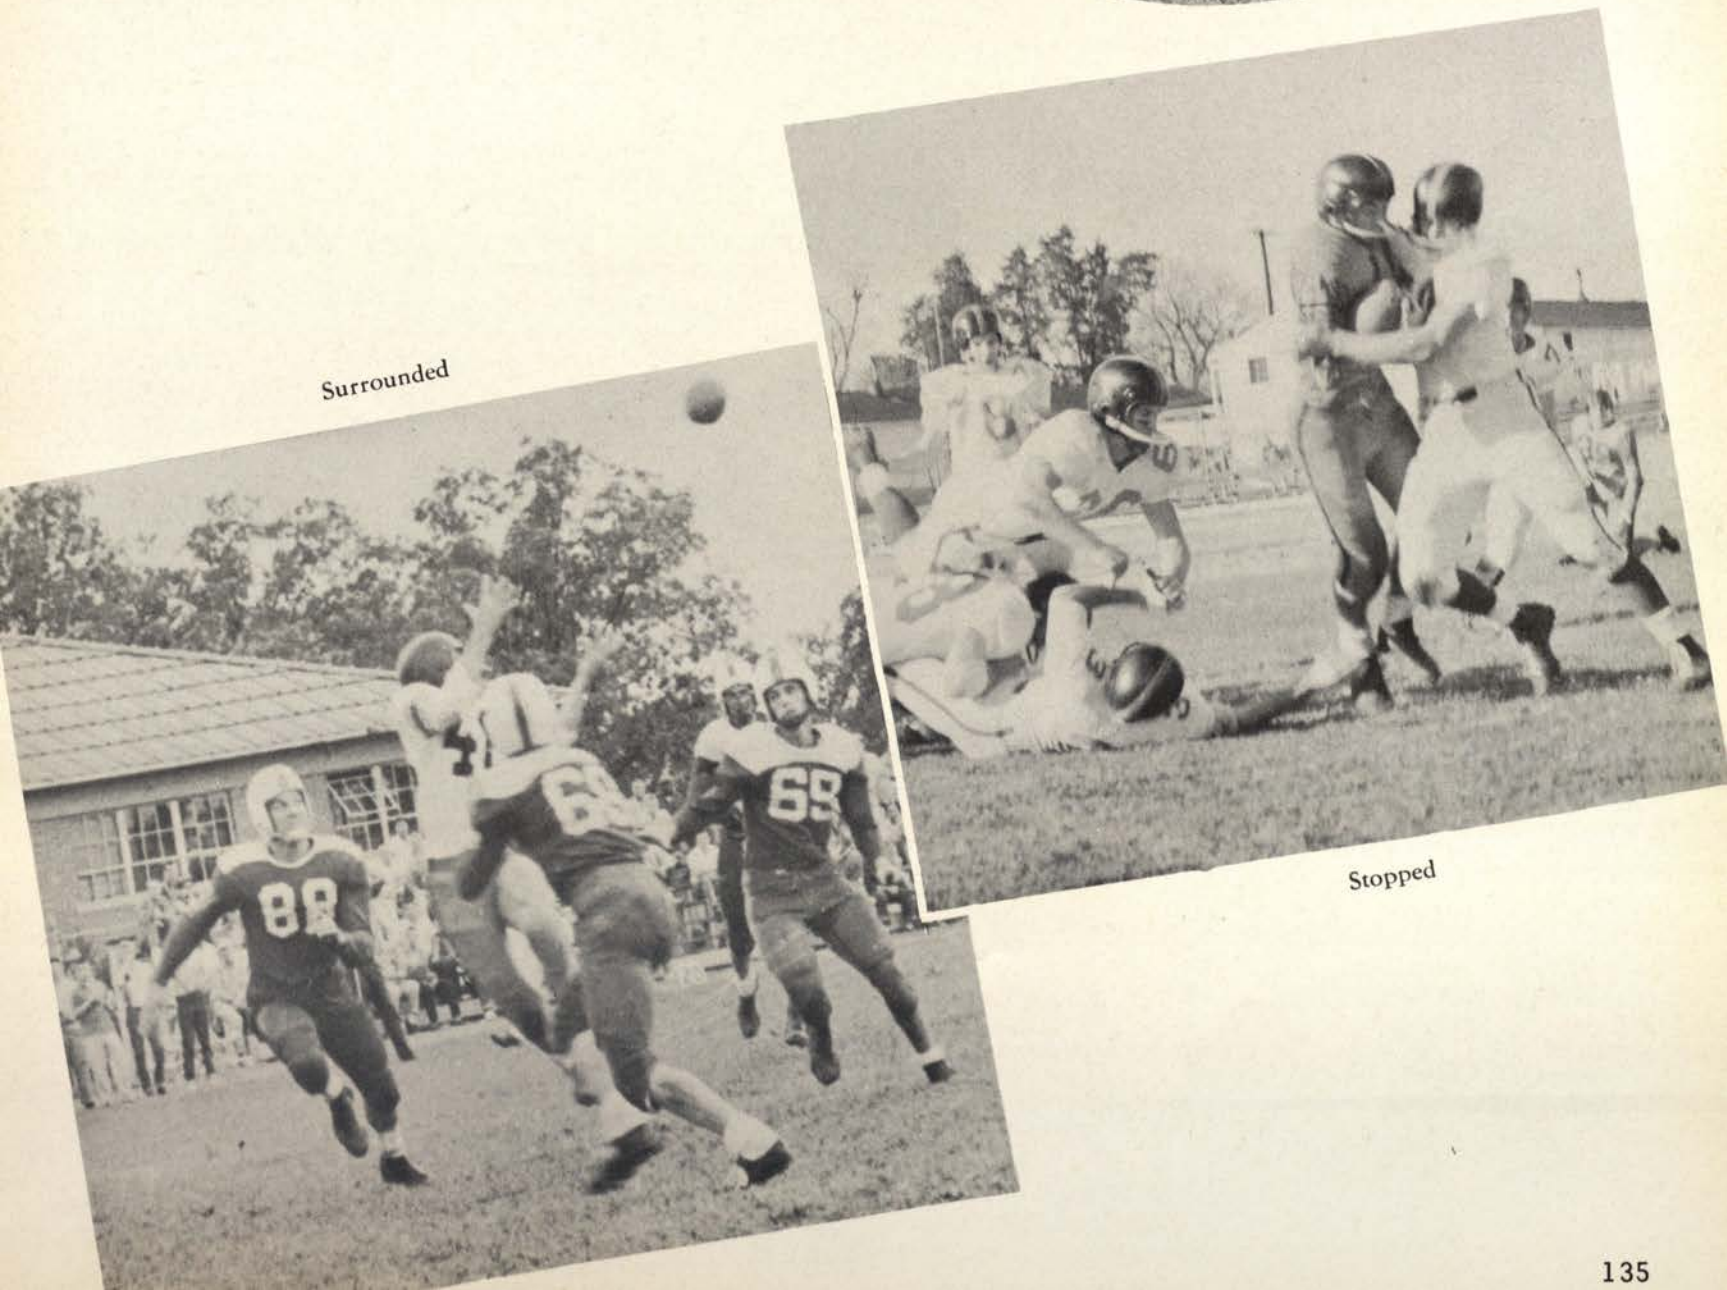

Football

The MIAA championship was lost to the Cape Indians in the last conference game of the season. Several of the MSM football squad were out of playing because of flu but being great sportsmen the Miners played anyway. Final score, 32-0 Indians victory.

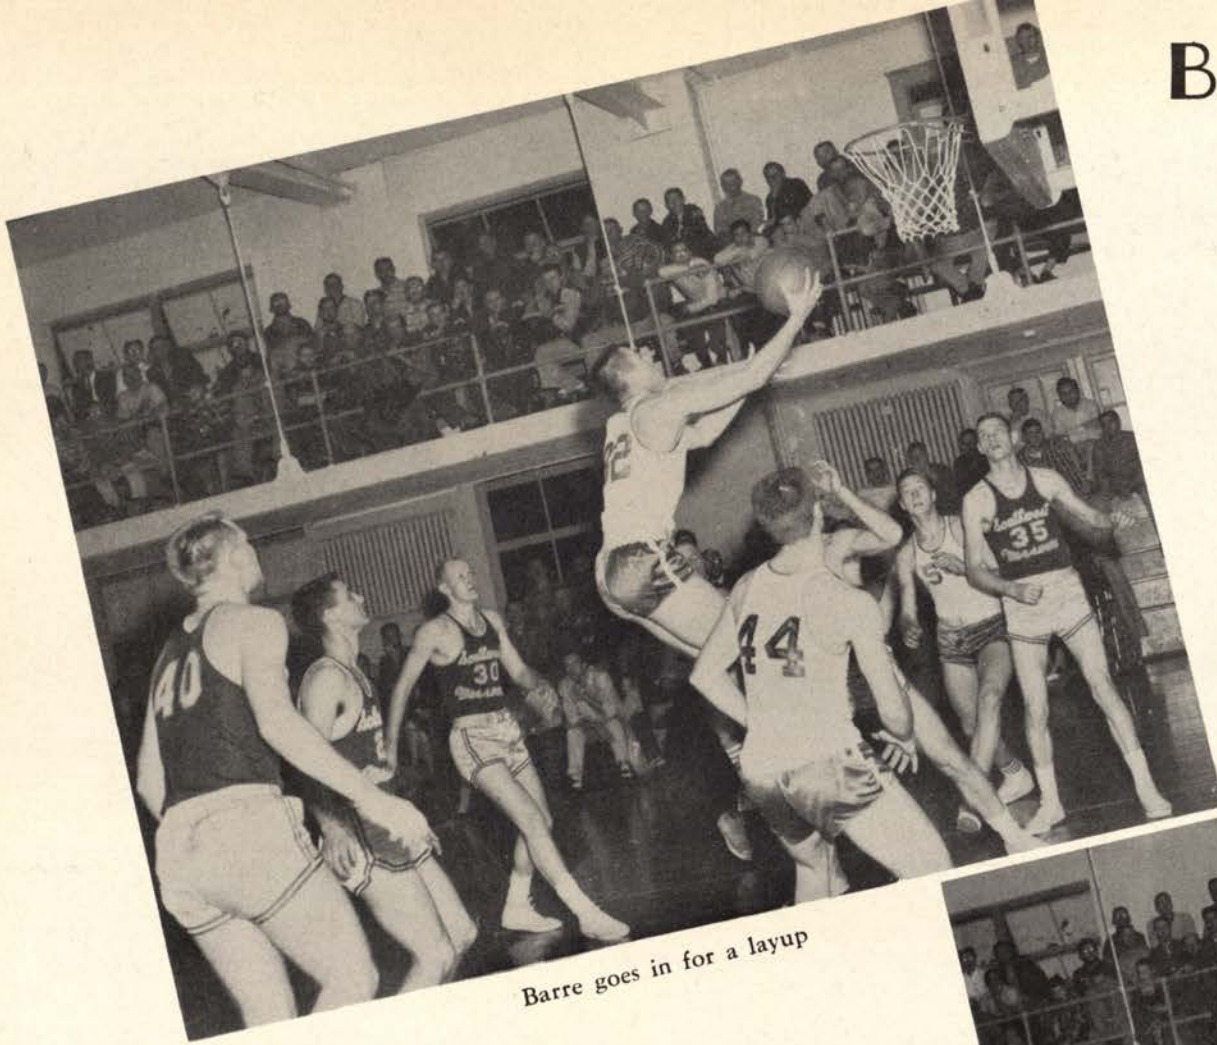

Five Miners were named to the first all conference team. William Englehardt, William Varga, Donald Agers, Perry Allison and Ray Parker were on the first team. John Jones, Wallace Northrup and Edward McPherson were on the second all conference team.

Miners won 69-62. The game with the University of Tennessee at Martin, Tennessee December 21, proved to be a hard 79-55 defeat for the Miners. The roundballers from Rolla were hopelessly outclassed.

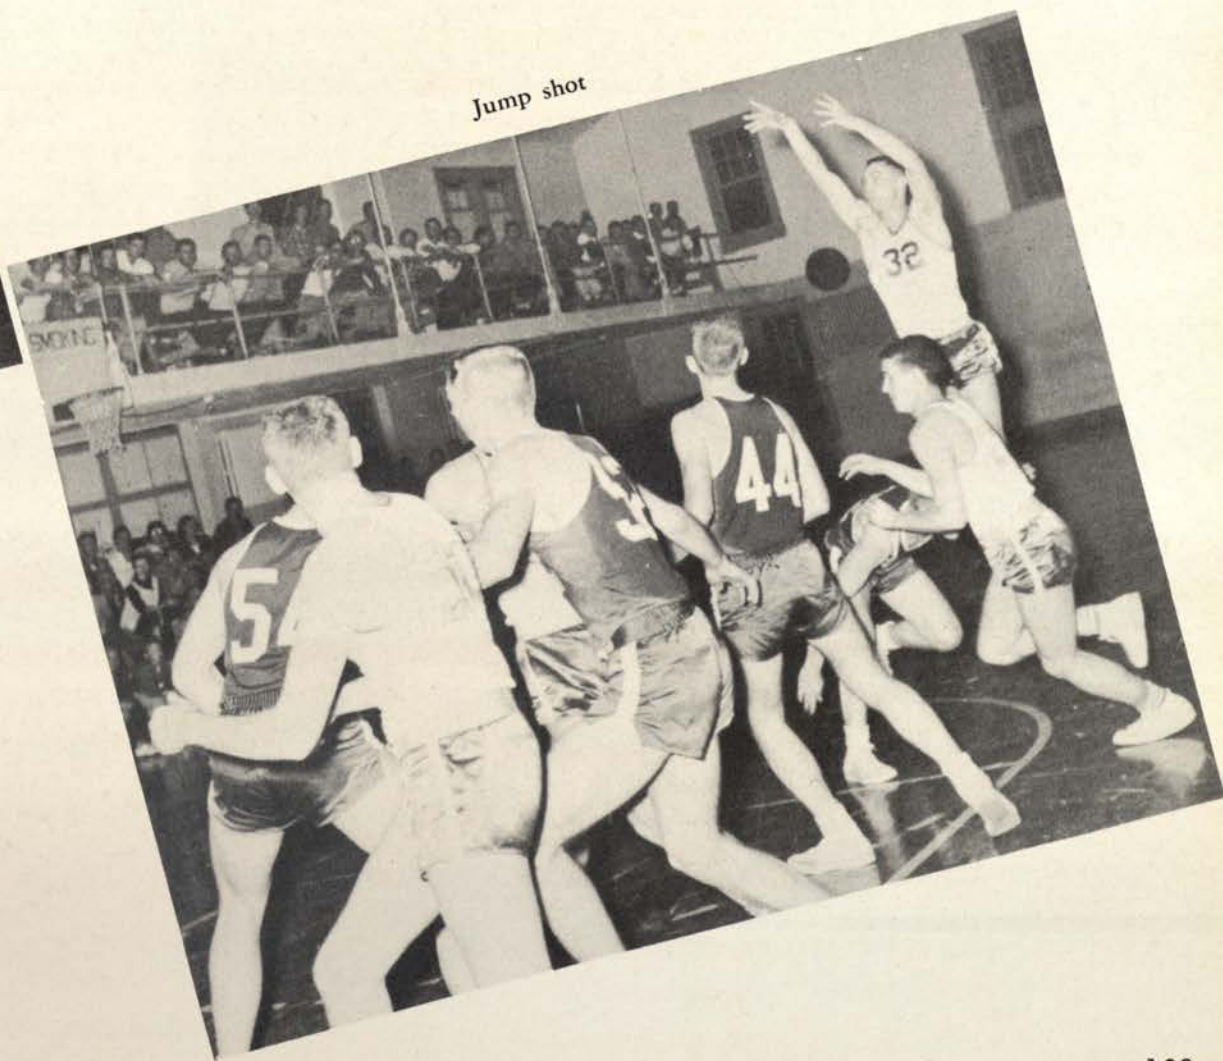

The team by far played their best game of the season on January 8, although losing to Cape by the score of 76-68. John Sturm was high scorer of the game with 27 points. The basketball game with Kirksville January 11, ended in a heartbreaking 8 point loss for the Miners. At the half the Miners with 30 points led Kirksville by 5. The Kirksville Bucketmen rallied in the second half to win the game 62-54.

Basketball

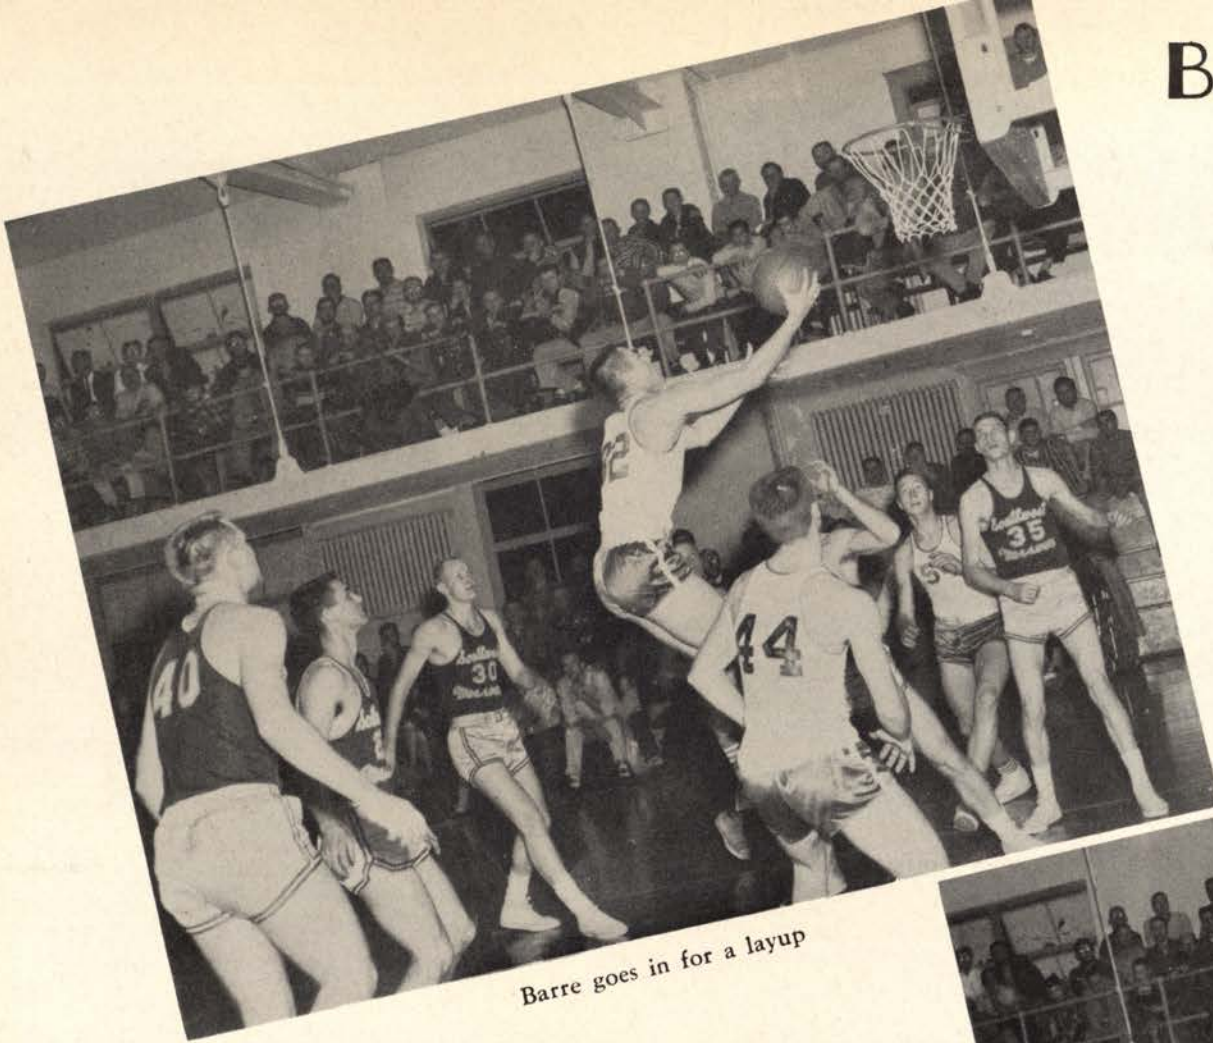

There's a Miner in the middle

The Miners finally won a game. Maryville fell beneath the Miner onslaught winding up on the short end of an 86-56 tally. Eleven days later, the Maryville team played host to the Miners, and evened the score by defeating the Miners 74-73. The MSM-Men received a terrific beating from the Kirksville Bulldogs the following day, being low on the scoreboard by thirty points, 91-61.

Swish

A weak Miner squad badly felt the loss of Sweeney and Jurenka as they were defeated by the Warrensburg Mules on February 8, by a score of 77-61. This was the teams fourth defeat in five conference games.

The hoopsters picked up their 4th win of the year as they defeated Washington University and broke a 25 game jinx. This is the first time a basketball team from Rolla has won over Washington University since 1942. Nick Barre led the scoring effort with 18 points. The spirit displayed by both the players and spectators was a big factor in the 60-55 victory.

In the last three games of the season the Miners were handed three defeats by Cape, 76-56; Springfield, 96-70; and Warrensburg, 87-73; to round out the 1957-58 basketball season.

One of the best seasons in the school's history was enjoyed by this years swimming team. The team had an 8 out of 10 record for the year and broke last years total points record. They also set four pool records and broke two individual scoring records. In the first meet of the season they lost to Kansas U. 25-61. The same weekend our fishmen defeated Ft. Hayes State 58-28. In their first meet of the season at home the Miners swamped St. Louis U. 63-23. In their next three meets the swimmers defeated Illinois Normal 59-27, Pittsburg State 54-32 and Westminster 63-21. The teams winning streak was stopped at five as Pittsburg State edged out our Miners 42-44. The team went on to win their last three meets over Indiana State 57-29, Louisville U. 47-39, and SIU 47-39.

Northrup heaves the javelin

Track

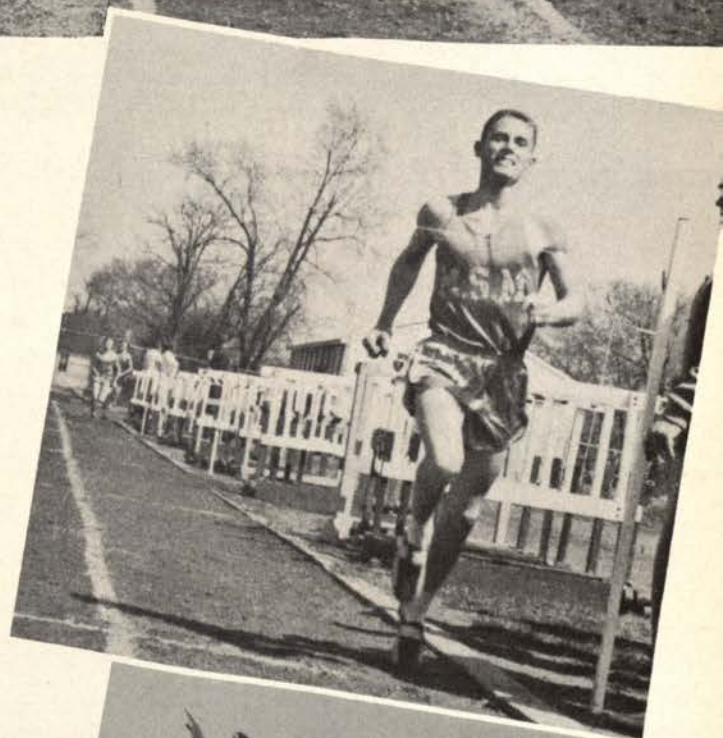

The M.S.M. cinder eaters got off to a rather slow start this year. In their first meet they locked horns with S.M.S. and were defeated by a score of $81\frac{1}{2}$ to $49\frac{1}{2}$. This is a bit slow compared to last years almost undefeated season, but it can be partially accounted for by the fact that the weather prevented the team from working out much before the meet. In their next two meets they cooled Drury and Westminister, but could manage no better than sixth in both the M.I. A.A. indoor and outdoor meets. The only first collected in these meets was by Nick Barre in the Pole Vault. Four men have distinguished themselves this season by setting new records in their respective events. Mike Vancil, who was also the top scorer, holds the school record in the two mile, Nick Barre in the pole vault, Don Agers in the discus, and Wally Northrup in the javelin.

Tennis

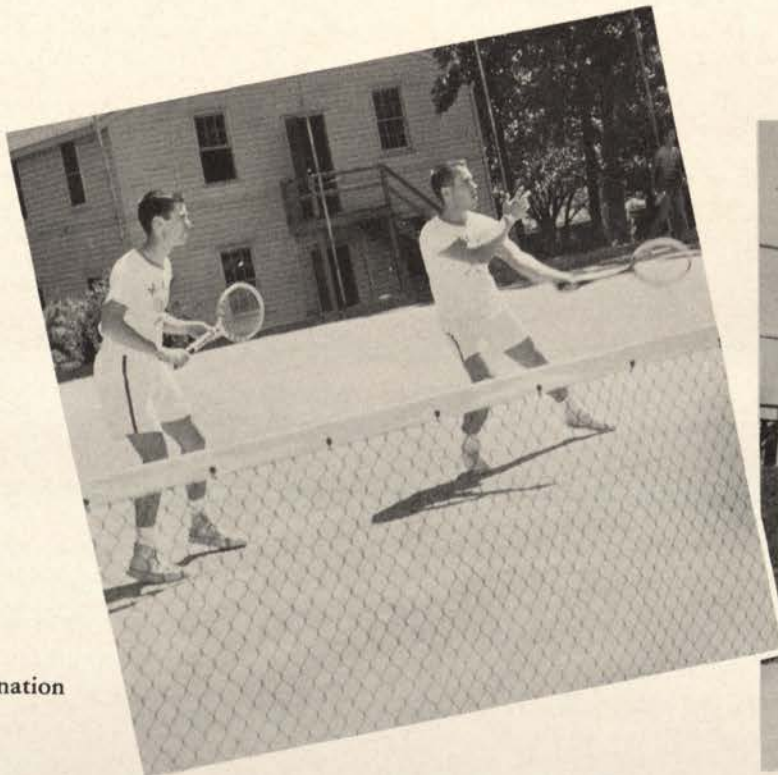

LEFT TO RIGHT: Ray Morgan, Wilbert W. Siesennop, Jan W. Coester, Paul B. Sisk, William Sutherlin, Kenneth J. Schmidt, Jack L. Scott, Lee C. Mueller,

The tennis team compiled a total of 3 wins against 5 defeats before going to the conference matches at Moberly, Mo.; where they took second place behind Springfield. In the first two matches of the season the team took a sound trouncing at the hands of SIU and SMS. Things looked better in the third match as the Miners lost to Westminster 4-3. The first victory of the

season came against Drury as the Miners won 6-1. The team lost another close one this time against Concordia 3-4, but came right back to defeat St. Louis U. 5-2. With Lincoln taking only one match the racket-men from MSM defeated them 4-1. To wind up the regular season the tennis team was beaten by Washington University 7-0.

Tennis scores:

Miners 1	SIU 6
Miners 0	Springfield 7
Miners 3	Westminster 4
Miners 6	Drury 1
Miners 3	Concordia 4
Miners 5	St. Louis U. 2
Miners 4	Lincoln 1
Miners 0	Washington U. 7

Golf

Left - Sand s chips

Right - Joslin goes out for a practice round

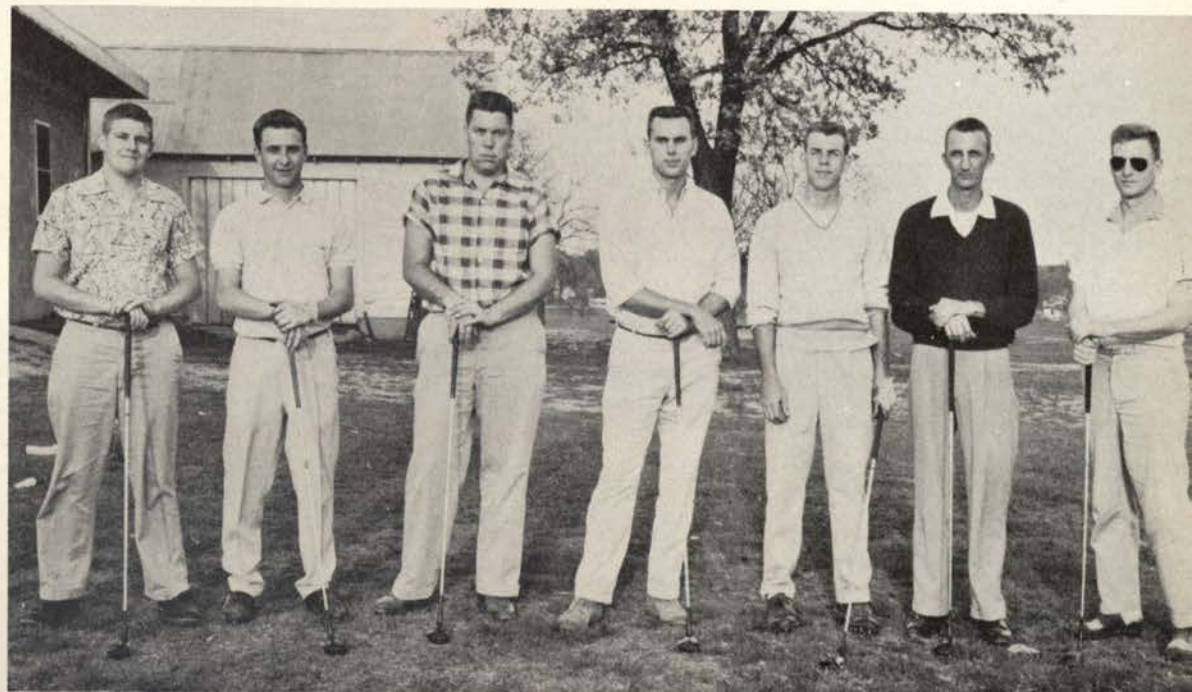

The golf team, led by old pros Burke and Joslin, wound up this year's season with three wins and two losses. In their first match they teed off against S.M.S., but wound up on the wrong end of a $13\frac{1}{2}$ to $4\frac{1}{2}$ score. Their next three matches found them defeating Drury, Westminster, and Concordia, with no sweat,

only to be edged out by St. Louis U. 18 to 13 in the last match of the season. Three new men Patton, Lester, and Mathews, added many an agile putt to give M.S.M. second place in the conference. The wickedest club on the team was swung by Burke who accounted for 160 of the teams total 650 points.

Golf scores:

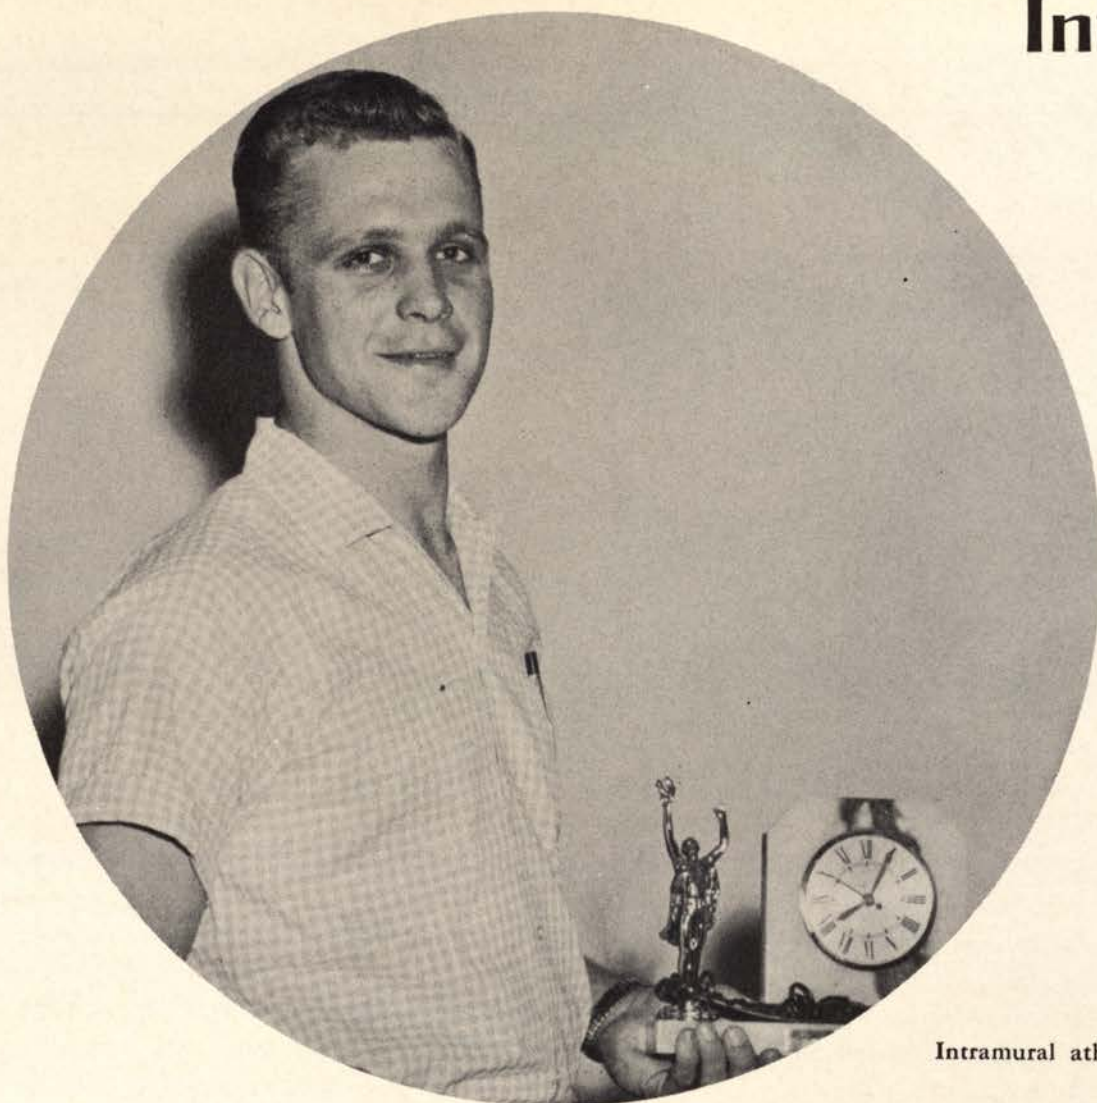

Miners $4\frac{1}{2}$	Springfield $13\frac{1}{2}$
Miners $12\frac{1}{2}$	Drury $2\frac{1}{2}$
Miners $10\frac{1}{2}$	Westminster $9\frac{1}{2}$
Miners 8	Concordia 4

Intramural

Intramural athlete of the year, Bert Houston

Intramural champs - Engineers Club

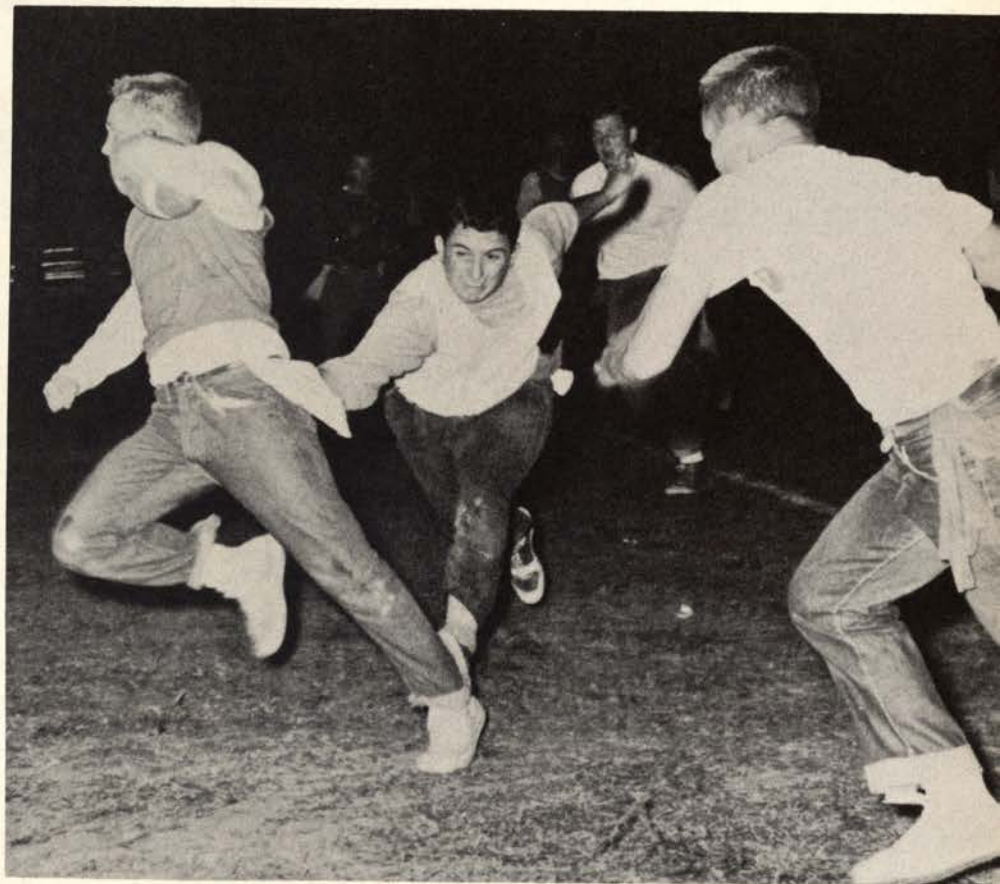

Consolation Trophy - Pi Kappa Alpha

Sports

Flag football, one of the most sought after championships in the intramural program, is reputedly the roughest athletic activity of the year. Won by accurate passing, fast running, and hard blocking, the winner's trophy is the most coveted on campus. Engineers Club, Theta Kap and Teke were the three teams to compete in the finals. Engin Club captured the first place trophy by defeating the Tekes and then Theta Kap in hard fought battles. Theta Kap took second place with Teke third.

Grab that flag

The 1958 intramural basketball play-offs found Triangle, Theta Kappa Phi and Engineers Club competing for the championship. After losing to Triangle in the first round of the double-elimination tournament, Theta Kap in a bid for a second crack at the basketball trophy was defeated by Engineers Club. The strong Triangle team captured the first place trophy by winning over Engineers Club. This put Engineers Club in second place. Theta Kap captured the third position.

Hard shot

Chuck Homan of Lambda Chi Alpha won this years grueling intramural Cross Country race. His winning time for the one and one-fifth mile course was 5:43. David Schimanski of Tau Kappa Epsilon finished second in the long grind. Again this year Tech Club took the honors in the Cross Country run as team champions. Tau Kappa Epsilon was the team runner-up. The Cross Country race is run each year at half time of the homecoming football game.

Winner crossing the finish line

Doubles Champs - Ross and Gunther

Quite a few teams were entered in the swimming meet this year making competition really rough. Sigma Nu showed its winning form of a few years back, when they won four straight championships, and edged out Triangle to win the title. The star performer of the meet was Jeff Goodell of Sigma Nu who set two pool records. Sigma Nu finished with 21 points to Triangles 19. The Shamrocks placed third.

Intramural

The Gunther brothers of Theta Kappa Phi stole the show in this years intramural table tennis competition. Don Gunther repeated last years outstanding performance and again emerged singles champion. Walter Rhinehardt of Baptist Student Union finished second. The second Gunther brother Jim, teamed up with Dick Ross to take the doubles championship for Theta Kap. Terry Kloher and Allen Pope representing Sigma Nu in the competition were runner-ups in the table tennis doubles division.

Timing the winner

Boxing and Wrestling Champs

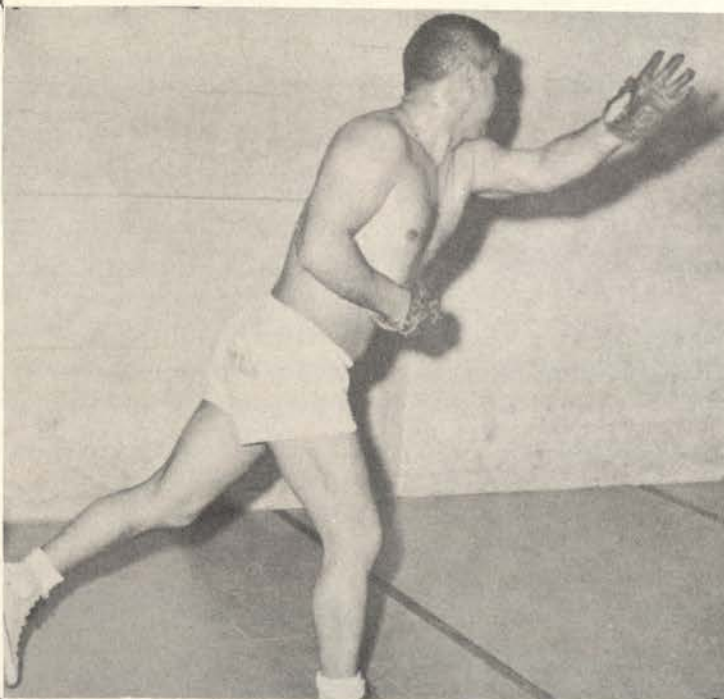

Sports

Tech Club, by winning first in the doubles division and second in singles again captured the handball title. Pi Kappa Alpha finished second and Theta Kappa Phi third. Don Link from Pi Kappa Alpha won first in the singles division over Hurlburst of Tech Club. In the doubles division Brose and Herrick of Tech Club finished first. This was their third undefeated season. The runners up were Varga and Brown from Lambda Chi Alpha.

Takedown

Sigma Nu repeated last years outstanding performance and again carried away the intramural boxing trophy. Engineers Club was a very close second and Pi Kappa Alpha finished third. Title winners in boxing this year were Day, Independents; White, Pi Kappa Alpha; Vancell, Engr. Club; Collins, Engr. Club; Adams, Tech Club; Kennedy, Sigma Nu; Lambkein, Shamrock; and Vickson, Theta Xi.

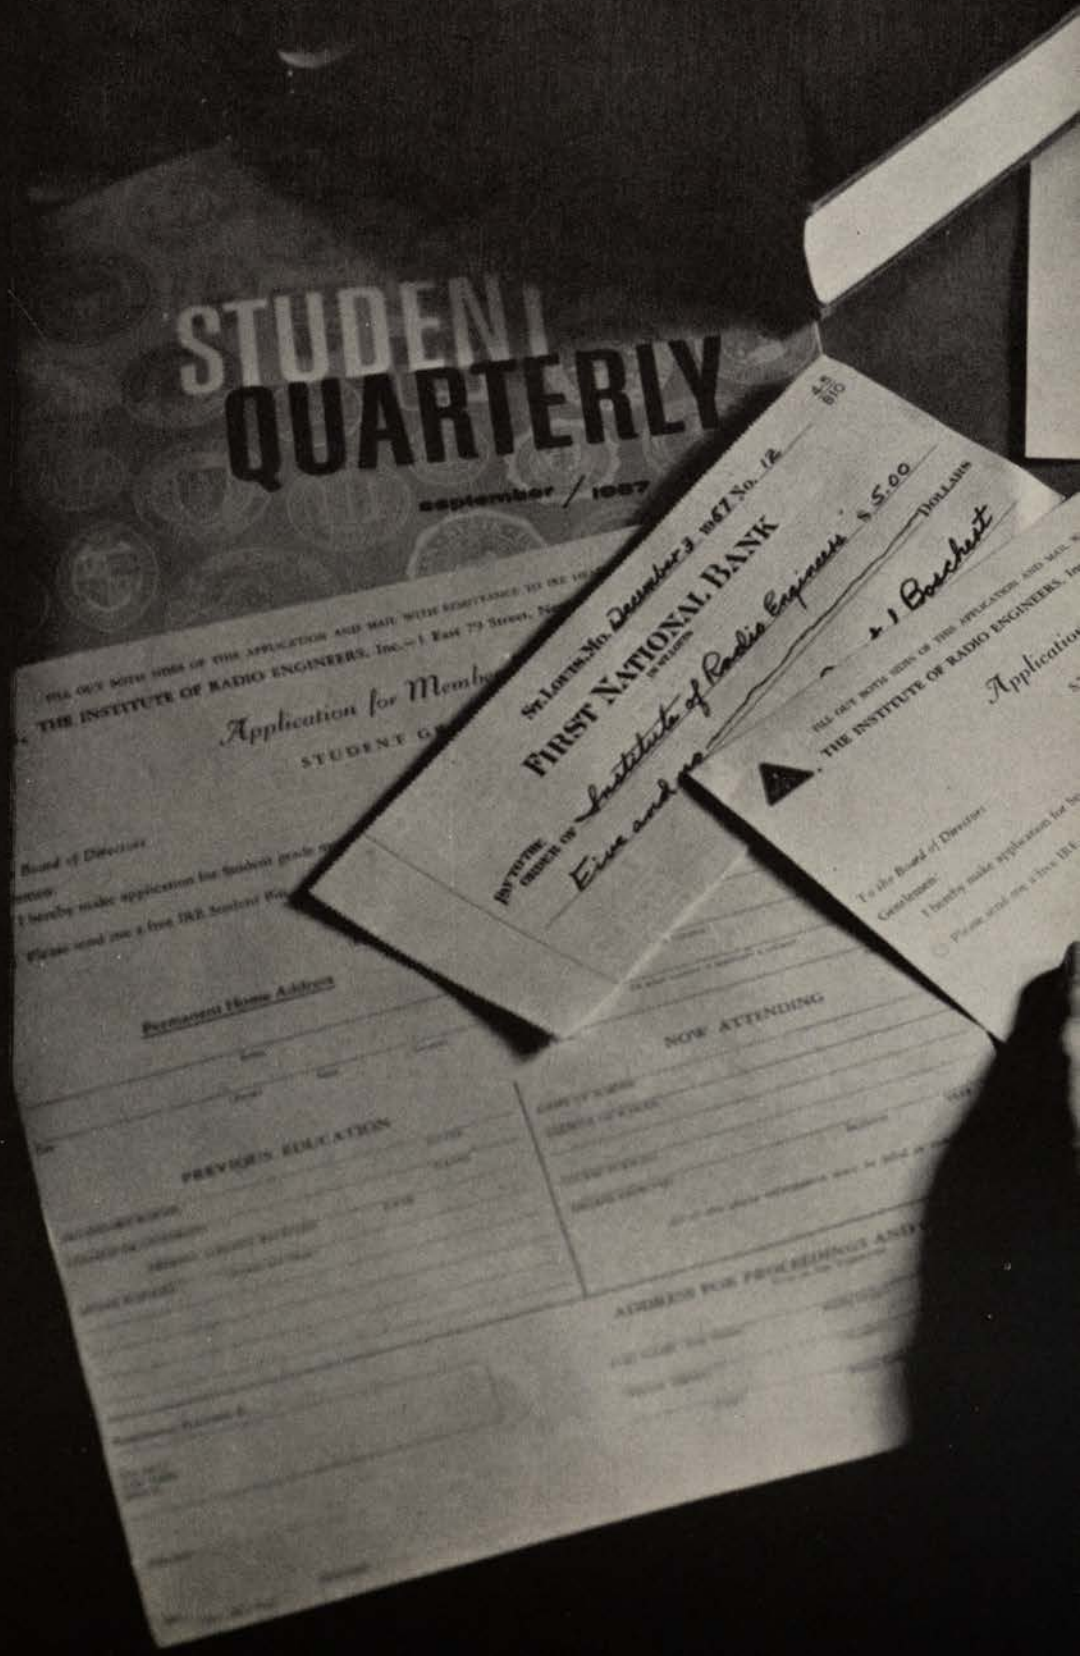

Varga smashes one

The able grapplers of Triangle again this year dominated the intramural wrestling competition. They placed seven men in the finals, four of them, Art Kiehene, Bill Love, Don Mera and Les Davis going on to win gold medals. Triangle piled up 49 points to win easily over the second place Sigma Nu squad which managed to total 30 points. Prospectors Club was third with 15 points.

The Society of Automotive Engineers is the technical society for those interested in the development, design, production, operation, and maintenance of automobiles and aircraft. Its membership is open to any student interested in the automotive industry. The M.S.M. student chapter of the S.A.E. was organized and chartered in 1952 with a membership of forty men. Today the chapter has quadrupled, and at the present time is the largest student chapter on any university campus in the United States.

Officers LEFT TO RIGHT: Hofstetter, Taylor, Jones, Lewis.

S. A. E.

Pi Tau Sigma

Pi Tau Sigma, an honorary mechanical engineering fraternity, was chartered on the Missouri School of Mines Campus on April 16, 1955. Members are selected on the basis of engineering ability, scholarship, and personality from the top one third of the senior class and the top one fourth of the junior class.

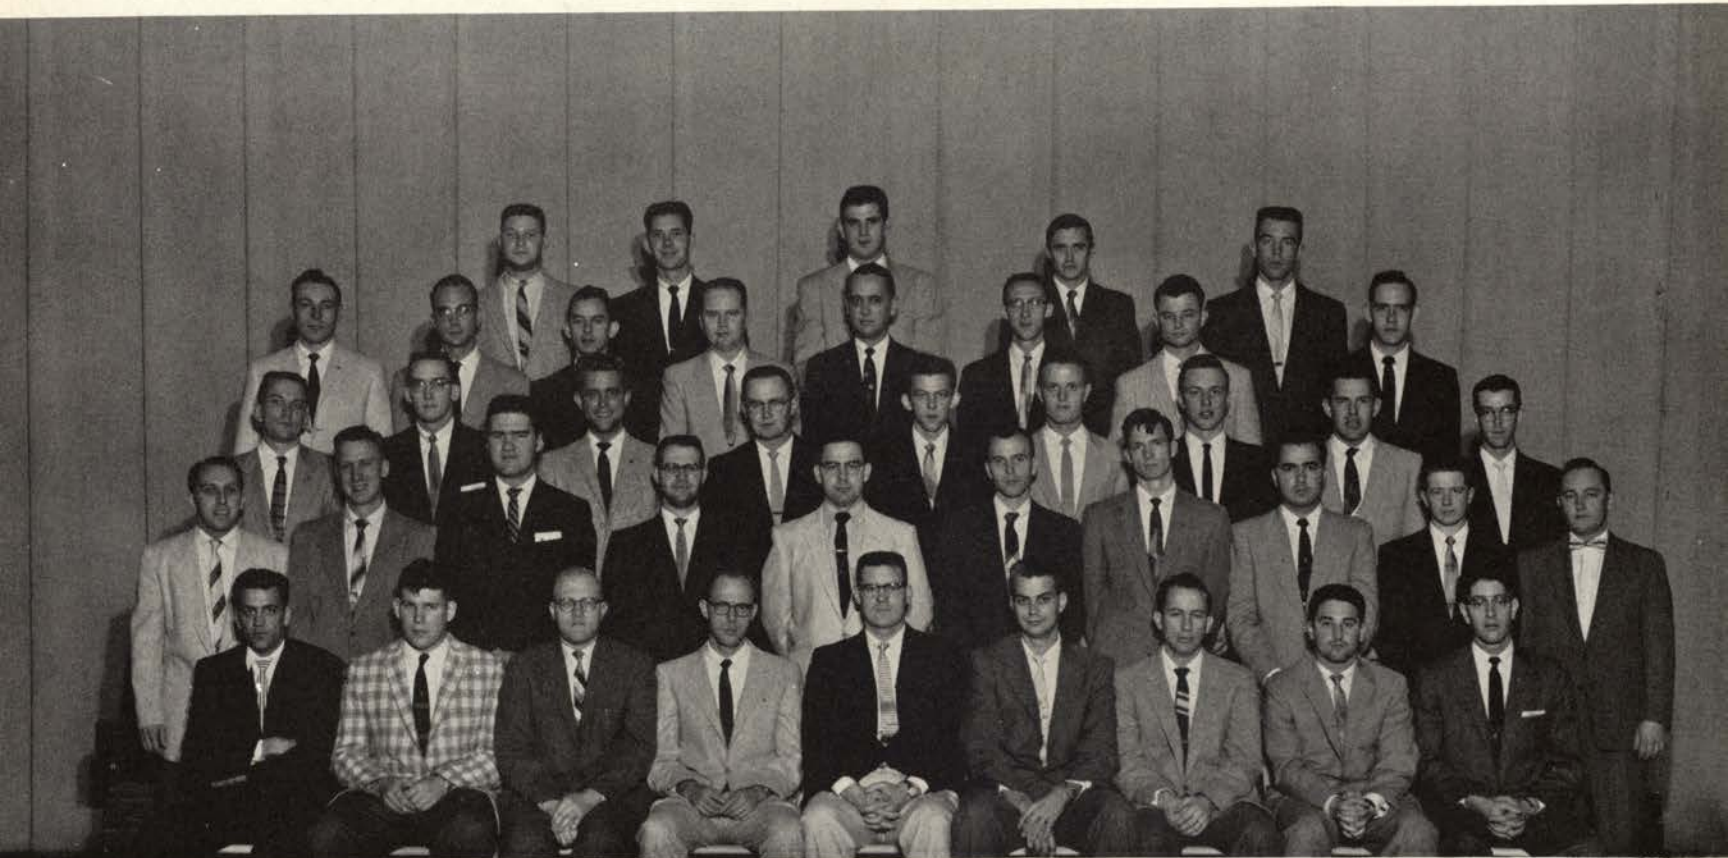

The object of the Fraternity is to foster the high ideals of the engineering profession, to promote the mutual professional welfare of its members, and to develop in students of mechanical engineering the attributes for effective leadership and the assumption of the responsibilities of a citizen in a democracy.

Eta Kappa Nu

Eta Kappa Nu is an electrical engineering honor society founded in 1904 at the University of Illinois for closer co-operation among students and others in the profession, who by their attainments in college or in practice, manifest exceptional interest and marked ability in electrical engineering. The Gamma Theta Chapter of Eta Kappa Nu was founded at M.S.M. in 1952.

While the qualifications for membership distinctly stimulate and reward high scholarship, Eta Kappa Nu has a far broader purpose than merely to award a badge of distinction. As conceived by its founders, its aim is to assist its members throughout their lives in becoming better men in their profession and better citizens.

FOURTH ROW: Spitzer, Weiland, Nenninger, Mingo, Sweeney, Kinder, Schiermeier, Denney, Zesch, Pool, Risner.

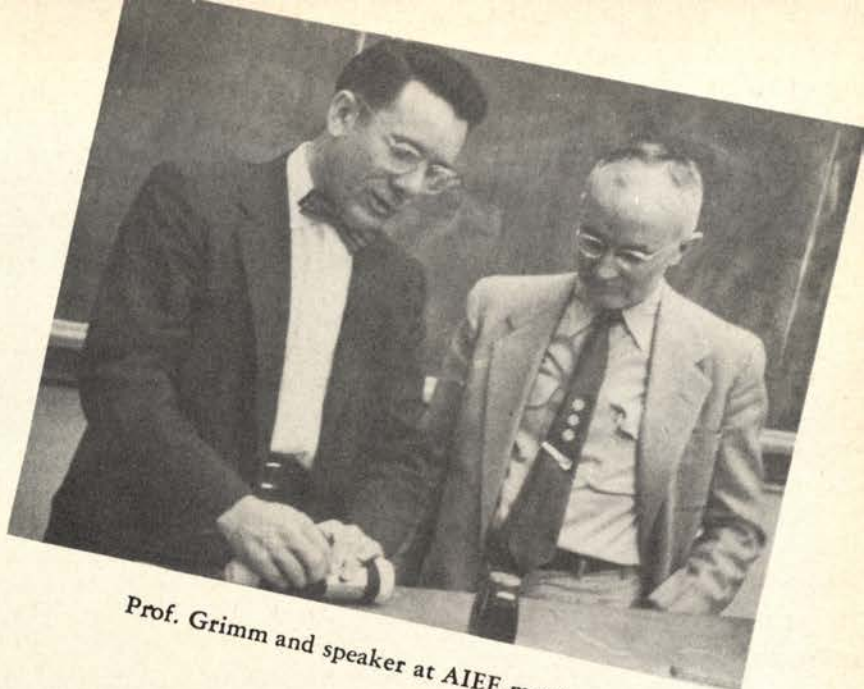

A. I. E. E.-I. R. E.

incentive toward individual expressions is great among the members as rewards are quite substantial and students wishing to enter the electrical field find it advantageous to become a member.

Monthly meetings are held by A.I.E.E.-I.R.E. during which informative talks on current topics pertaining to the Electrical Engineer are given. Representatives of nationally known electrical firms speak on subjects varying from "Job Opportunities" to "New Materials in Electrical Engineering". One meeting a year is set aside to hold the Student Paper Contest. The students entering submit papers based on their own research and experimentation. This is the first level of competition and the best paper here has the possibility of being the national winner, an honor which carries much recognition as well as monetary value.

This year the student branch was fortunate in being entertained by an educational tour through the General Electric Tube Plant in Owensboro, Kentucky. Other special events of the year included the Senior Farewell Banquet and Power-Electronics Softball Game which is held at the annual Spring Outing, the conclusion of the year's activity.

A. F. S.

The American Foundrymen's Society, founded in 1896, is an international co-operative society dedicated "to advance the arts and sciences relating to the manufacture and utilization of metal castings". The M.S.M. Student Chapter of the American Foundrymen's Society has been organized for approximately ten years and is the second largest student chapter in the society. Although most of its members are students in the Metallurgy Department, membership is open to anyone interested in the Foundry.

The student chapter provides a contact between the students and industry so that the students can get a better idea of what their jobs will be like.

A. S. M.

The MSM student chapter of the American Society for metals was organized in October, 1937. It is the purpose of the MSM student chapter to give the students in Metallurgical Engineering a more realistic picture of the science of metallurgy in practical applications. A field trip is taken each year by the members of the student chapter to gain a first-hand view of applied metallurgy.

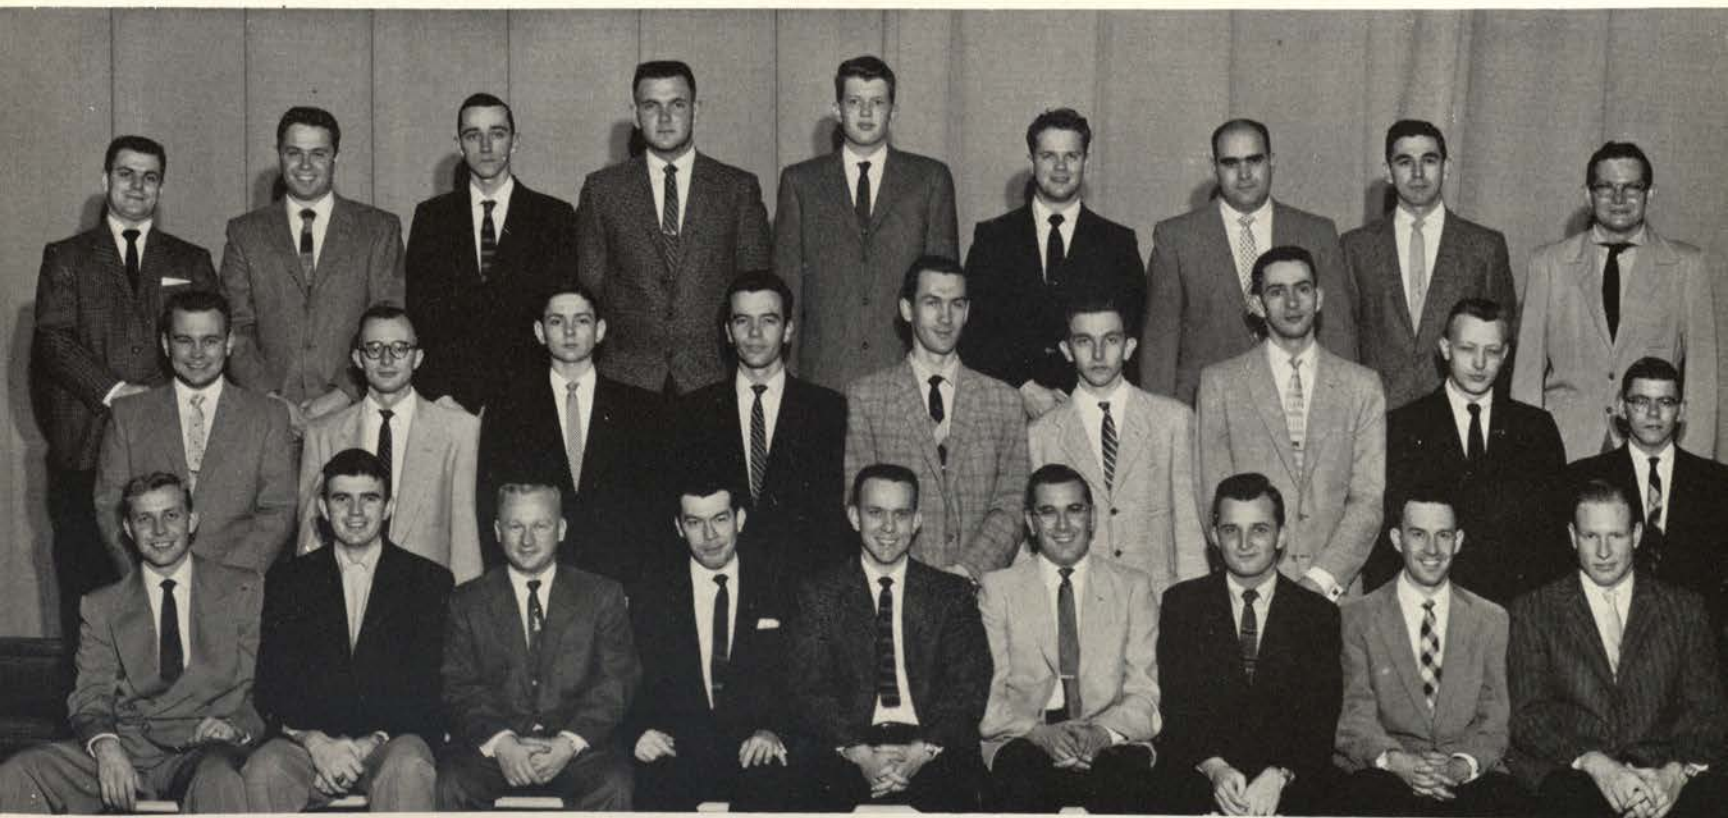

Many prominent men appear as speakers at meetings before the group, furnishing top-level information. As a result, many valuable professional contacts are made by the students, as well as social contacts with fellow students.

Officers

LEFT TO RIGHT, FIRST ROW: Myers, Unnerstall, Sheets.
SECOND ROW: O'Keefe, Matias, Pressly.

LEFT TO RIGHT, FIRST ROW: Matias, O'Keefe, Sheets, Myers, Unnerstall, Spencer, Starkweather, Range, Pressly. SECOND ROW: Ciehomski, Coffey, Twyman, Schwenk, Selby, Garrett, Colandrea, Irving, Moyers. THIRD ROW: Murphy, Marosek, Pendleton, Skow, Todd, Johnson, King, Christopher, Reitsma.

LEFT TO RIGHT, FIRST ROW: Schulz, Beisner, Lowry, Wilson, Lutz, Parks, Connelly, Zeray. SECOND ROW: Walker, Cappellari, Leck, Hartwig, Capps, Vacca, Vandarakis. THIRD ROW: Powell, Thater, Pape, Withrow, Jones, McNeely, Jurenka, Micka.

A. I. M. E.

Like the professional branch, the MSM student chapter of the American Institute of Mining, Metallurgical and Petroleum Engineers is divided into three sections. Each section has its own monthly meetings where prominent men from industry give lectures concerning the latest developments in their professions, while chapter meetings are held twice a year.

LEFT TO RIGHT, FIRST ROW: Dendler, Langstaff, Johnson, Beck, Myers, Spencer, Twyman, Woods, Selby, Moyers, Maguire. SECOND ROW: Lynch, Del Prete, Shepard, Pellicciotto, Schwenk, Bardet, Paredes, Garrett, Reixma, Callison. THIRD ROW: Johnson, Dice, Marosek, Soma, Wilson, Kohler, Kieffer, Pressly. FOURTH ROW: Buchanan, Kemper, Colandrea, Auberry, Irving, Stelleh, Leonard, Todd, Hutchins.

A. I. M. E.

MET SECTION

As more alloys are introduced for commercial uses and more stringent specifications are required for metal products, the metallurgical engineer must be made aware of these changes in order that he may be properly trained to go out into industry with up to date practical knowledge of his profession. Herein lies the value of the student's membership in the Met Section of AIME. By means of informative talks and discussions by outstanding figures in the Metallurgical Engineering field, his knowledge of his chosen field is greatly broadened.

Officers
LEFT TO RIGHT: Twyman, Myers, Spencer.

Officers
LEFT TO RIGHT: Beck, Auberry, Kieffer.

MINING SECTION

The Mining Section of the student branch of AIME strives to further the interest and education in subjects relating to the exploitation of mineral materials from the earth's crust. The section provides the professional advice and association that is needed for the student to acquire a practical knowledge of his field. The student branch gives the individual the opportunity to show his abilities, thereby gaining recognition in the profession of Mining Engineering. Many advantages can be gained by being a member of the Mining Section of AIME.

Officers
LEFT TO RIGHT, FIRST ROW: Walker, Jurenka, Lutz, Lowry.

PETROLEUM SECTION

The crutch of experience is offered to all those students wishing membership in the Petroleum Section of AIME. The opportunity to meet and talk with men who have a practicing knowledge of the field is a primary of the student branch. Technical literature is distributed to the student members to keep them posted on modern developments. Membership in the Petroleum Section is quite large because of the many assets it provides.

Sigma Gamma Epsilon

Officers

LEFT TO RIGHT, FIRST ROW: Dendler, Day, Duderstadt, Lorey, Kissling. SECOND ROW: Pressly, Kohler, Coffey, Reitsma. THIRD ROW: Wilson, Pape, Williams, Zorzavatjian, West.

Sigma Gamma Epsilon is a national honorary fraternity drawing its membership from the general field of the earth sciences. These sciences include ceramics, geology, metallurgy, mining, and petroleum engineering.

The organization has for its objects the scholastic, scientific, and social advancement of its members, the extension of friendship and assistance among universities and scientific schools, and the encouragement of cordial relations be-

tween the students and faculty. It schedules interesting programs and speakers and sponsors field trips.

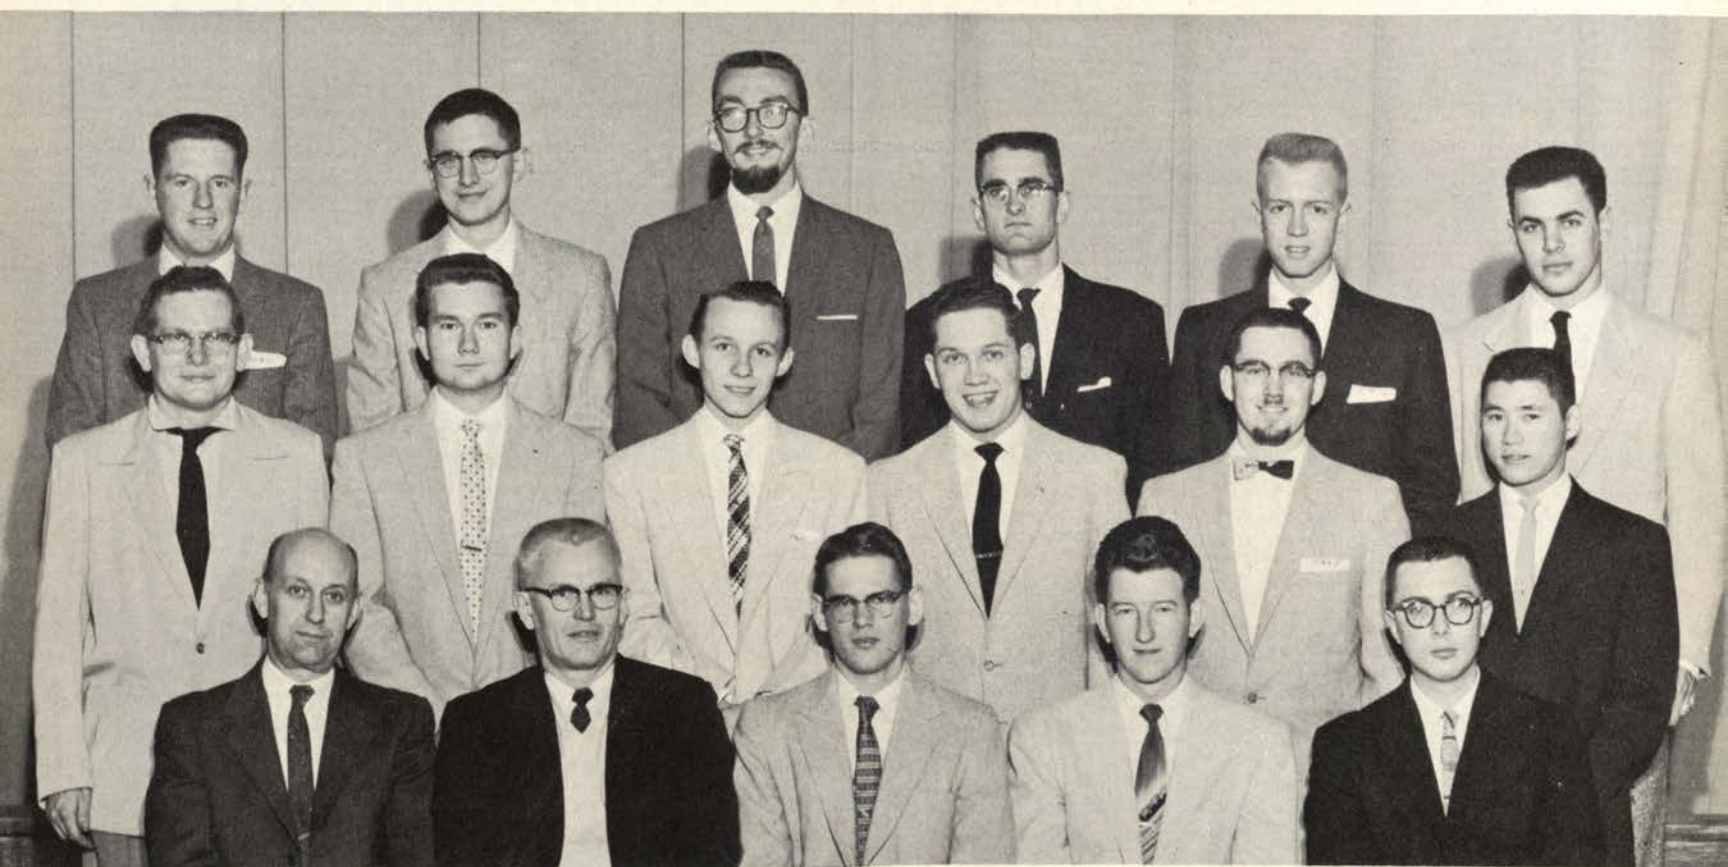

Sigma Gamma Epsilon each year presents the W. A. Tarr Award to the outstanding student in the earth sciences. The recipient must be a graduating senior who has maintained high standards in academic work and extra-curricular activities.

Sigma Pi Sigma is the only physics honor society of national scope. It was founded in 1921, and the Missouri School of Mines and Metallurgy chapter was installed in 1950.

Sigma Pi Sigma elects to membership upperclassmen and graduate students who have distinguished themselves by achieving high standards of scholarship, and who show promise of professional merit in physics and closely related sciences.

In addition to providing recognition of scholastic achievement, Sigma Pi Sigma seeks to advance and diffuse knowledge of and interest in physics, promote acquaintance and fellowship among the advanced students and the faculty in physics and to provide an organization which furnishes opportunity for the promotion of the extracurricular activities of the physics department.

LEFT TO RIGHT, FIRST ROW: Fuller, Pauls, Hardebeck, Pool, Hatfield. SECOND ROW: Reitsma, Cleary, Sellers, Jones, Adam, Arimura. THIRD ROW: Guinn, Hemskey, Cochran, Hudson, Pond, Scott.

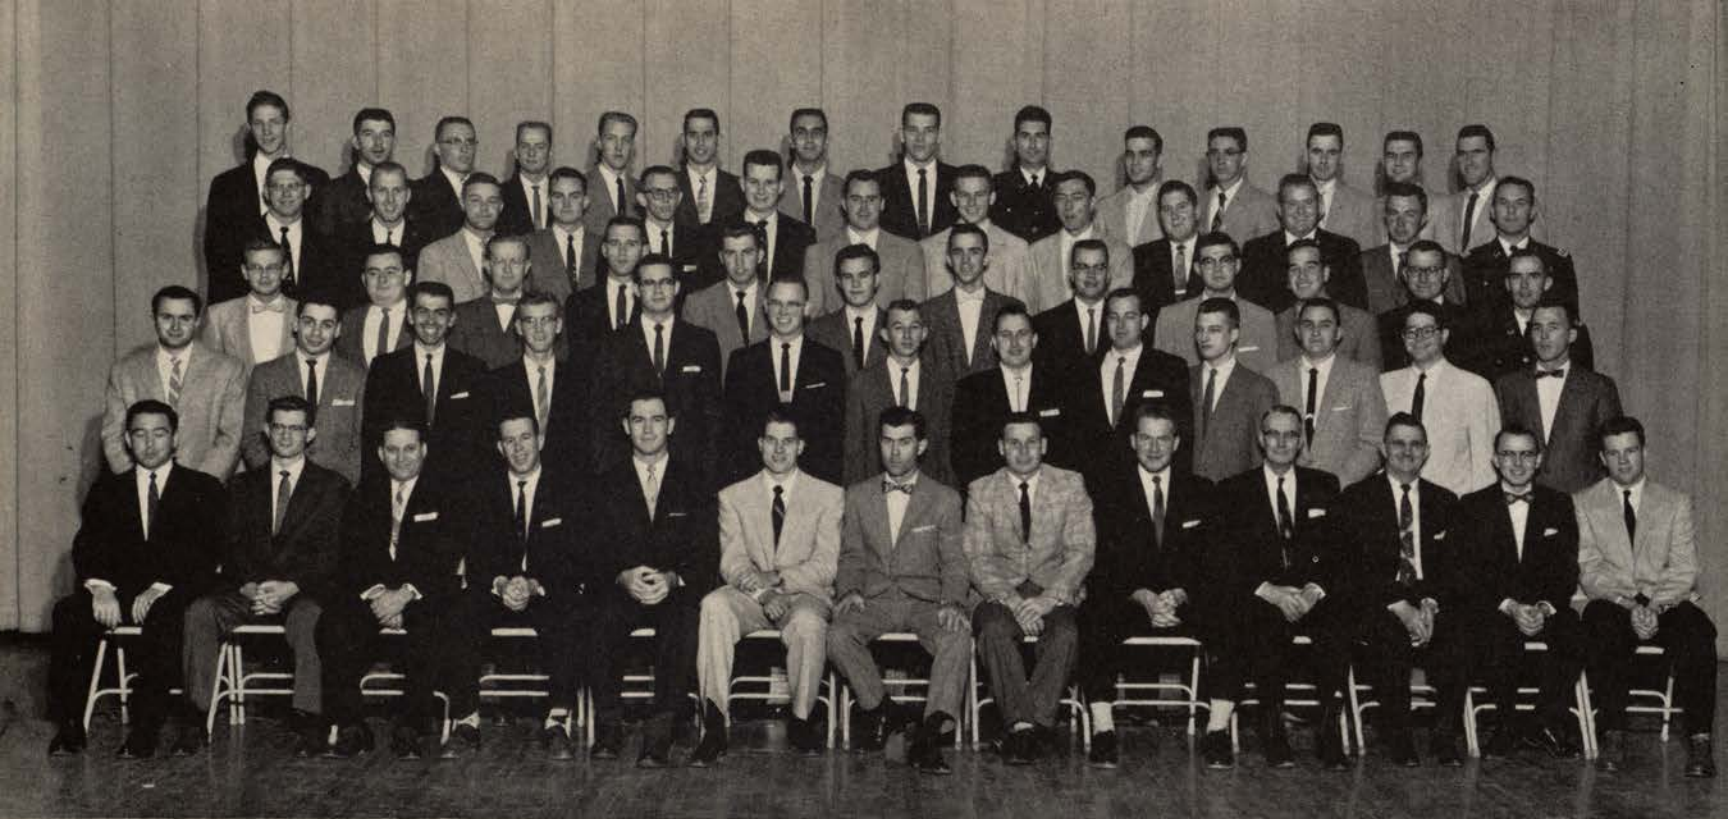

Sigma Pi Sigma

A. S. C. E.

The Missouri School of Mines student chapter of the American Society of Civil Engineers has been very active in acquainting its members with modern engineering practices. Bi-monthly meetings are scheduled when possible, and these meetings are featured by outstanding men in the civil engineering field. Students also have given talks on their experiences in the field. Through the medium of speakers the members have gained knowledge and interest in civil engineering practices.

The student chapter has also sponsored field trips to various locations where the student can see the theory which he has picked up in the classes being put into practice.

Chi Epsilon

LEFT TO RIGHT, FIRST ROW: Grubbs, Hershkowitz, Modesitt, Eshbaugh, Hoffman, Meyer, Carlton, Strub, Haydon, Wright, Kruger. FOURTH ROW: Hill, Bruegging, Zieba, Luebbert, Ringenberg, Baskin, Henderson, Roberts, Winkler, Roberts.

Chi Epsilon, National Honor Fraternity of Civil Engineering, was founded in 1922 on the University of Illinois campus. The Missouri School of Mines Chapter was organized in the fall of 1949. The purpose of the organization is to recognize the characteristics of the individual engineer which are fundamental to the successful pursuit of an engineering career and to aid in the development of these characteristics in the undergraduate engineer.

Chi Epsilon chooses its members from the upper one-third of the junior and senior class. In addition to scholastic ability, the members must also meet the requirements of practicality, character, and sociability.

LEFT TO RIGHT, FIRST ROW: Strub, Eshbaugh, Wright, Littlefield. SECOND ROW: Hoffman, Haydon, Hill, Meyer. THIRD ROW: Fuller, Modesitt, Crowe, Kruger.

The Beta Delta Chapter of Alpha Chi Sigma here at the Missouri School of Mines was founded in 1937. A pledge class is initiated each semester, and the Chapter holds regular semi-monthly meetings.

The objectives of the fraternity are to bind its members with a tie of true and lasting friendship, to strive for the advancement of chemistry both as a science and as a profession, and to aid its members by every honorable means in the attainment of their ambitions as chemists throughout their mortal lives.

Alpha Chi Sigma

A. C. S.

The American Ceramic Society is a national organization which has as its purpose the promotion of science and engineering as they relate to Ceramics and its allied industries.

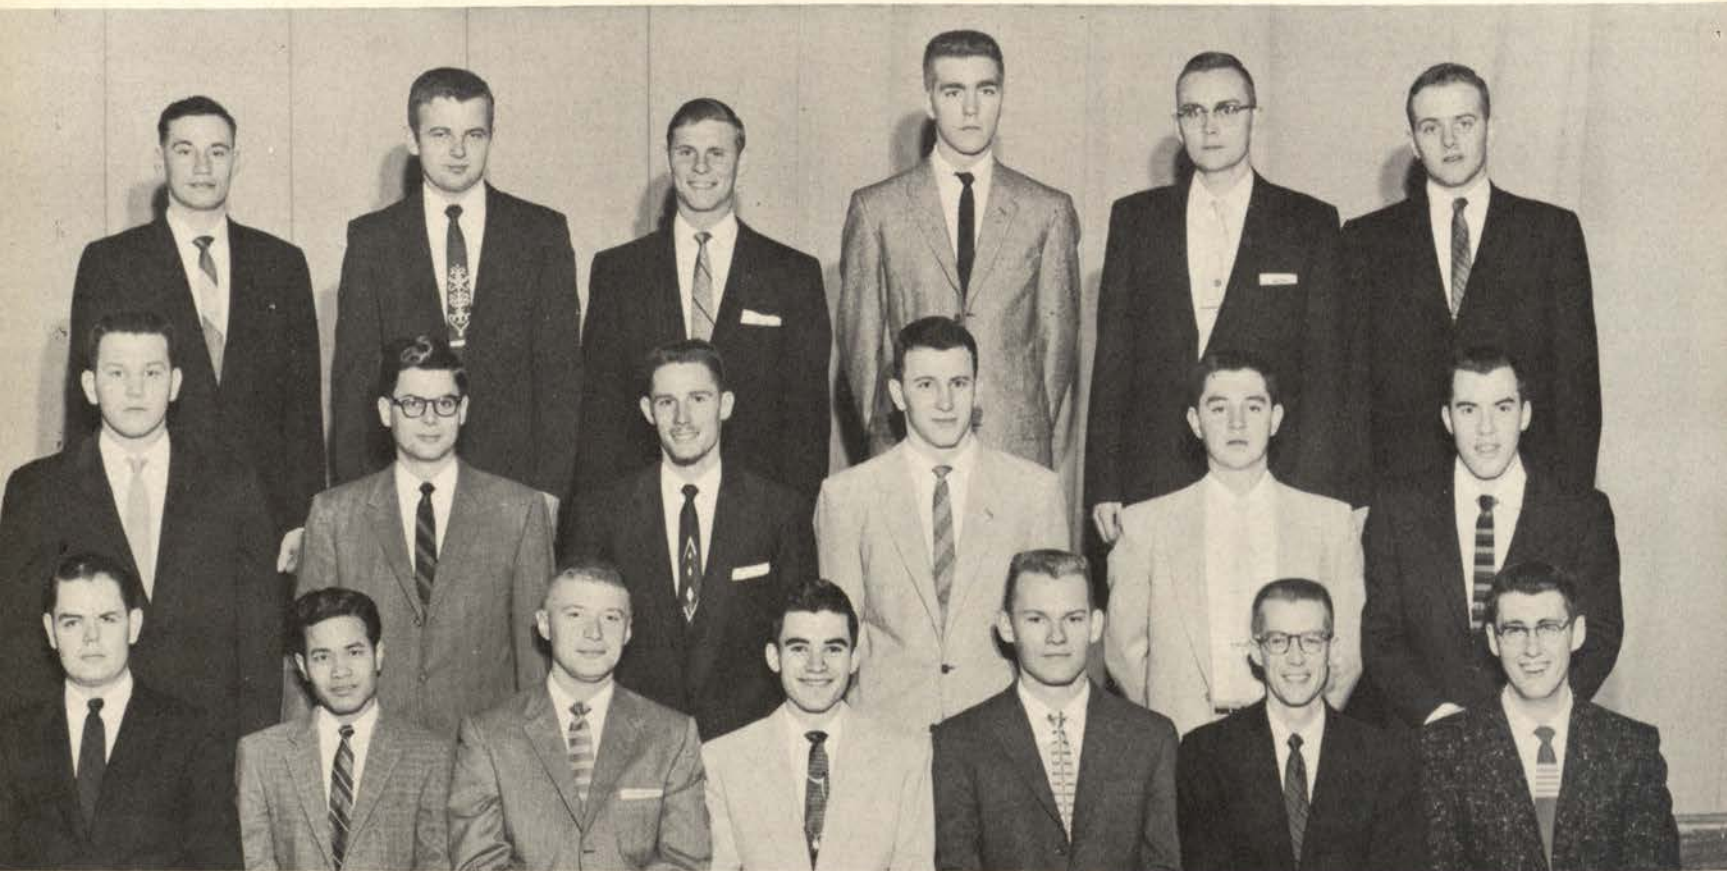

The Missouri School of Mines student branch of the Society was formed by and for students in the Ceramic Engineering Department. Monthly meetings are held, at which time prominent men from the Ceramic field present timely, informative lectures and motion pictures covering the entire field from brick and glass to rocket nozzles, transistors, and missile nose cones. Thus, the student gains a material insight into the field, which is not to be obtained in the classroom or laboratory.

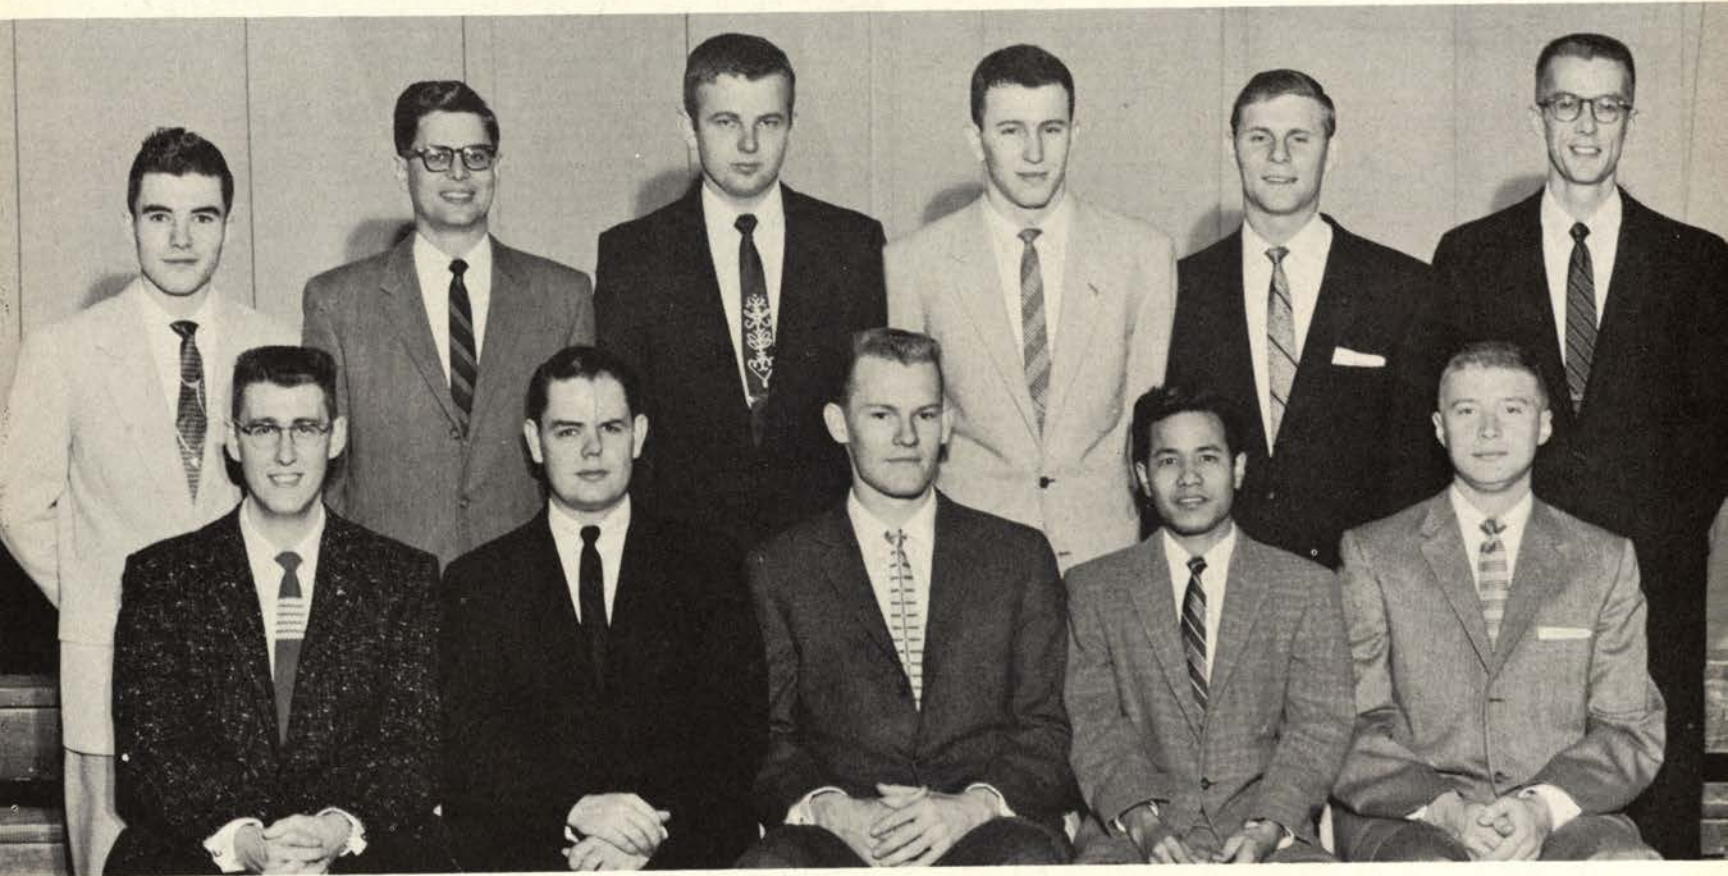

Officers

LEFT TO RIGHT, FIRST ROW: Day, Thaung. SECOND ROW: MacFarlane, Duderstadt.

LEFT TO RIGHT, FIRST ROW: MacFarlane, Thaung, Duderstadt, Day, Williams, Lorey, Allmon. SECOND ROW: Phillips, Grant, Vancil, Phillips, Snajdr, Weisenstein. THIRD ROW: Denk, Hunter, Rusert, Sword, Richards, Martin.

Keramos

The Missouri Chapter of Keramos was established on the Missouri School of Mines campus July 26, 1947. The student members are chosen on their scholarship, character, and promise of success in the Ceramic field.

Its principal objectives are to promote and emphasize scholarship and character in the thoughts of Ceramic students, to stimulate mental achievement, and to promote interest in ceramic art, technology, and engineering. As secondary objectives, it seeks to bind more closely the alumni to this school and to the alumni of other colleges having schools or departments of Ceramics and Ceramic Engineering, and to furnish an additional tie of college friendship.

Officers

LEFT TO RIGHT: MacFarlane, Duderstadt, Williams, Allmon.

LEFT TO RIGHT, FIRST ROW: Mielke, Schuler, Pfautsch, Hofstetter, Tayloe, Willey, Fike, Dallmer, Paynton, Glaser, Higley. FIFTH ROW: Vasterling, Schnitker, Sherrick, Patterson, Bartholomew, Baumbach, Bell, Valentine, Musfrove, Reuter.

Pershing Rifles

Pershing Rifles along with the MSM branch Company K, Seventh Regiment, is a national organization of college students who are members of the Reserve Officer's Training Corps, and have chosen this organization as an extra-curricular activity. It is a fraternal organization and a student must pledge for one semester before becoming an active member. It seeks to develop those traits of character and leadership essential to success in both military and civilian life. In addition, Pershing Rifles presents a valuable background in military training for the years which its members have yet to serve in the service of our country.

Officers

LEFT TO RIGHT, FIRST ROW: Tayloe, Willey, Dallmer. SECOND ROW: Pfautsch, Fike, Glaser. THIRD ROW: Schuler.

S. A. M. E.

The Society of American Military Engineers, founded during World War II, is composed of engineers, both civilian and military, who believe that it is their duty to preserve the lessons of the past as a guide for the future and to save the nation from the spirit of indifference into which it has fallen after every war.

Student chapters are established to acquaint the student with the national organization and to increase his interest in engineering. The MSM chapter of SAME has been very active, providing displays for both Parent's Day and Engineer's Day and supervising the coatcheck at the Military Ball. Regular chapter meetings are also held at which movies of engineering interest are shown.

Officers

LEFT TO RIGHT, FIRST ROW: Mueller, Glaser, Nowak, Tayloe. SECOND ROW: Dallmer, Bell, Pfautsch, Schuler.

LEFT TO RIGHT, FIRST ROW: Nowak, Pfautsch, Schuler, Glaser, Bell, Mueller, Anderson. SECOND ROW: Koboldt, Walton, Bobbitt, Hanrahan, Corczyca, Pike, Tayloe. THIRD ROW: Kosten, Grizio, McCormick, Johnson, Kinder, Myers, Poarch, Dallmer.

St. Pat's Board

Officers
LEFT TO RIGHT: Hill, Palovchik, Husemann.

LEFT TO RIGHT, FIRST ROW: Murphy, Hill, Palovchik, Husemann, Pellicciotto. SECOND ROW: Parks, Harris, Schneider, Hodge, Stevenson, Smith. THIRD ROW: Wilson, Boschert, Kuhlmann, Steinmann, Lapinski, Kozeny, McCarthy.

The St. Pat's Board this year celebrated its fiftieth year of active existence. The Board is composed of two members from each fraternity and six men from the Independents. Each organization elects a new member each year for a two-year term, thus dividing the Board into senior and junior members.

The St. Pat's celebration, which lasted four days, officially started Friday afternoon with the

parade of floats built by the various organizations on campus. Friday night was the occasion for the Costume Ball; and Saturday night at the Formal Dance, the Maids of Honor were presented, while Miss Jolene See became Queen of the Court of Love and Beauty.

St. Pat's, held in honor of the Engineers' patron saint, is the most important social event for a Miner and is an Alumnus' fondest memory.

The Missouri School of Mines Interfraternity Council is composed of twenty eight members representing the fourteen social fraternities on campus. Fraternities elect one new member to the council each year to serve as junior member his first year and as the senior member his second year.

The council has the duty of making and interpreting regulations and promoting a spirit

of harmony and co-operation among the fraternities.

Representing all fraternities is the National Interfraternity Council which was founded in New York in 1909. It is composed of prominent fraternity leaders and college representatives who meet annually in New York City. Through their intelligent deliberation, the relationship between college fraternities has been greatly improved.

LEFT TO RIGHT, FIRST ROW: Rach, Welsh, Schultz, Pope, Macalady. SECOND ROW: Maisak, Meyer, Dusin, Marble, Finke, Thompson. THIRD ROW: Edwards, Anderson, Mueller, Ellicott, Russell.

Interfraternity Council

Officers

LEFT TO RIGHT, FIRST ROW: Schultz, Pope, Welsh.

LEFT TO RIGHT, FIRST ROW: Link, Strevenson, Day, Dendler, Padilla. SECOND ROW: Kiehne, Mattingly, Bertorello, Hodge, Feaster, Garrett. THIRD ROW: Shavers, Pawlowski, Pipal, Baskin, Hyde.

Student Council

The Student Council is the student body's voice in campus affairs. Since its founding in 1937, the Student Council has carried through many projects to benefit the students, and this year was no exception. Lights for the tennis court, bleachers for the intramural field, and weights for the gym were just a few of the improvements that benefited the students as a whole.

This organization is composed of a member and alternate from each of the fourteen social fraternities, and fourteen members and their alternates from the Independents. These men worked as a team to give the Miners a governing body that looked to the future as well as the present.

Officers

LEFT TO RIGHT: Dendler, Day, Stevenson, Link.

MSM Band

LEFT TO RIGHT, FIRST ROW: Haum, Ratekin, Ellicott, Robbins, Underwood, Sievers. SECOND ROW: Wolf, Cowden, Thurman, Bowman, King, Stinchcomb, Lawrence, Lynch, Jackson. THIRD ROW: Drumeller, Martin, Rathman, Hartshorn, Malsch, Hremhn, Komo, Gordon. FOURTH ROW: Poarch, Bove, Grazman, Burlage, Altleroy, Johnson.

The Missouri School of Mines Band is sponsored jointly by the school and the ROTC Program. This year the band traveled more extensively than ever before. The symphonic unit played at the state prison and the Algoa Reformatory this last fall. The Spring Road Trip took the Band to Kansas City, Sedalia, Columbia, Jefferson City, and Fort Leonard Wood.

Delta Gamma Chapter of Kappa Kappa Psi, national honorary band fraternity, was chartered on March 9th. Eighty six men participated in the Band Program. The Band Director was selected for membership in All American Bandmasters Band. Eighteen new instruments were secured during the year. All this made 1957-58 a banner season.

Officers

LEFT TO RIGHT: Lynch, Ellicott, Robbins, Underwood.

Alpha Phi Omega

Officers

LEFT TO RIGHT: Kruger, Lodholz, Law, Eshbaugh, Benz, Colandrea, Spencer.

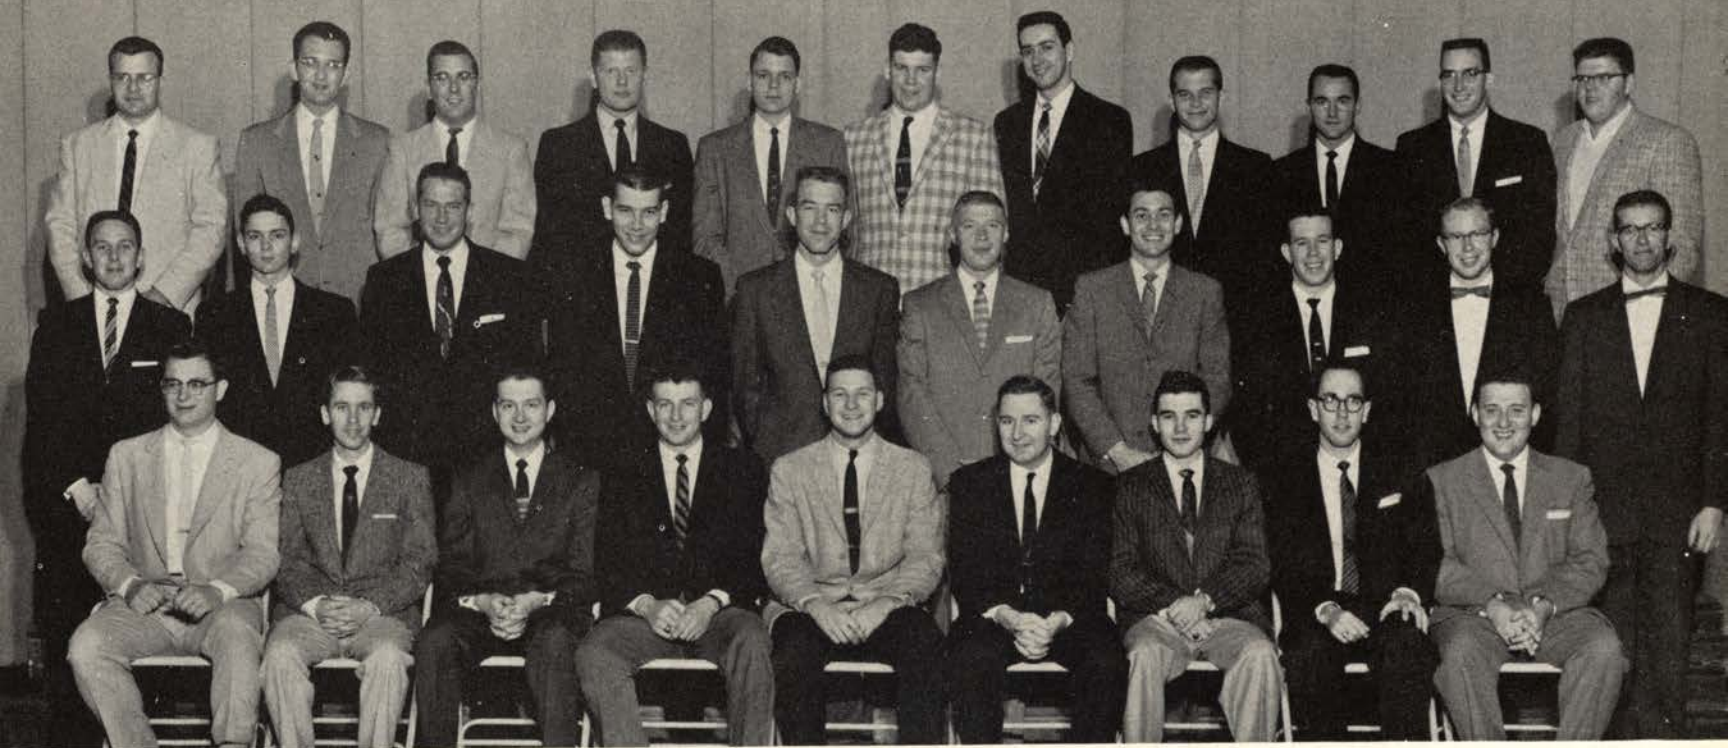

Alpha Phi Omega is a National Service Fraternity which has a definite program of activities in which the members direct their energies for the benefit of their fellowmen.

Since its beginning on the campus of Missouri School of Mines, Beta Omicron chapter has had a fine record of service projects. Among these projects are the Student Book Exchange, the car pool, the free desk blotters, co-sponsorship of the blood drive with the Red Cross, and an annual party for cerebral palsied children who live in the vicinity of Rolla.

LEFT TO RIGHT, FIRST ROW: Benz, Colandrea, Lodholz, Law, Eshbaugh, Spencer, Kruger, V a c c a , White, DesCamp, Shelton. SECOND ROW: Murphy, Peterson, Stone, Miller, Bardet, Moss, Hofer, Mosier, Kieffer, Konrad, B u r k e , Morris. THIRD ROW: Qualls, Walther, Snajdr, Schader, Szuch, Roberts, Ganning, Marlow, Marosek, Rephlo, Barry.

LEFT TO RIGHT, FIRST ROW: Link, Daniels, Spencer, Hill, Konrad, Guetersloh, Day, Rasche, Harris. SECOND ROW: Stevenson, Twyman, Kruger, Singer, Sutton, Duderstadt, Spratt, Strub, Brendecke, Boschert. THIRD ROW: Macalady, Wollgast, Spencer, Hofstetter, Borman, Eaker, Colandrea, Ryter, Thompson, Stanton, Sucher.

Blue Key National Honor Fraternity was founded at the University of Florida in 1924. Men are chosen for Blue Key impartially and solely on their all-around ability. Blue Key stamps a man as possessing high scholarship, good character, and outstanding leadership.

The M.S.M. chapter of Blue Key was established in 1933. Publishing a student directory, ushering at graduation and serving as guides at school functions are but a few of the many worthwhile activities of Blue Key at M.S.M.

Officers
Konrad, Guetersloh, Day, Spencer, Hill.

Blue Key

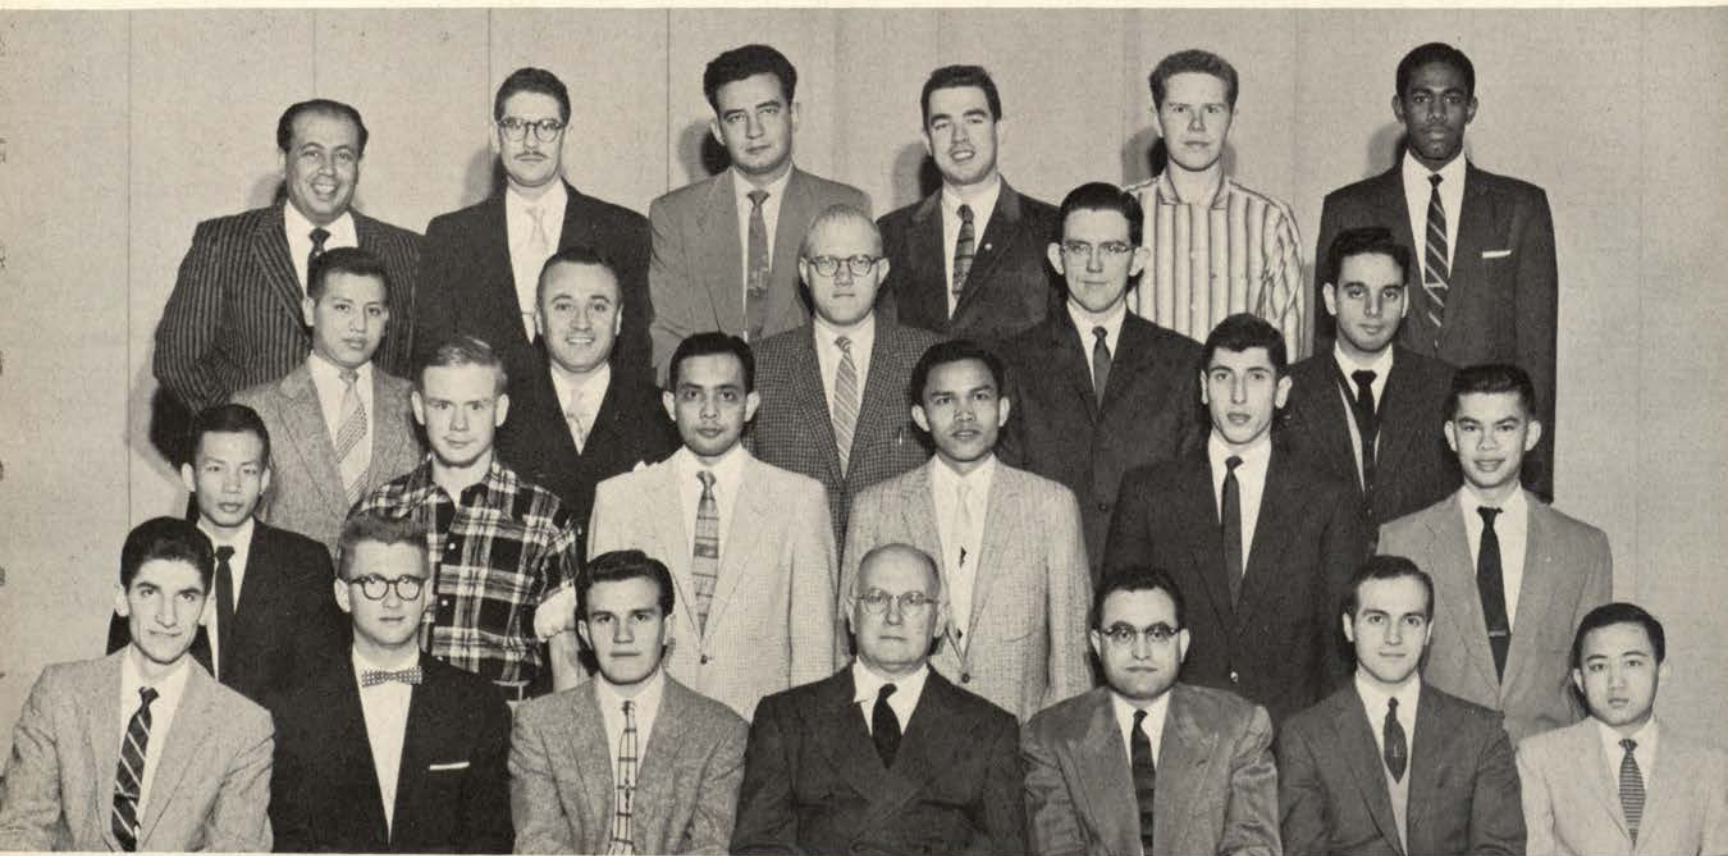

International Fellowship

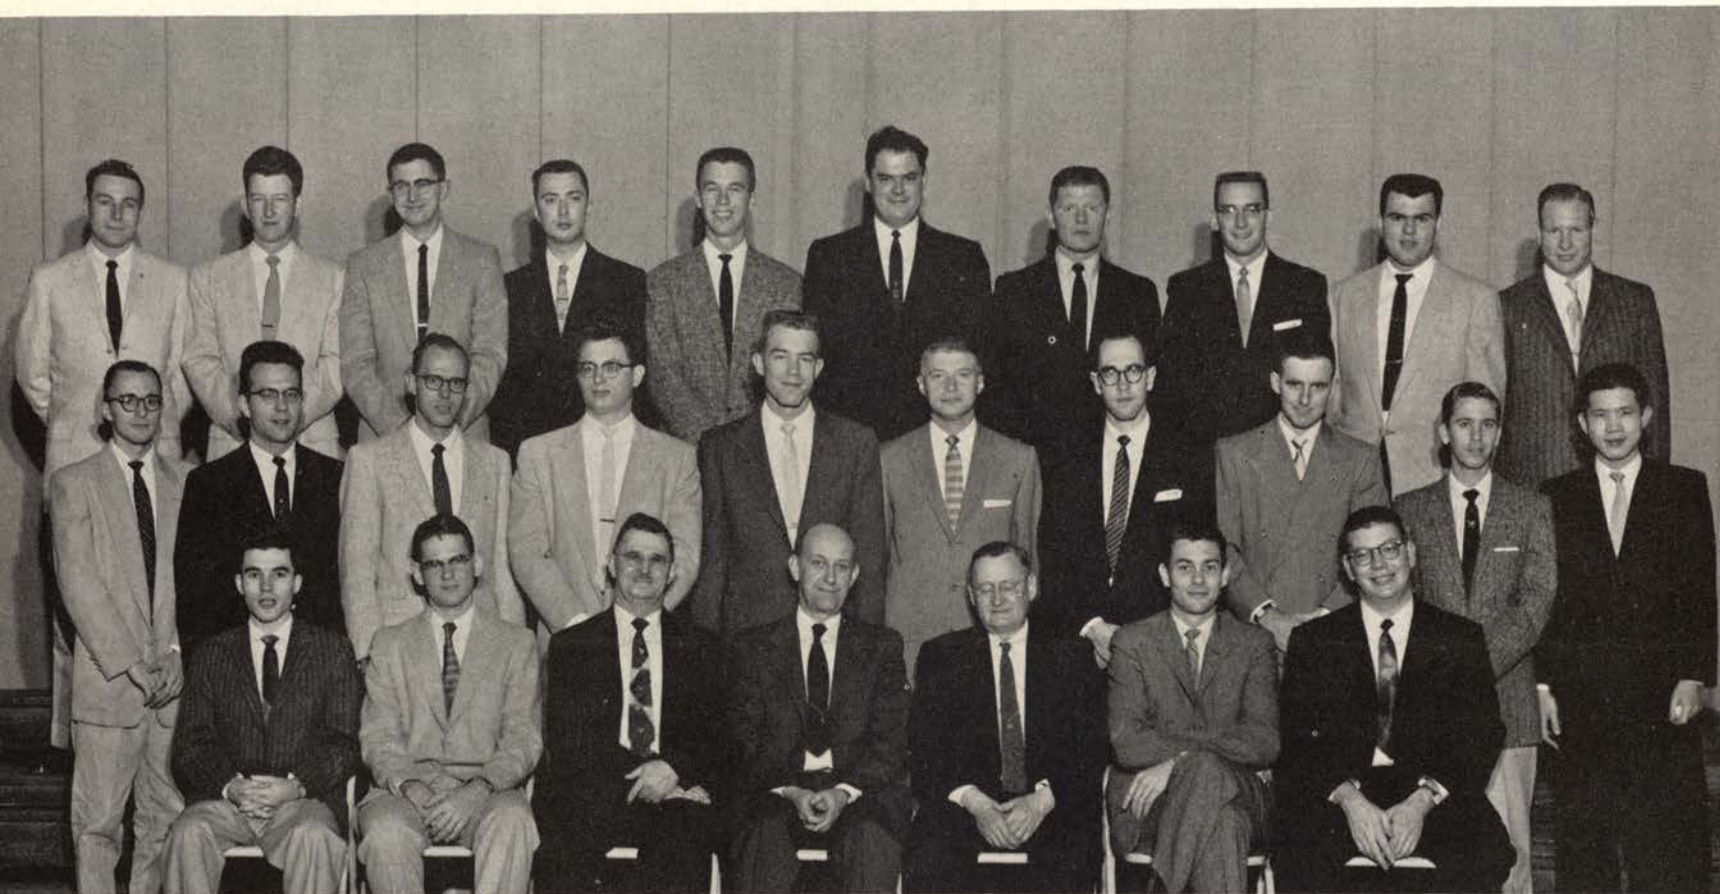

The International Fellowship is an organization whose objectives are to promote friendship and better relations between the countries represented at the MSM campus and to provide a place of fellowship for foreign students and their American friends. The group sees three principal ways to further these aims. First, at meetings, programs of international interest feature speakers and movies from foreign countries. Second, the organization sponsors the annual International Dinner, featuring foods from various countries prepared by members of the group. Third, there is the International Fellowship program as a part of the MSM radio hour on station KTTR. By way of interviews of foreign students, listeners become acquainted with other parts of the globe.

Phi Kappa Phi

The Honor Society of Phi Kappa Phi is a national scholastic honor society open to honor students in all departments of American colleges and universities. To be eligible for election by the Missouri School of Mines chapter, Seniors must rank in the upper twelve percent of their class, but not more than 10% may be elected. Juniors ranking in the upper 5% may be considered for election. The Missouri School of Mines Chapter maintains an active Student Loan Fund, and each year awards a certificate, in the form of a Book Plate to each student who has maintained a 2.00 or better average for the academic year.

Officers

Tau Beta Pi

the junior class and the upper one-fifth of the senior class.

To stimulate scholarship among underclassmen, Tau Beta Pi elects the outstanding freshman. To stimulate interest in the engineering sciences, Tau Beta Pi makes an award at the annual district high school science fair. To stimulate interest in liberal culture, Tau Beta Pi conducted a campus survey for student preferences in the General Lectures Program. It is hoped in the future that Tau Beta Pi will be able to sponsor a scholarship for a deserving student. In addition to its other activities, Tau Beta Pi maintains the campus recognition markers and maintains a current list of eligibles for other honor societies. As a brotherhood, Tau Beta Pi promotes personal association among the several engineering curricula and espouses professional ethics and ideals for its members.

B. S. U.

"Go ye, Miner . . . into the classroom, dorm, fraternity house; . . into the co-op, gym, lab; . . into the busy wonderful life which is yours, and make disciples of all people." This guiding principle of the Baptist Student Union, which was organized on the MSM campus about 1935, is carried out through many activities. Heading the activities is the "Noonday" meeting held weekdays at the Uptown Theater for inspiration and fellowship. Other events include the State Convention, state and local retreats, International Student Banquet, general B. S. U. fellowships, revival teams, music, and sports.

Newman Club

Cardinal John Henry Newman had a motto: "Heart speaketh to Heart". These few words embody the substance of the organization which bears his name. The Newman Club is a union of the hearts and personalities of young men throughout our nation who realize that God is not to be forgotten in the rush of college life. The aim of the Newman Club is to foster the spiritual, intellectual, and social interests of its members.

Activities are varied, including informal instructions in the theology of modern living and the promoting and planning of dances and other social functions.

Since its beginning in April of 1954 the MSM Newman Club has grown to a membership of 174 men.

The Wesley Foundation is a Christian student organization located on non-church related college campuses with the main purpose of the Foundation being to provide a "home away from home" by sponsoring social, educational, and spiritual activities in the light of Christian understanding.

Deriving its name from John Wesley, the father of Methodism, the Foundation cooperates

with other Christian student organizations on campus through membership in the Interfaith Council. Through the Methodist Student Movement, the Wesley Foundation is a member of the World Student Christian Federation, United Student Christian Council, and the Student Volunteer Movement. Through these organizations and the Methodist Church, the Foundation is also a member of the World Council of Churches.

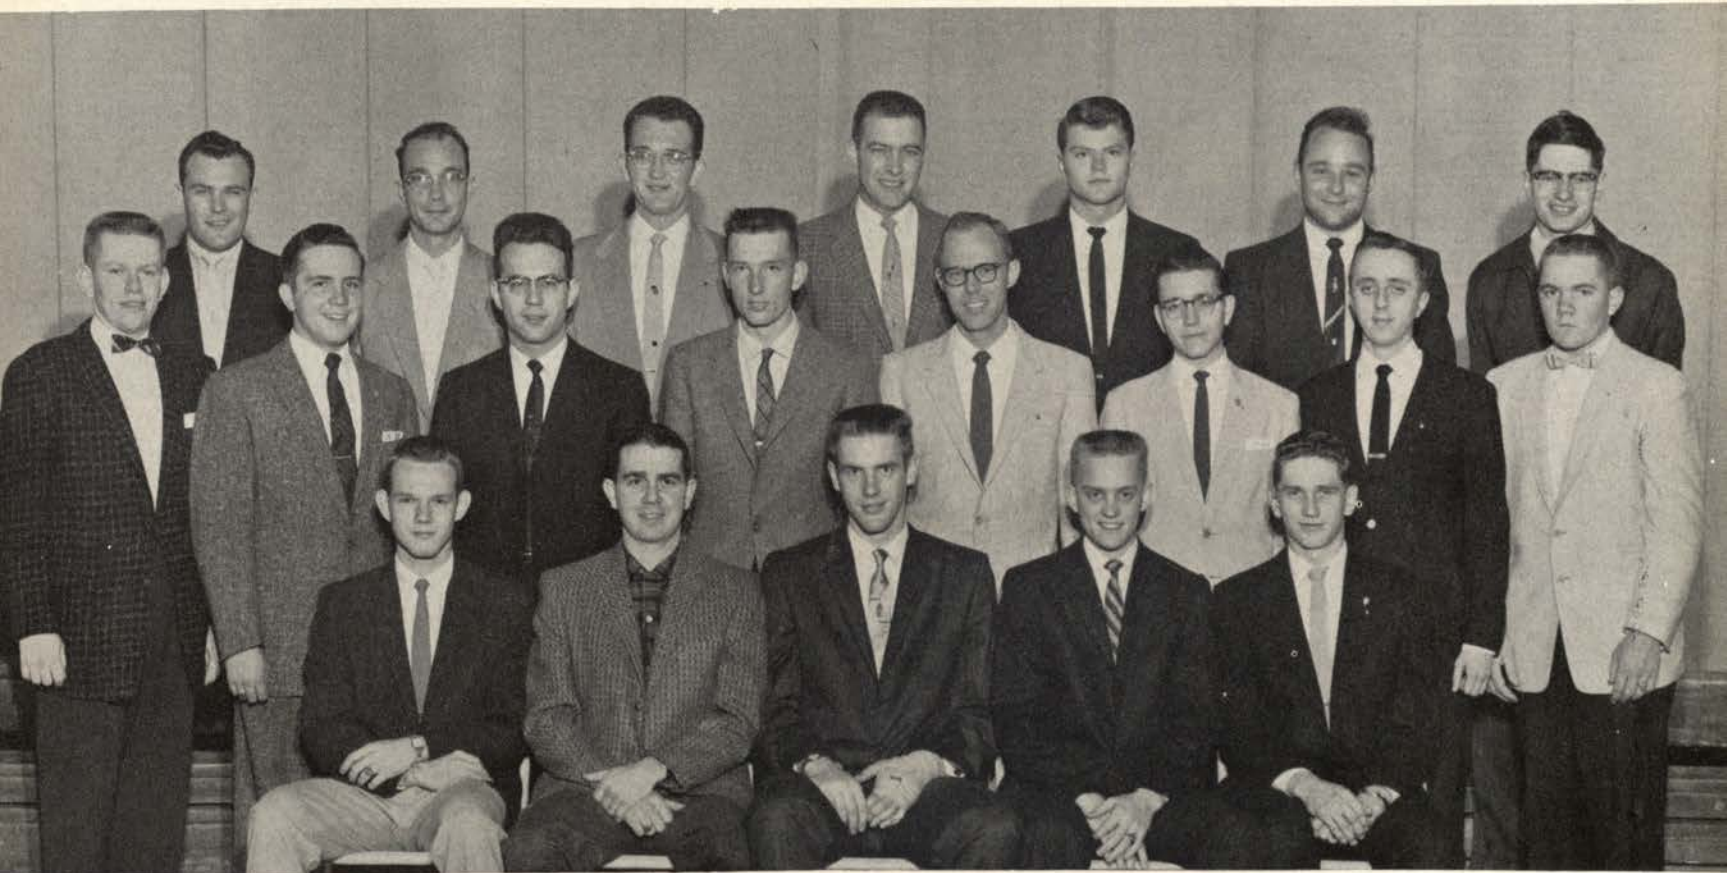

Gamma Delta is an international association of Lutheran students founded in 1934 at Chicago, Illinois. Alpha Phi chapter was established at MSM in February of 1945.

The primary objectives of Gamma Delta are to provide its members with Christian fellowship, to help them to increase in Christian knowledge, and to serve the church and community. To promote these objectives, it carries on a pro-

gram of religious, educational, and social activities.

Thus, the Lutheran student may find a welcomed source of religious activity and endeavor while at the School of Mines. He may further his religious training along with his four years of scholastic training. Herein lies the main purpose for the existence of Gamma Delta.

University Dames

The National Association of University Dames was founded at the University of Chicago in 1920. The MSM Chapter was established in 1941. It is an organization of students' wives. Its aims are to promote a spirit of friendliness, furnish a means of entertainment, and stimulate general culture among its members. The sponsors are a board of faculty wives, headed by Mrs. Curtis Wilson, wife of the Dean.

The University Dames provide a variety of activities over the year that all members may participate in such as: bridge, bowling, study of dramatics, singing, handicraft; and we have added cheerleaders to help promote more school spirit. Our enrollment this past year numbered approximately 200.

Officers

LEFT TO RIGHT, FIRST ROW: Hadler, Macalady. SECOND ROW: Graham, Young, Welch. THIRD ROW: Richey, Meyer.

"M" Club

LEFT TO RIGHT, FIRST ROW: Bara, Scharf, Harris, Barre, Rockwell, Burk, Smith, Wilson, Jurenka, Collins, Murdock. SECOND ROW: Herschbach, Englehardt, Vancil, Marble, Jobe, Wheeler, Bolon, Cooper, Boren, Sands. THIRD ROW: Mathews, Allison, Whitehair, Parker, Singer, Kruger, Rasche, Moore, Sullivan. FOURTH ROW: Johnson, Ford, Aderman, Walz, Shavers, Wilkins, Booth, Gay, Calvin, Sucher.

The "M" Club is an athletic organization composed exclusively of those men who have engaged in one of the varsity sports. The purpose of this organization is to develop the feeling of companionship among its members, the betterment of sportsmanship and school spirit on the campus, and to help the athletic department in the handling of varsity games and meets as well as helping to provide a well rounded intramural program. In order to stimulate competition in intramural and varsity sports, various awards are given to outstanding participants in the athletic program.

Rockwell, Smith

Glee Club

The MSM Glee Club, which has completed one of its more successful seasons, is under the direction of Professor John M. Brewer. Cooperation between glee club members, officers, and the MSM Student Council, which has been extremely high this year, has resulted in increased attendance, added rapport, and enlarged repertoire.

The membership in the organization has reached new heights as the Glee Club broadened and enlarged its activities. Featured in the series of concert tours were visits to Lindenwood, Monticello, Webster, and Cottey Colleges. The Glee Club performed on KOMU-TV and at the Missouri Penitentiary at Jefferson City, school convocations, Parent's Day Banquet, A.S. C.E. Banquet, and the Spring Joint Concert with the MSM-ROTC Band.

Officers
LEFT TO RIGHT: Pool, Fowler.

Photo Club

The Missouri School of Mines Photo Club is an organization of students interested in amateur photography. A fully-equipped dark room is available for all members in the basement of the Rolla Building. Interesting lectures or motion pictures pertaining to the phases of photography are presented at the monthly meetings. Exhibits processed by members and an all-college photo contest are regular events. These facilities and activities make the photo club a very worthwhile outlet for the amateur photographer.

1st Row: Statler, Brewer, Scott, Pan. 2nd Row: Sellers, Edwards, Valentine, Shavers, Robertson.

Esperanto

MOSAMO, the Esperanto Club of MSM was organized on the MSM campus on 28 October 1947 for the promotion of world communication through a common auxiliary language. Esperanto was constructed scientifically as a simplified language which employs grammar and words from the principal languages of the world. Esperanto has been adopted by the U.S. Army as the official Aggressor language. The agenda of the 8th UNESCO Conference included a discussion of Esperanto as the most desirable auxiliary language available.

Officers

C. L. Dake

The C. L. Dake Society is an organization in which students in all curricula at M. S.M. can participate in activities concerned with the earth sciences.

The Society meets twice a month in Norwood Hall for a program on some aspect of the earth sciences. Field trips to areas of geologic interest are arranged about once every two months. This year, the society visited the Magnet Cove area of Arkansas as well as the Eminence-Current River area of Missouri.

Officers
LEFT TO RIGHT: Owens, Kissling, West.

Radio Club

The MSM Radio Club, WOEEE, is dedicated to the art of Amateur Radio. It is an Affiliated Club of the American Radio League, has worked all states and continents, and is active in the Radio Amateur Civil Emergency Service and the Missouri Emergency Phone Net. We have been designated an Official Relay Station for emergency messages. The Club offers free message handling service to the entire student body.

Officers
LEFT TO RIGHT, FIRST ROW: Hogard, Schneider, C., Schneider, E., Fritts. SECOND ROW: Overall, Nau, Shafer.

Spelunkers

The purpose of the club is to organize the students of the Missouri School of Mines, who are interested in exploring caves and caverns, into a group to aid in the exchange of speleological knowledge and information.

In addition to the exploration of caverns, the club carries on various other speleological activities.

The ultimate goal of our club is to penetrate into the depths of the earth where man has never penetrated before, in an effort to explain the nature and origin of caves.

Officers
LEFT TO RIGHT: Adam, Jurgens, Kassay, Heuerman.

Independents

With its recently revised constitution tucked under its arm, the Independents Organization this year had, by far, its best year in its twenty-three year history.

The purpose of the Independents Organization is to provide a common meeting place for all independent students where they may share ideas, interests, and recreation. All students who are members of neither a fraternity nor a sorority

LEFT TO RIGHT, FIRST ROW: Staley, Davis, Bennett, Bertorello, Day, Baskin, Chiodini, Robertson, Reichert. SECOND ROW: Stevenson, Green, Gilmore, Vancil, Dowell, Spencer, Hart, Sherwood. THIRD ROW: Pressly, Unnerstall, Ganninger, Herschbach, Boren, Hornsey, Baldwin. FOURTH ROW: Taylor, Nauert, Hillmeyer, Henson, Brunjes.

Independents

are eligible to join the organization and have a voice in campus activities.

The Independents proudly participated in three major school activities. Half of the Student Council, including the president, were representatives from the Independents. G. D. I. members were also active on the St. Pat's Board--architects of the social event of the year, and the Miner Board--staff of the weekly school newspaper.

However, social activities for its members proved the most popular for the organization. Monthly meetings were highlighted by refreshments, popular door prizes, and feature films, including "Gentlemen Prefer Blondes" and "Mister Roberts". In October and again in May, nearly all the members enjoyed the festive social outing held each semester.

The Independents activities during the 1957-58 school year will be fondly remembered. It is only hoped that future officers and members will continue to work diligently to not only equal but also surpass the high standards established this year.

St. Pat's (G.D.I.) 1958

FIFTH ROW: Church, Horenkamp, Brockmann, Kohlleppe, Byas, Hawkins, Taylor, Testerman, Consoletti, Hutchins, Wyatt, Fey, Gaertner, Price.

Dormitory

With the number of students attending the School of Mines increasing every year the need for additional facilities has been very great. This year a new modern dormitory was opened. Two more new dormitories and a new cafeteria will be opened in the Fall. This will bring the number of students living in the dorms to approximately six hundred.

LEFT TO RIGHT, FIRST ROW: Noell, Schluemer, Martin, Chatham, McCahon, Wright, Sharon. SECOND ROW: Walker, Flanigan, Landingham, Minton, Larkin, Chen, Henderson, Inglis. THIRD ROW: Hootman, Mayer, Westehuff, Miller, Slusher, Todd, Leck. FOURTH ROW: Whetsell, Kowalski.

Dormitory

The Dormitory Council is the governing body of the dormitory. This group is composed of thirteen members representing floors and sections of the dormitory. A president and secretary are elected from this group. The council also forms committees to carry out its duties.

The active committees this year are the civic, noise suppression grievance, and cafeteria committees. Regular meetings are held by the council to discuss the problems concerning the residents of the dormitory.

Sections of the dormitory sponsor activities such as an annual Christmas party. The dormitory actively participates in most of the intramural sports and has excellent teams in many of them. Students living in the dormitory are active in many campus organizations, and also make up an important part of the M.S.M. student body.

Miner Board

The Miner is the official publication of the Missouri School of Mines. Its purpose is to give the students news concerning the school, students, and members of the faculty as well as any general news which might be of interest to the students.

The first Miner was published in 1914, 54 years ago. Before that some students published a booklet irregularly which they called the "Notebook." Since that time, the Miner has been issued every week except during holidays. The paper is put out every week, and one is given to each student. Many other people who do not attend the school also receive copies of the paper.

The Miner tries to give coverage to every different type of news. It is very diversified in the material contained in it. The staff welcomes letters from the students and publishes as many as possible of these letters since they are usually of great interest to the students. The Miner often takes a position on certain topics concerning the school and the students and tries to point out many of the good and bad points of these subjects, by means of editorials and feature articles.

Officers

LEFT TO RIGHT, FIRST ROW: Colandrea, Okenfuss, Qualls. SECOND ROW: Guetersloh, Hughes. THIRD ROW: Kozeny, Masnica.

Miner Board

Many times the paper will carry an article featuring some event, or topic which will be of special interest to the students. These features will concern some event which is taking place at school, some national event which may concern the students or some person connected with the school or its interest or activities.

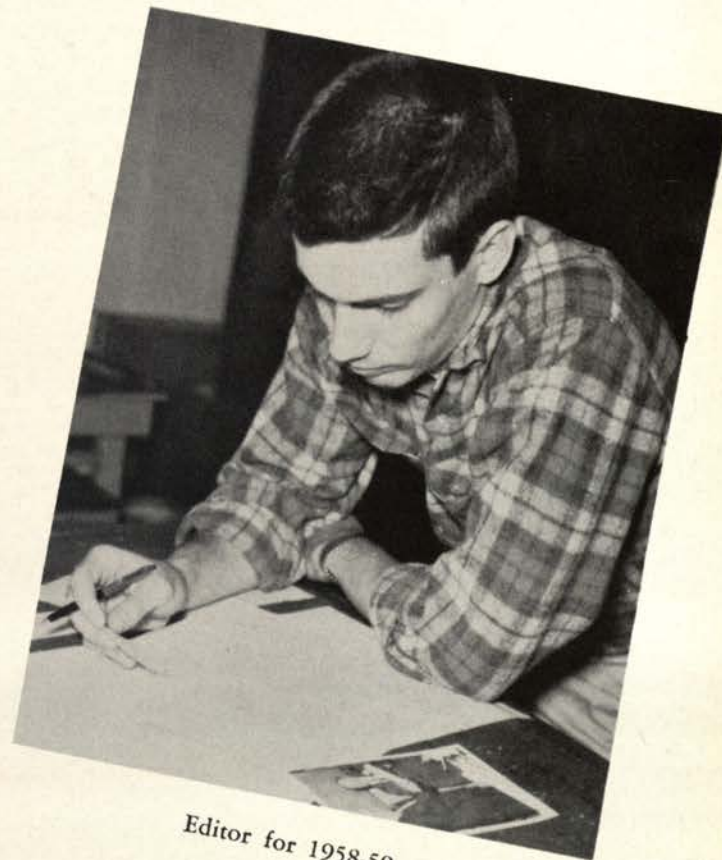

There is much attention paid to the fraternities and campus organizations by the paper. Each fraternity or organization may submit an article concerning its activities, and these are usually printed when space is available.

The sports section of the paper is very complete. It carries news concerning the major sports and the intramural sports between the organizations.

Rollamo Board

September 17, 1957. After three months of solitude and quiet the buildings on the Missouri School of Mines Campus are once again alive with the activity of students preparing for another year of hard work. Thus, the story which is depicted through the pictures as well as words in this year's Rollamo, begins.

As one turns the pages the story unfolds. One sees the social happenings, the activities, the sporting events, which highlighted the past school year. As we proceed one finds himself looking at the place where he ate and slept, recalling the many fond memories and good times which they hold. At the same time he sees the many fellows, who by their companionship, made this one of the best years of his life. Finally, we come to the end of the story, a goal which all of us hope to one day attain, graduation.

The story as told in this book and summarized in the above paragraph, is your most positive link with the school year just concluded. It is a means by which we can,

after we have become successful businessmen, recall our days in college. This, alone, is the purpose of a yearbook.

With this purpose in mind and with the understanding that it would take a lot of work and co-operation, the members of the Rollamo Staff under the leadership of Rich Konrad, set out to make this the most complete and detailed yearbook ever published at the School of Mines and Metallurgy.

It is the sincere hope of the staff that this book accomplished what was intended; an annual which will always be a constant reminder of your college days. We would also like to thank all the organizations for their help and co-operation.

Engineers Club

The Engineers Club has the prestige of being the oldest existing cooperative eating club on campus. It was founded during the fall semester in 1934 and since that time has continued to serve as an eating establishment where wholesome and nutritional meals are available to its members.

Membership to the Engineers Club is selective but open to all the independent student applicants on campus. The maximum number of members at any one time is 125. Each and every member is encouraged to join in as many school activities and organizations as he has time for. Through this encouragement many of our men hold offices in the various campus groups. Naturally the intramural scene is where the clubs' team spirit becomes obvious.

The officers and board members are elected each year on the basis of their apparent interest in the clubs' welfare, their

Engineers Club

capabilities of management, and popularity.

This year, as in the past, the members have sought to promote improvements to benefit those who will be future members. The largest undertaking of this program is the building fund which was initiated in 1956 and is progressing nicely.

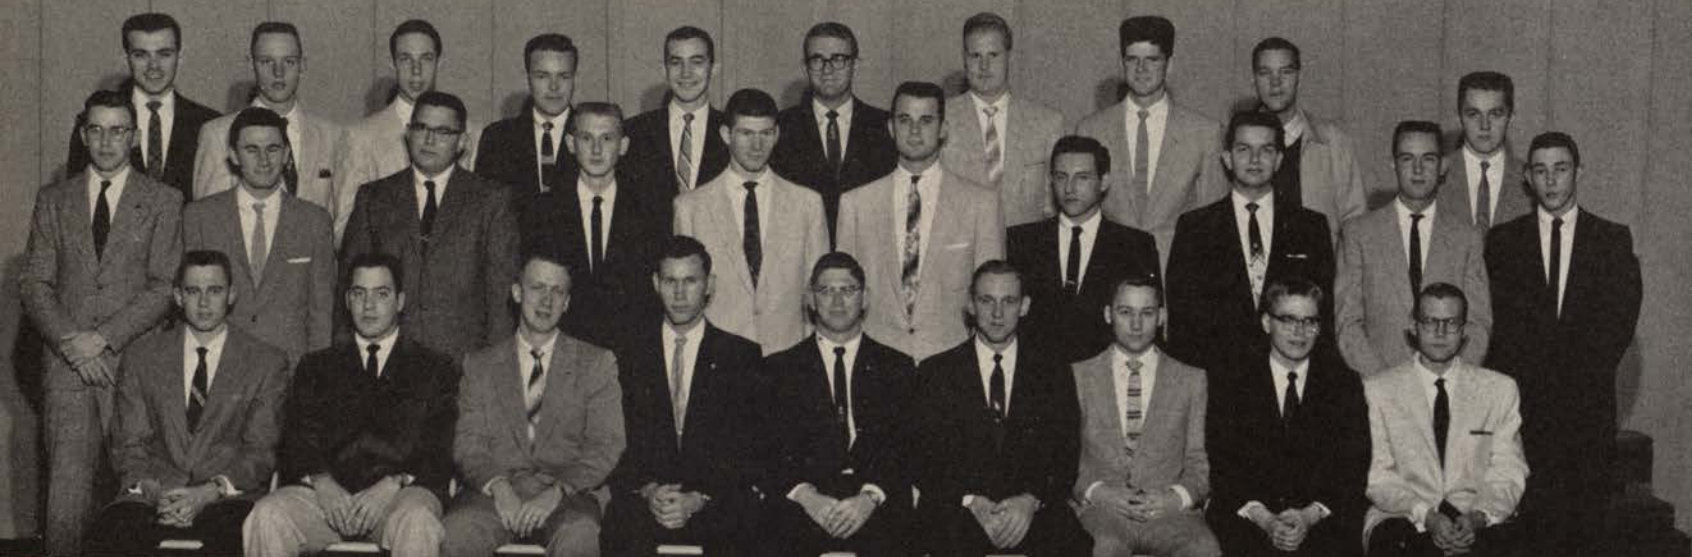

Though not expected of an eating club there is much fellowship in evidence at the Engineers Club. When members gather for meal time it is as though one large family were sitting down together. The tempo of conversation never lags and topics are never dull. This all leads to every one being close friends, strangers to no member.

The Club

Shamrock Club

Founded in 1955, the Shamrock eating club, open to all non-fraternity members, has grown in three years to a present membership of 132.

The club was founded and continues to thrive on three main purposes: one-to provide for the student good food, expertly prepared, at a modest price; two-to provide the independent student with a chance to take part in many campus and social activities that otherwise might not be open to him; three-to help the independent student make informal acquaintanceships, in a friendly atmosphere, which will lead to life-long friendships.

In intramural athletics, the Shamrock club always ranks among the top competitors for the Intramural championship. At present the club has a good representation of its members out for all sports, both intra-

mural and intercollegiate. Recently initiated is a "Sportsman of the Year" award which is presented to the athlete doing the most to bring the intramural championship to the club. The award consists of a plaque for the sportsman and the honor of having his name inscribed on a trophy along side the names of the previous winners.

The Shamrock club is managed from day to day by the board of control consisting of 5 members elected by the membership at large every 9 months. Matters of major importance or of far reaching consequences are decided upon by the members at meetings held once a month on the first Monday of that month. Members are encouraged to bring up new ideas and methods of improving the club.

The Shamrock club faces the future with the determination to keep the club as one of the predominating powers on the campus.

Tech Club

Since its formation in October 1949, the Tech Club has become one of the leading organizations on the campus. More than 120 members share conversation and nutritious food through the club.

Although the club's main purpose is to provide its members with wholesome food at economical prices, it has purposes and ideals which are much more comprehensive. Many students who have chosen Independency are interested in sports and have abilities in other fields. The Tech Club brings these men together into an organization, thus giving them an opportunity to further their talents and abilities, both athletic and otherwise.

The officers elected by the members of the Tech Club handle the daily business of the club and the preparations for outings and other activities. The club holds monthly

meetings in which every member has an opportunity to vote and to voice his opinion about club activity.

This year the Tech Club has again ranked high in intramural sports, taking first in handball and the cross-country race. Last year the club was intramural champion. Thus the club has shown to be more than just an eating club.

The Tech Club is a dynamic, progressive organization which furthers itself and the ambitions of its members more each year. Without a doubt the Tech Club will continue in its place of importance throughout its future on the MSM campus.

Acacia

Fraternity

Acacia Fraternity was organized at the University of Michigan by a group of Master Masons in the year 1904. For the first thirty years one had to be a Master Mason before joining Acacia. Following the First World War the age at which young men enter college lowered and by the '30's few men in college were 21 years old. At that time Acacia changed its membership requirements so that young men under 21 could join if they were eligible for Freemasonry in every aspect except age.

Progress Report
The Organizers

In January, 1958, a group of MSM students and faculty gathered to meet with Dr. R. C. Bradley and several members of Missouri chapter (at Columbia). It was decided to form the Missouri School of Mines Chapter of Acacia Fraternity. In March, the MSM chapter was pledged by Missouri chapter and Central Missouri State Chapter (at Warrensburg).

The MSM Colony is now working to complete the requirements for a charter. They have purchased a house at 508 West 9th street and have hired their House-mother, Mrs. Marie Guinnup. They will move into the house prior to the opening of school in September.

Many interested young men have accepted the challenge to establish this chapter at MSM, and the benefits of their hard work will be manifested as Acacia will take its place on the campus of Missouri School of Mines.

Many thanks are extended to all of those people who helped provide the work for the initial spark and to those who fed the fire of Acacia to where it is now burning brightly.

Beta Sigma Psi Fraternity

Beta Sigma Psi is the national Lutheran social fraternity. The Eta Chapter here at M.S.M. was founded in the spring of 1952, and began with a modest membership of 20 men. Since that time the number of members has slowly increased, until at the present time there are 40 men affiliated with the chapter. It is hoped that the membership will double again in the next six years as it has doubled in the past six years. This

Music Men

Rembrandt

Ho Ho

New Member

Shall we dance

increase in membership has brought with it a rise in the scholastic standing so that the effort to increase has not meant that the standards for the ability of the new members has been decreased. Rather these standards have increased. A final step in the membership drive would be the acquisition of a new chapter house, since at the present, there is no room for additional men in the house which the chapter now occupies at 206 West Ninth Street.

In the Intramural Activities, the fraternity again, as in the past, has done well, especially considering the still modest number of members that are in the house. During the fall, the football, swimming, ping pong, handball, and tennis teams made fine showings; while in the spring the softball and volleyball teams provided keen competition.

The social year started off after the Washington U. - M.S.M. football game with a barn party in St. Louis. This was followed by the homecoming festivities which turned out to be a big success. The Christmas dance again saw Lee Trapp and his band provide the musical entertainment. After the end of another successful year, everyone is looking forward to a bigger and better year next fall.

Delta Sigma Phi

Fraternity

Officers
LEFT TO RIGHT, FIRST ROW: McCormick, McNabb, Kincaid. SECOND ROW: Schulte, Weimholt.

The Delta Sigma Phi fraternity was founded in December, 1899. The purpose of our fraternity is to "fulfill the desire of serious young college men for a fellowship and brotherhood, as near a practical working ideal as possible, not fettered with too many traditional prejudices and artificial standards of membership, and accompanied by a clean, pure, and honorable chapter home life".

The M.S.M. campus first saw evidence of Delta Sigma Phi in March, 1955, when a club was established by two ambitious, young men. Through their efforts, the club was chartered scarcely a year later as the Delta Epsilon chapter with thirty-five charter members. By this time we had already moved into our house at 200 West 18th.

Last spring, our active membership, totaling close to sixty men, was far more than we could

accommodate in our building at the time. Consequently, the old infirmary building was purchased from the Missouri School of Mines and was immediately moved to our property. The building was partitioned into sleeping rooms. At the present, we are able to accommodate sixty men.

The Delta Sigs made their mark on the campus in the scholarship field by capturing the I. F.C. scholarship trophy in the spring semester of 1957.

The social life of Delta Epsilon included a Pledge Dance and the St. Pat's Dance among numerous other events.

We have come a long way since our meager beginnings while the confidence and the enthusiasm shows hints of much greater things to come. The future indeed looks bright for the Delta Epsilon chapter.

Kappa Alpha is something special. Kappa Alpha is a brotherhood with the purpose of uplifting the character of its members. Kappa Alpha is not only a fraternity, but an Order. It is an Order of high ideals and high principles.

Kappa Alpha was founded in 1865 at Washington and Lee University in Virginia. The K. A. 's take Robert E. Lee as the spiritual founder and his teachings as principles of life by which to live.

The Beta Alpha Chapter here on campus as an integral part of the Order strives to represent its high principles and strives to improve the social and scholastic standards of MSM. The Chapter was founded in 1903 and has been functioning continuously ever since.

This year, '57-'58, has been one of the very best. There were the usual parties and social events which are very much a part of the life at school. There was the Pledge Dance, Homecoming, Military Ball, and of course, St. Pat's, each contributing something special to the year.

Kappa Alpha Fraternity

The year has been filled with successes as well as a few disappointments. It has also filled us with even greater hopes of a new house. Perhaps next year at this time there will be a new home of Kappa Alpha.

Our Quartet won first place in the IFC Sing held December 14, 1957. This is the second year straight our fine quartet has held this honor. Among other things of pride was the annual Christmas Party for underprivileged children of the community.

Graduation will end this school year. For some it will end school for good; while others are beginning. To our Brothers and all others that are graduating we want to congratulate and say God's Speed.

Cheese Cake

Kappa Sigma Fraternity

Ranking among the top fraternities nationally, Kappa Sigma on the MSM campus upholds its traditionally fine record. For 55 years, Beta Chi has been growing and improving until it holds respected positions in scholarship, intramural sports, and campus leadership.

Place your bets

Speedy pledges

In the fall, 1957, Beta Chi initiated a program of annual charity projects. The chapter selected as its first project the renovation of the home of a 95-year-old Rolla resident, Mrs. Daisy Rogers. The annual Christmas party for needy children was held with ol' Santa himself the featured guest.

The social side, of course, is not neglected. The fraternity sponsors several social events throughout the year including, Homecoming, St. Pat's, and Greek Day. A large pledge class helped to make the Pledge Dance a huge success and the annual Casino Party improves every year. Also, for the last two consecutive years, the Kappa Sigma nominee for St. Pat's Queen was selected above all others to reign over the festivities. This year's Queen of the Court of Love and Beauty was Miss Joline See of Springfield, Missouri.

On the scholastic level, Kappa Sigma continued to maintain its high standing among the fraternities by placing close to the top in the overall listings of the fraternity scholastic averages.

Improvements to make the chapter house a better place in which to live are constantly being made. Recently, new furniture has been purchased for the study rooms and tile floors laid on the second floor.

Hot coals

Lambda Chi Alpha

Fraternity

Bleak day

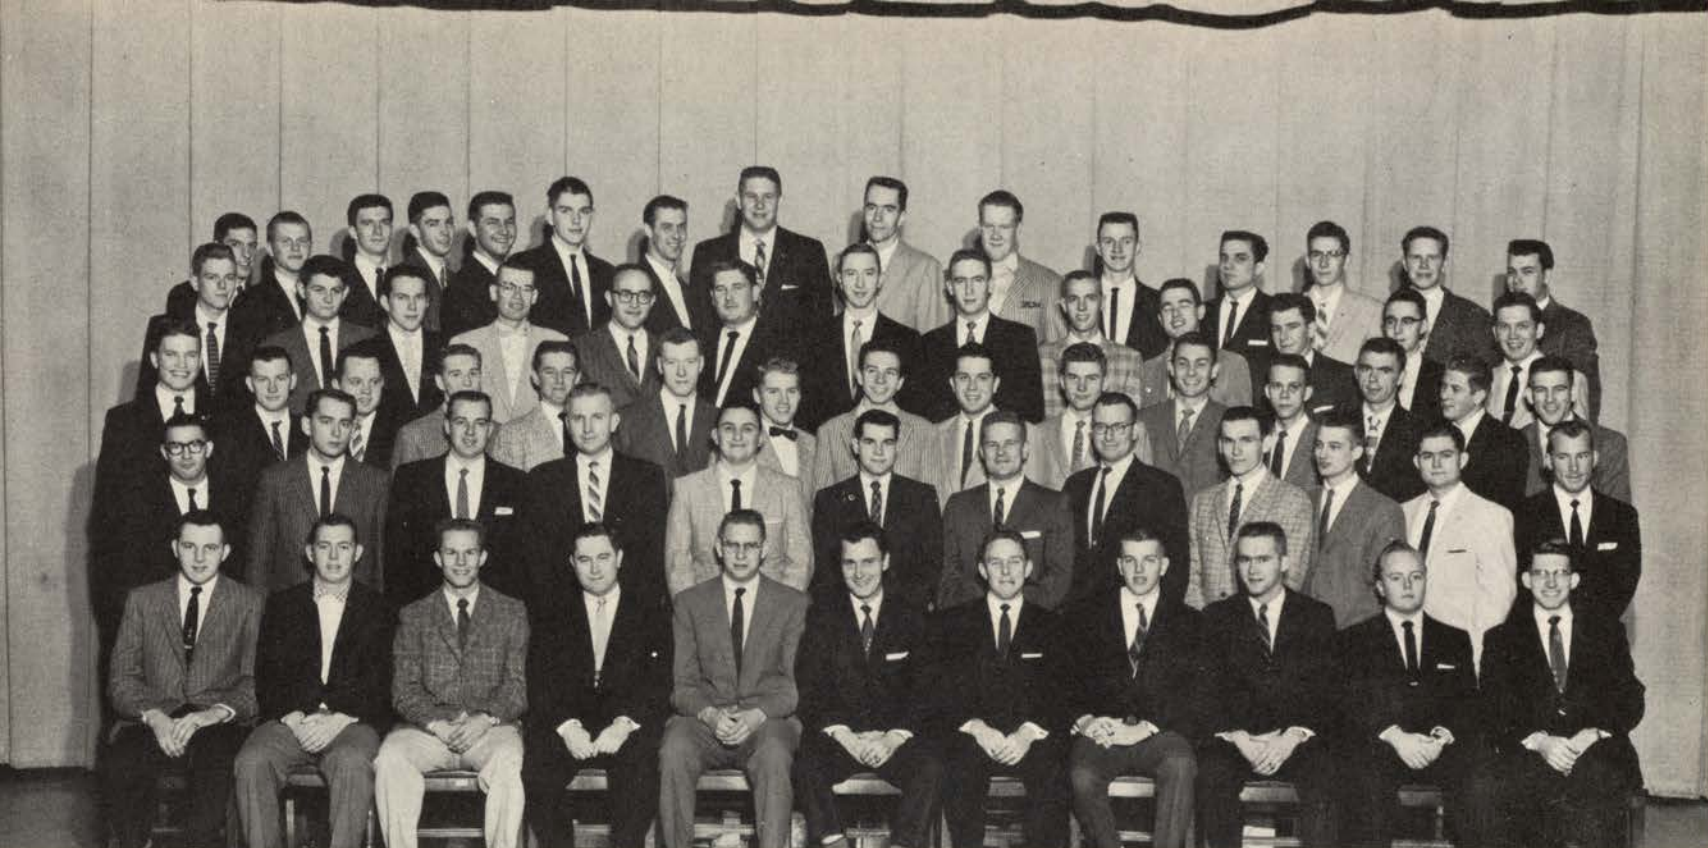

In 1909, a group of students at Boston University, Members of the Cosmopolitan Law Club, formed a greek-letter society. During the first few years of organization, certain aims and ideals formed among the members, and a foundation was carefully laid for future expansion of the group.

This was the beginning of Lambda Chi Alpha Fraternity. The ideas and beliefs of the founders must have been sound ones for today, though a comparative youngster in the fraternity world, Lambda Chi has more chapters in more colleges in the United States and Canada than any other and is recognized as a leader among college fraternities.

Among our members are heads of great corporations, world-famous athletes, army generals, and a former president of the United States. This gives an idea of how Lambda Chi prepares its members for life after their college days are over.

LEFT, TOP TO BOTTOM: The Bouncer, Lambda Chi Queen, Bang-Bang, All stopped up. RIGHT, TOP TO BOTTOM: Cross country winner, Homecoming display, Christmas party, The choppers.

LEFT TO RIGHT, FIRST ROW: Simko, Bowlin, Robinson, Norman, Schuttenhelm, Peet, Stevenson, Pasley, Madigan, Hughes, Cawns. FIFTH ROW: Engel, Keeler, Shields, Musteen, Story, Weiland, Hooks, Moss, Hudwalker, Murphy, Cole, McMahon, Headington, Faenger, Kurz.

The chapter at Missouri School of Mines was founded April 17, 1917 and is one of the largest on campus. The fraternity house which was built for us just two years ago offers, we feel, the very best in living conditions.

Being a good engineering student means hard work, and scholarship is one of the aims of Lambda Chi Alpha. Also important is social development. The work schedule is broken by a number of dances and parties, and each one is a lesson in social behavior.

Lambda Chi has always been active in the intramural sports program too, and again this year was a contender for the top position.

Perhaps the most outstanding thing about the chapter is the men themselves with each working, in his own way, to live up to the ideals of Lambda Chi Alpha and to build an even greater Fraternity.

The Pi Kappa Alpha Fraternity was founded on March 1, 1868 at the University of Virginia. Fifty-three years ago, Alpha Kappa chapter was founded at M.S.M.

Since its beginning, in 1905, this chapter has strived to excell in every undertaking. In the past Alpha Kappa has always ranked high in campus activities gaining numerous trophies in recognition of athletic and scholastic achievements.

Not only on the M.S.M. campus, but among Pi K. A. 's 127 chapters Alpha Kappa is ranked high among the first ten in every award given by our national office.

Our house, considered by many as the most beautiful on campus, is a landmark to those who visit Rolla. It is kept looking its best by the generous efforts of our 57 members and pledges. This fall, the outside and most of the interior of our house was repainted. The chapter is continually looking forward toward the future with many plans for additions and improvements.

Pi Kappa Alpha Fraternity

The 57-58 social season started with the annual pledge dance held early in October. Following this was the annual Homecoming dance. The next event was our Christmas formal. The week following the Christmas dance we held our annual Christmas party for the underprivileged children of Rolla. It is often looked forward to with more enthusiasm by the actives than the kiddies themselves. The second semester was socially enlightened by our annual Bum's Brawl, St. Pat's Dance, and closed with the annual Greek Day festivities. Banquets were served on both Founders Day and Mothers Day.

And so another year can be written into the history of Alpha Kappa, which will be reviewed proudly by all those who compose this brotherhood.

Nineteen Fifty-seven--fifty-eight was another successful year for Gamma Xi of Sigma Nu as it again ranked among the better social fraternities on the MSM campus. Sigma Nu introduced fraternity life to the Missouri School of Mines in 1903 when a chapter was established here several years before other fraternities came to the campus. Since that time the chapter has grown in size, activities, and spirit. As is traditional at Sigma Nu, efforts were made to improve the chapter socially, scholastically, and athletically.

In intramural athletics Sigma Nu was again one of the top contenders for the overall crown. Placing high in almost every sport, they not only gained recognition for the fraternity, but also received many hours of recreation both as competitors and spectators.

Six party weekends formed the mainstay of social life and development at Sigma Nu. The social year began with the Pledge Dance in the fall followed a few weeks later

Great minds at work

The wages of sin

House overcrowded?
The proud and profane
Smack takes a break

Sigma Nu Fraternity

by Homecoming. The third party weekend consisted of the Yukon Party and the Christmas Dance which were great successes. Next came the White Rose Formal, and then the traditional St. Pat's Day parties and dances continued the year's social activities in grand style. Ending the calendar of parties was Greek Week, a celebration in the spring anxiously awaited by all fraternity men at MSM.

Outstanding service projects of the year were the Children's Christmas Party and Work Day. Twenty underprivileged children of Rolla were treated and presented gifts at the Christmas Party while a local organization received a helpful hand through the Work Day Program.

Since the adoption of public colleges, there has been the demand for brotherhoods where young men could live together, sharing ideals and personalities. These "Homes away from Home" have been given the name "Fraternity". Many large national fraternities have been formed from small clubs which felt the need for strong national organization. Sigma Phi Epsilon is one of these.

Founded in Richmond, Virginia, in 1901, from the Saturday Night Club, Sigma Phi Epsilon has been one of the fastest growing fraternities. The 38th fraternity founded, Sigma Phi Epsilon is in its 56th year. In these 56 years Sig Ep has grown into the 3rd largest social fraternity.

Each man who enters, as a brother, into the sacred halls of Sigma Phi Epsilon is inspired to do his best and accomplish all that is within his power. Not only does the man find the joys of fraternal bondage, but he also enjoys the privilege of helping others.

Even though Sig Ep is only 9 years old on the MSM campus, we have come a long way. The road has not been easy but the veterans who founded our chapter have laid a strong foundation. It is our aim to uphold the reputation we now have and build for the future with a goal as the "ideal fraternity".

Sigma Phi Epsilon is known as the "Fraternity with a Heart". The annual Tri-Sig Christmas Party for the underprivileged children of Rolla is one way of opening our "Heart" to others while showing a willingness to cooperate. Cooperation holds the key to success for any organization. For this reason cooperation is always foremost in the thoughts of Sig Eps on campus.

Living up to our reputation as being the "Fraternity with a Heart" is sometimes a hard job, but we, here, have done and will continue to do our best to be the friendliest house on campus.

Originating on the M.S.M. campus as the Prospector's Club, the Alpha Iota chapter of Sigma Pi was formally installed in April, 1933. During these twenty-five years, it has maintained a position of one of the leading fraternities on campus.

Our social calendar includes such memorable activities as the Homecoming Drop-in, the Christmas dance, the Pledge Dance and St. Pat's, the tri-Sig Children's Christmas Party in cooperation with Sigma Tau Gamma and Sigma Phi Epsilon, as well as our chapter Christmas party, in which the strong feeling of brotherhood is captured both in the gift and the poem accompanying them. To round off our social events, the annual Greek Day games this year were also the same day as our Silver Anniversary Celebration.

The men of Alpha Iota have wholeheartedly participated in the various organizations on the campus, and many of them have brought honor to the chapter as a result of the capable leadership which they displayed in the offices to which they were elected.

Homecoming

Sigma Pi Fraternity

In addition to campus activities, the chapter and pledges alike devoted many leisure hours to the completion of our chapter room. There has also been much time and energy devoted to redecorating the house.

Many of our alumni hold positions of great responsibility. A number have their own business, and others are located in education, research, field work, service, and other branches of engineering which are necessary to our modern way of life. It is to these men that we dedicate these pages.

Sigma Tau Gamma Fraternity

Sigma Tau Gamma was founded for the express purpose of promoting friendship and brotherhood among college men. A colony established on the campus of the School of Mines in May of 1956 with the initiation of twenty-one charter members was followed by the installation of the Alpha Omega Chapter on November 10, 1956.

A house was purchased during the summer of 1956 at 200 East Twelfth Street and is the present home of the chapter.

The second year of the fraternity on this campus has seen great advances in material and social matters. The fraternity house has undergone an almost complete remodeling; and all of our facilities have been improved. The house has been made to be more comfortable and more convenient for all of us. The work on the upper story has increased the housing capacity and made possible the closer fellowship of more of the brothers. These improvements have caused the growth of the organization, until it rates as one of the most important groups on campus.

More important than the material advances, however, have been the gains in brotherhood and friendship promoted by the fraternity. The work on and participation in the various social activities of the year have brought about a unity second to none on the campus. We are closer and more important to each other as a result of working together. The purpose of the fraternity is most surely being fulfilled; and we couldn't be more pleased.

On January 10, 1899 Tau Kappa Epsilon was founded at Illinois Wesleyan University. Originally a local fraternity, The Knights of Classic Lore, Tau Kappa Epsilon has since expanded until it is now the second largest national and international fraternity in the United States.

Beta Eta Chapter of Tau Kappa Epsilon was installed at M.S.M. on March 9, 1947 and since that founding it has continued to grow into one of the leading fraternities on the campus.

In the social order Teke parties maintained their excellent reputation in 1957 and 58. The festive season was again opened by the Pledge Dance, this was followed by the Christmas Formal and the very popular French Underground Party. As a fitting climax came the party during St. Pat's. Last year at this party Tekes combined work and play by taking top honors in the float contest.

In sports Tau Kappa Epsilon again shows leadership and the ever present improvement as our overall intramural standing climbs toward the top. With the football, softball and cross country teams continuing their success Tau Kappa Epsilon has high hopes of winning the overall intramural trophy in the near future.

In the last few years Tau Kappa Epsilon has overtaken and surpassed many older fraternities in both size and quality. None of this could be accomplished or brought about without the hard work and effort of our active membership. In this expansion Teke has demonstrated its ability and leadership. Beta Eta Chapter plans to further this expansion both locally and nationally and believes that the coming years will show more outstanding progress.

Theta Kappa Phi Fraternity

Although Theta Kappa Phi is among the youngest of fraternities, it has already proven itself outstanding on all campuses where her chapters are located. Theta Kappa Phi is a social fraternity for Roman Catholic college men and was founded for the purpose of providing wholesome moral environment plus the social, educational, and

athletic advantages of fraternity life to its members.

The chapter here at M.S.M. was formerly the Order of Cardinal Mercier which was founded in 1925. It received its charter as Mu chapter of Theta Kappa Phi in 1936.

Mu has continued to show herself as one of the foremost chapters of Theta Kaps by again capturing a National Efficiency Award this year. Her members have also gained many positions of leadership and distinction in the various organizations on campus.

On the sport scene the Theta Kaps established their athletic abilities. They were among the tops in the numerous events and the overall point standings.

A year of good times was provided to all by the very momentous social calendar which was characterized by the different dances throughout the year and was climaxed by the riotous St. Pat's weekend.

Now that the events of this year are just fond memories of things in the past, the Theta Kaps hope that next year will bring even greater accomplishments and bring them closer to their goal which is to make themselves better men morally, socially, and scholastically.

A touch of seasoning

Alpha Psi, the Missouri School of Mines chapter of Theta Xi was established October 8, 1949. In the short span of time it has been located here on the campus it has been growing by leaps and bounds. Attesting to this expansion is the beautiful chapter house newly purchased through the combined efforts of the active chapter and the alumni association, still bound by ties of loyalty to Theta Xi. Throughout the summer additions and provisions were made to enlarge the house but in lieu of our rapid growth plans are again being necessitated for the addition of greater facilities.

The social season started off with the Homecoming Dance. A good time was had and many fond memories were recalled with the returning alumni. Following this event with the even greater success of the Pledge Dance, Housewarming Function, Christmas and Valentines Dances, traditional St. Pats, and the Spring Formal.

The closing school year has left a deep, lasting impression on Alpha Psi. We give thanks to all who have aided and given us encouragement in our new surroundings and we strive ever to attain unity and prominence, now as in the future.

Triangle, a fraternity of Engineers and Architects, was founded in 1907 by sixteen Civil Engineering students at the University of Illinois. The aims of the fraternity are to improve scholastic and social standing among engineering students.

The Missouri Mines Chapter was installed in December of 1927. It was formed from a club that was previously known as the Grubstakers Club, the first social organization on the Campus. Since that time, Triangle has taken its place among the leaders here at Missouri School of Mines.

This year the House has participated in many exciting intramural games, and several of our teams have added championship trophies to our mantle. Triangle was proud to add this year, trophies in basketball and wrestling. The competitive spirit of Triangle athletic teams placed them high in the final standings for the intra-

mural trophy. Socially, this past year has been a successful one for Triangle. Several weekend dances were held, and they were thoroughly enjoyed.

This past year, the second and third floors of our house were remodeled to keep abreast with the change in times. With the ever increasing enrollment here at M.S.M. expansion and remodeling is being planned for the near future.

Our Mother's Club has been very active again this year as they have been in the past. Some of the generous gifts we have received so far this year include a hi-fi set, piano, and pull drapes for the second and third floors. We are very proud to have such a fine organization as our Mother's Club.

Triangle possesses that spirit which is invaluable for the success of any organization. With this in mind, Triangle is looking forward to the years to come and the improvements and accomplishments they may bring.

Playing for Charity

Greek Day is an annual event sponsored each spring by the Interfraternity Council. Friday night a carnival was held, the proceeds of which went to charity. Saturday afternoon a picnic was held at which each fraternity competed for the Greek Day Trophy. Saturday night, dances were held at all the fraternity houses.

Military Ball

The annual Military Ball, revived by the Pershing Rifles, R.O.T.C. staff, and Cadets at M.S.M., proved once again to be a smashing success and has firmly established itself as an annual campus event.

The distinguished Military officers, Cadets, and their ladies enjoyed immensely the pomp and pageantry of the stately affair held in gaily decorated Jackling gym.

The evening was highlighted by the selection of Miss Joyce Janssen as Honorary Cadet Colonel. Miss Janssen was chosen from a field of fourteen lovely candidates by Brig. General John H. Dudley, acting Commander at Fort Leonard Wood. The General was assisted in his selection by Dean Curtis L. Wilson and Colonel Lloyd Rall.

All who were in attendance marveled and were especially delighted with the transformation of the gym into a myraid of sparkling colors through the use of streamers and thousands of balloons suspended in a silk parachute. After General Dudley completed the first dance with Queen Janssen, the balloons came showering down and all began to dance.

Music for the occasion was ably provided by Clarence Forester and his Orchestra.

St. Pat's

Ron Huseman

St. Pat for 1958

This year marked the 50th Anniversary of the St. Pat's Celebration. After fifty years of carrying on this tradition the celebration has become the biggest event of the school year.

Ron Huesman, St. Pat of 1958, arrived Friday afternoon to lead the parade of colorful floats down Pine St. to the edge of the campus where he delivered his annual message and presented the trophies for the winning floats.

Woody Herman and his Third Herd provided the music for the costume dance in Jackling Gym Friday night. The evening was highlighted by the annual knighting ceremony.

The crowning of Miss Joline See at the coronation ball Saturday night brought the celebration to the conclusion.

Commencement

The eighty-fifth annual Commencement exercises of the Missouri School of Mines and Metallurgy were held on Sunday, June 1, 1958. That morning, Dr. Ned Cole of the Christ Church Cathedral delivered the inspiring Baccalaureate Address. In the afternoon, Mr. Charles A. Smith of Mexico Refractories gave an enlightening address; after which, President Elmer Ellis conferred the degrees, bringing a fitting end to a very momentous day in the life of those graduating.

Farewell

On the sundial of time another year has past and it has recorded many accomplishments and failures. It is the good fortune of yearbooks to stress the happy events and accomplishments that befall an individual. Many have contributed generously in making this a pleasurable opportunity.

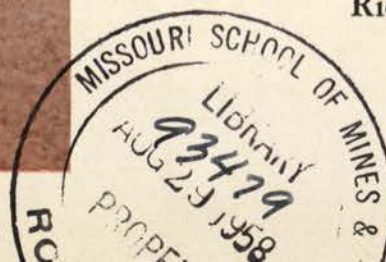

The one person most responsible for the quality of this yearbook is Mr. Harry Swain. Credit is given to him for layouts, building pictures, technical advice, and many hours of personal advice on the organization of the 1958 Rollamo. Sincere thanks are extended to Mr. Swain by the Staff of the Rollamo. Credit for individual pictures, organization pictures, and many special shots goes to Del Valle. Del was always ready when needed and did an excellent job in his photographic work.

On campus the Athletic Department deserves a thank you for their cooperation and readiness to help. The registrar's office provided great assistance to the Staff, especially Jay Carney who furnished the classes' list of students. In the business office, Jack Wilson was persevering in handling contract and financial problems that arose during the year.

The faculty advisor of the Rollamo, Prof. Bill Murphy, was always nearby when trouble presented itself. He spent many hours smoothing rough spots that arose. His advice pulled the Rollamo over the hump several times.

Everyone did their part to insure that this year's Rollamo would be a good yearbook.
